The Angels of Energy Economy

Also known as

**The Angels of
Masadu**

Beloved,

***We endow people and animals and even plants with the
faculty of finding out in advance
the times of bad harvests,
of famines,
and emergency.***

***Because all of creation is endowed with indwelling divine will for the highest good of all
concerned,
even insects and animals instinctively attune to this will,***

and gain a type of clairvoyance to live according to principles of economy and storing energy.

***Flowing with natural cycles of energy is a path of least resistance,
and is analogous to swimming with the current instead of against it.***

*The web of life is an interdependent field of flowing, changing energy
and is designed to operate with maximum efficiency and minimum
effort.*

*We inspire mankind, and all sentient life and creatures,
to be economical,
and put aside reserves for winter
and times of scarcity.*

*Remember that by flowing with divine emotions
and attuning to the original purity of all ideas in Divine
Mind
a Child of Light naturally awakens clairvoyance
and other mystical faculties.*

*These faculties,
often express themselves in meditation
through inspired desires, images, emotions, and
sensations,
and help a person know what to expect from,
and how to react to,
natural cycles of life.*

*By attuning to and connecting to limited or wounded emotions as they
arise,
by thanking them for wisdom and insight gained from them,
instead of resisting them or acting them out destructively to self, life,
or others,
negative ones flow and heal,
and transform into positive emotions
that attract loving outcomes.*

*As this occurs, inner emotional turmoil ceases
so that inner guidance comes in clearly.*

Emotions are compressed information.

Emotional information attracts corresponding physical realities out of the quantum field.

*By awakening to clairvoyance and other gifts,
inner guidance directs actions to safeguard all kinds of
energy,
including energy of will, thought, emotions, and form.*

We offer protection so that people and animals do not suffer.

Life energy flows in cycles.

Each stage of a cycle opens up important blessings and fruits.

For example, during cycles of lack, the blessings of faith, creativity, genius, patience, inner strength, frugality, co-operation, unity, courage, thankfulness for small things, and persistence, etc. blossom.

These fruits nourish and bless future cycles of plenty and harvest.

Flowing, emotion, the change process and fluidity are virtues of letter M, the first letter of our name.

This is the Divine Feminine Energy of emotions, change, and emotion and is magnetic, attracting new realities into form.

**By attuning to natural magnetic flows of Divine Emotion in Creation,
a person is in tune with cycles of plenty and cycles of lack
which balance each other.**

As above, so below.

***Attuning to the original purity of all ideas in Divine Mind
gives a Child of Light clairvoyance
and other mystical faculties that make it possible to know
what to expect from,
and how to react to, natural cycles of life.***

This is the divine virtue of letter A of Masadu.

***By releasing for transformation any imperfect states of being, desires,
visualizations,
beliefs, emotions and sensations, a person gains control over negative
beings and situations.***

This is the virtue of umlaut A, ae.

***All-penetrating-Divine-Will for the highest good of all is
omnipotent and omnipresent in everything.***

***By experiencing temporary relative lack in any area of life,
tremendous gratitude is generated for future times of
plenty.***

Remember, because all of creation is endowed with this indwelling divine will for the highest good of all concerned, even insects and animals instinctively attune to this will and gain a type of clairvoyance to live according to principles of economy and storing energy.

This is the divine virtue of letter S.

By using mastery, and reserving energy on all levels to use in times of need, a person learns how to always have abundance.

Meditating on the original blueprints of perfection in Divine Mind enlivens such wisdom and talent that any situation can be approached from a position of mastery and success.

As freedom from clinging to limited or harmful states of being, desires, thoughts, emotions, or possessions is realized, control is gained over the material world. These are again the virtues of A and umlaut A, ae.

Understanding the mysteries of love to create is the virtue of letter D.

The act of creation and understanding its ongoing effects through time
are the virtue of letter U.

We give guidance and inspiration on economy of energy on planes
of consciousness-penetrating-all, of will, of thought, of feelings, and of
sensations.

Visions of plenty and flowing emotions of gratitude attract amazing
solutions to situations concerning energy supply.

*Our responsibility is to inspire each person with timely
premonitions and warnings in
plenty of time to prepare for situations that require the use
of reserves of energy on any level.*

Each plane of energy; the plane of akasha, will, thought, emotions, and
sensations,
has its own unique rules of reserving and storing energy.

On the plane of consciousness-penetrating-all, the akasha, the way to
store and reserve energy is to spend at least ten percent of meditation
time
in a state of pure being and unity with Divine Mind and all creation.

Spend the time attuning to unity with all of the Divine Virtues that
permeate all of inner and outer space.

*An impulse that is not acted upon is stored as will energy,
that can be used at a later time.*

On the spiritual plane, the plane of will, desire, and intention,
a person stores energy by not acting out ten percent of natural
impulses,
such as eating or speaking,
and by reclaiming power from whatever outer sources they have given it
to.

Any person, organization, or system of thought that has been made into
an authority or source of guidance
becomes secondary to inner guidance.

Receive guidance directly from within from the One Life that penetrates
All,
from Divine Providence, from the still small voice.

In this way align individual will with Divine Will,
which is omnipotent, and conserve will energy.

If you have dampened down your will to follow the will of someone or
something else,
reclaiming this energy increases the supply of sacred will-power found
in attunement with Divine Will.

*A Wise Teacher helps you learn how to go within and follow your own
inner guidance.*

Attuning to the One Divine Will purifies and perfects personal will.

*Discriminate between desires that are uplifting and those
that create pain.*

Heal and purify the ones that create pain,
by releasing them to change into other states that are the highest good.

Also master emotional flowing and healing and change.

Will Power energy that is aligned with Divine Will is necessary to maintain balance in the inner and outer worlds and manifest Heaven on Earth.

On the mental plane, the plane of beliefs, thoughts and ideas, the way to store energy is to nurture only ideas that feel invigorating and uplifting .

Any thought or idea that diminishes life, that leaves you feeling less, is toxic,
like rotten food and can be discarded.

A perfect idea or thought is one that uplifts All Life.

Devote one tenth of your thought energy to creating and formulating ideas and thoughts that add value to life.

As part of daily practices, devoting time to possibility thinking {sometimes called what if thinking} satisfies this need.

*Visions and ideas are entertained which feel beautiful and uplifting,
and create new realities which are beautiful.*

During possibility thinking ideas are embellished, nurtured, explored and embraced which break outside of old paradigms, expand the scope of what is considered customary,
and are inspiring in and of themselves regardless of apparent practicality.

Any idea qualifies to be embraced if it is accompanied by a noticeable increase in positive emotional energy.

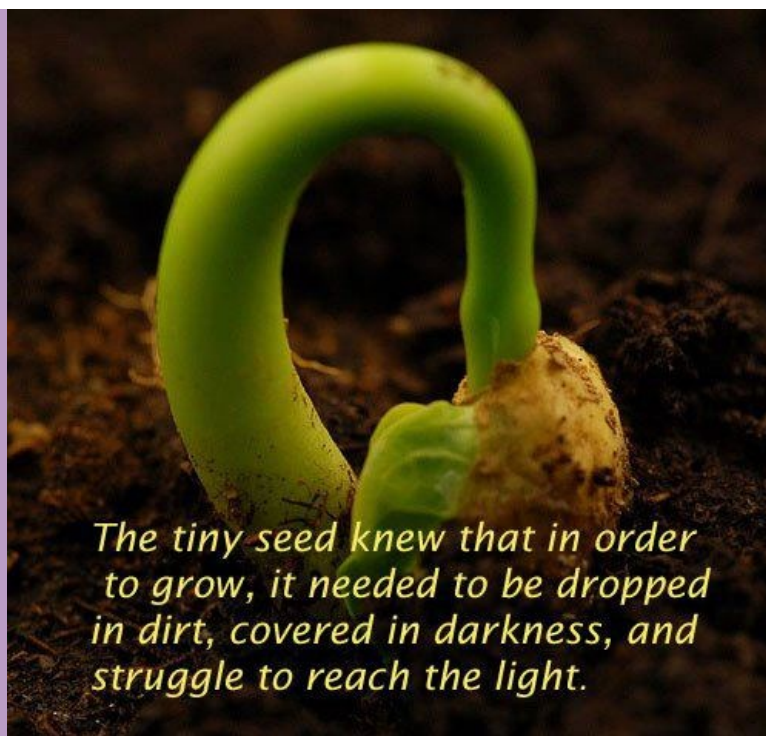

*An idea is especially valuable
if it continues to generate more good energy the more you meditate on it.*

On the emotional plane, learn to distinguish between uplifting emotions and depressing ones.

Heal the depressing ones through recapitulation, feeling them through in a safe and non-destructive loving environment until they heal and purify themselves.

With flowing positive emotions, give love to all creation, to self and others.

The more you give, the more you reap.

The tiny seed knew that in order to grow, it needed to be dropped in dirt, covered in darkness, and struggle to reach the light.

Hold back one tenth of emotional interactions with the outer world and give them to inner worlds of divine beauty in meditation and prayer.

One paradox with so called negative emotions, is that more energy is produced by validating and expressing them safely than by stuffing, avoiding or controlling them.

In this case energy is generated by expending emotions through flowing in safe and loving ways.

Flowing, healing and change are the nature of the emotional plane.

A key to storing vitality is to hold back on one-tenth of all impulses to act.

Every time an impulse to do something is stopped, the vital energy and chemicals in the bloodstream that are generated to do it are stored for future use.

This stored energy builds and builds until there is enough for any emergency.

This practice of controlling impulses builds mastery.

Examples of doing this are as simple and fun as stopping the impulse to get up from a chair or the impulse to speak one tenth of the times that you have them.

On the plane of matter and form, the way to store energy is to live modestly and simply so that upkeep of material possessions is not overwhelming and draining.

Listen to inner guidance so that you save enough necessary supplies in cycles of abundance to withstand cycles of scarcity.

Share one tenth of material supplies in charity in a way that bears good fruit.

Give unto awareness of pure Divine Being one tenth of your time and energy.

Scientist say that the brain becomes tired after 54 minutes of focused

concentration.

Fifty four minutes of interaction focusing on the outer world can be balanced by six minutes every hour spent in inward focus.

**If you are focusing on the inner world primarily,
then the opposite is true.**

**Spend 54 minutes in inner concentration and 6 minutes refreshing
yourself on the beauty of the outer world.**

**One tenth of each hour spent in balancing flow of focus helps create the
state of consciousness
that manifests Heaven on Earth both in the micro- and macrocosm.**

***Skills such as these are important to the health and the
survival of all beings on all levels.***

MIRACLES

**Meditate on the divine virtues of the letters of our name, and calling on
our help,

Footnotes

The names and meaning of angel groups come from Quaballah, which is a very ancient set of teachings

which together form a common precursor, or root, of three of the world's religions: Judaism, Islam, and Christianity.

Each degree of the zodiac is ruled by a high being of the heavenly host in the zone girdling the earth, and the angels who work with him or her.

The being and the angels share the same name.

This name is a key to their powers and influence.

Names, phrases, and sections, in the angel messages are quoted or paraphrased from the books of Franz Bardon.

Information of the heavenly hosts of the zone girdling the earth is referenced from

THE PRACTICE OF MAGICAL EVOCATION, ISBN 3-921338-02-6,
and Information of the divine virtues and the letters are referenced from THE KEY TO THE TRUE
QUABALLAH, ISBN 3-921338-12-4].

Publisher is Dieter Rüggeberg, Wuppertal/W. Germany.
These books have very important information for these studies.

The book "Initiation into Hermetics" ISBN 3-921338-01-8, is a preparatory book for the others.
Franz Bardon's last autobiographical book, "Frabato the Magician",
gives historical background and was compiled by his German publisher from notes written by Franz
Bardon.

To understand Universal Consciousness, and immortality, it is very helpful to read The Life and Teachings of the Masters of The
Far East by Baird Spalding

The first three volumes are field notes taken on a scientific expedition to Nepal in the late 1800's.

The Law of One is the original law of Creation, and is the supreme Law over all laws in all
dimensions.

THE LAW OF ONE

We are all one.
When one is harmed, all are harmed.
When one is helped, all are healed.
Therefore, in the name of who I AM, and I am one with all there is;
I ask that ONLY THE HIGHEST GOOD OF ALL CONCERNED happen .
I give thanks that this is done.

SO BE IT!
So it is.
