## The Angels of The Cosmic Language

The Angels of

## Hatuny

Beloved,

**Children are born with innate understanding that reality can be magically, or miraculously, changed.**

**That is why children of all ages, including the inner child self of adults, love fairy tales and spiritual stories about people with supernatural powers that change fate for the better, to bring about supreme happiness for all.**

**In the cycles of life, for those consciously on the spiritual path, we inspire books, movies, and songs that present preparatory concepts for creating new realities.**

**Finally, with enough spiritual maturity, the good news of using The Cosmic Language with whole brain awareness becomes known, so that nothing is impossible.**

**A person who requires greater maturity, equilibrium and character, is carefully guided through preparation and growth; otherwise, harm could occur.**

**As proper maturity is gained, talented and gifted children of all ages are inspired and helped to use The Language of Light as a means of**

**joining individual consciousness with Divine Consciousness  
to manifest Heaven on Earth, in any and all situations where inner  
guidance so directs.**

**According to each persons degree of maturity and equilibrium,  
we inspire the realization of the meditations of the cosmic language,  
and  
carefully guide and protect as the powers of the divine virtues are  
brought through.**

**The cosmic language is a whole brain language.**

**To speak the cosmic language, all four brainwaves are used  
simultaneously to produce a complete  
multidimensional sine wave that manifests divine virtues on four planes  
of being-will, thoughts, emotions, and sensations.**

**Divine virtues are thereby first produced in the microcosm of the inner  
world during meditation and then,  
with the breath, visualized as entering the macrocosm of the outer  
world.**

**This means they are produced in a  
persons own being-will, mind, emotions, and sensations and then  
enlivened in the outer universe.**

**The use of the cosmic language in World Service is a way that a person  
walks in the footsteps of the masters.**

**All that I do, ye shall do and more.**

**Each letter represents a divine virtue and has a color, a meaning,  
emotions, the sound of its letter , a musical tone, a sensation, and a part  
of the body temple that was created by it.**

**The most important part of meditation on a divine virtue is to go into a  
state of pure being and unity  
with Divine Being and all creation.**

**This is done in a deep Delta brainwave state that corresponds to the  
consciousness of a tiny infant  
or deep dreamless sleep.**

**In this state, Divine Mind is accessed  
and a person enlivens a divine virtue through its color, through**

visualizing its light.

In addition to this, the idea of a virtue is contemplated in the Theta brainwave state of deep inner thought.

Then, in the alpha state of flowing emotions, the virtue is felt.

These divine emotions are empowered by toning the letter to its proper musical note, inwardly or outwardly.

Find a musical instrument so that you can play each note as you study the letters.

Take your time. We are helping you every step of the way.

Emotions express on sound, which is why it is important in meditation to combine the emotions of the divine virtue with the sound of its letter in the musical note that belongs to it.

As you have learned through exercises such as The Tibetan Exercise of Paradox, that which is visualized, contemplated, felt and sensed in the imagination should seem very real.

The visualized light, concepts, emotions and sensations of each divine virtue is practiced in the whole body, then in the elemental region, and then in the organ that is made from it.

The elemental regions are:

All fire letters are to be imagined shining as tiny powerful suns in their respective colors, creating the sensation of warmth and expansion *in the head region*, which is imagined as an infinite space.

All air letters are imagined as shining tiny suns in their respective colors, creating the sensation of ease and relaxation, *in the area of the lungs*.

All water letters are imagined as shining tiny suns in their respective colors, creating coolness turning into chill, *in the abdomen seen as a hollow space*.

All earth letters\*are imagined as shining tiny suns in their respective colors, creating weight, *in the leg region*.

For example, with the letter A, which is pronounced as a soft A, as in ahhh, vividly imagine a bright light blue sun in the lung region, shining first throughout the whole body, then in the lung area, creating a sensation of ease and relaxation.

Contemplate infinite wisdom and enlightenment. Next, flow with emotions of wisdom and enlightenment and hum AHHHH in the musical note of G to enliven these emotions.

To enliven these emotions in the astral body, humm inwardly, to enliven them in the physical world, humm this out loud.

With the out breath, imagine the light blue light of wisdom and enlightenment passing through the pores of the skin over the lungs to the outer world, according to inner guidance.

You may imagine it in a place, in an object, or anywhere, including the entire universe.

Then, with the in breath, see this light blue light coming back in to fill whatever inner guidance directs. This may be the lungs, or even all of inner space.

**Keep the rhythm of the breath natural, and be sure to dissolve the light in the body when the meditation is over so that the elemental balance of the body is not over stimulated in any area or put out of balance.**

**A most important aspect of meditation is attunement to the meaning of the divine virtue itself, which in the case of letter A, soft A, is infinite wisdom and enlightenment, the purity of all original ideas in divine mind. The more time that is spent on attunement in deep inward thought, the better.**

**With practice, the sun in the light blue color shining in the lungs, the meaning, the emotions and the ahhh sound in the key of G along with the sensations of ease, pop into mind automatically whenever you wish to manifest wisdom and enlightenment.**

**This ease is made possible because the mechanical part of the brain learns to do things automatically without thinking, like typing, driving, or walking.**

**The mechanical brain even learns to do the meditations on the divine virtues and their letters effortlessly and expertly over time.**

**With each practice session, identification with infinite wisdom with its four level aspects of being-will, mind, emotions, and sensations deepens until eventually the spirit, mind, emotions, and body are permanently bonded and united with this Divine Virtue.**

**Whenever this virtue is desired in oneself, or another, or the universe, it is easily produced in this whole brain manner with the breath.**

**As this happens, the letter A is 'mastered'.**

**In truth the depth of union with the virtue of Divine Wisdom and Enlightenment of letter A increases to infinity.**

**We continually inspire this process of expansion.**

**The next step in the cosmic language is to master umlaut A, ae, then letter B, and then C, and so forth through the entire alphabet.**

**Since the same skills and brainwaves apply equally to all the letters, once the first letter is mastered, all the others are mastered more easily.**

**Remember, skill increases so that every time a letter and its divine virtue is desired, the mind automatically attunes to it.**

**This is a level of Divine bliss and ecstasy that continually stimulates the endocrine system to produce chemicals that prevent aging and bring eternal youth.**

**In such a way, the power to produce miracles is attained.**

**Master single letters first, then join two or three together or more.**

**Two or more letters joined together form a mantra of great power.**

**For instance, suppose you join the letters A and H.**

**First you would meditate on the light blue sun shining in the lungs.**

**Contemplate infinite wisdom filling all of inner and outer space with flowing emotions of enlightenment, with a sense of ease.**

**Make the soft ahhh sound in the key of G.**

**After that you meditate on a silvery violet sun in the head region filling all of inner and outer space, with emphasis on the mental level, with the Power of the Word, the flowing emotions of this power, and the sensations of warmth and expansion.**

**Make the tone of letter H in the key of A.**

**The practical consequence of this letter combination is the influence of divine intuition, on oneself and on others.**

**In particular, frightened people who think themselves surrounded by enemies and are therefore oppressed and haunted, may be cured and freed by the application of these two letters.**

**Also, people who believe that they are being wronged may be enlightened by this energy so that they will realize a higher wisdom and purpose behind everything that has happened.**

**With practice, letters can be added together to form whole words.**

**As you progress, we inspire you with powerful letter combinations that create the miracles to manifest the deepest desires of your heart in alignment with inner guidance from Divine Providence.**

**Do not be afraid but rejoice, this is your destiny as a Child of The Divine, a Child who is made in the image of the Creator.**

The names of the heavenly hosts, when used this way, help a Child of Light to merge individual consciousness with the consciousness of the heavenly hosts.

**The names and meaning of angel groups come from Quaballah, which is a very ancient set of teachings which together form a common precursor, or root, of three of the world's religions: Judaism, Islam, and Christianity.**

**Each degree of the zodiac is ruled by a high being of the heavenly host in the zone girdling the earth, and the angels who work with him or her.**

**The being and the angels share the same name.**

**This name is a key to their powers and influence.**

**Names, phrases, and sections, in the angel messages are quoted or paraphrased from the books of Franz Bardon.**
