

Hermetic Angel Messages

PDF version

19 degrees Sagittarius

The Angels of Astronomy

Also known as

The Angels of

Caboneton

Beloved,

**We inspire the understanding that Nature is manifest thoughts of
Divine Being.**

Through nature we read The Book of Life as living symbols.

The Web of Life pulses within cycles and rhythms large and small.

Cycles and rhythms are heartbeats of Divine Being.

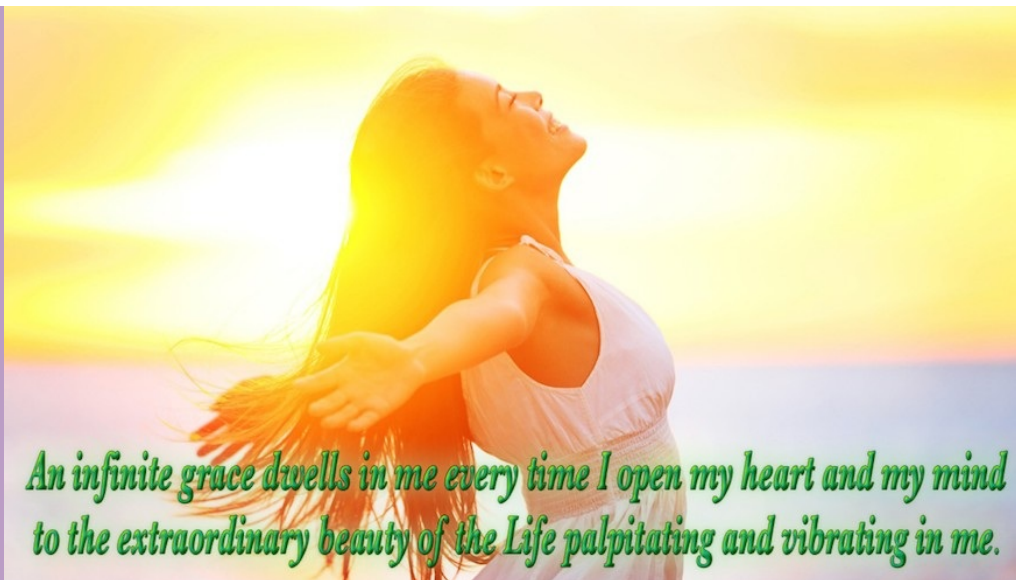

**The mysteries of Divine Cycles
are written in the movements of the lights of
the heavens.**

**Within the Children of Light are cycles that echo the
cycles of the stars.**

**A human being, made in the image and likeness of God,
can be imagined as
a fractal of Divine Being, just as an atom looks like a
solar system.**

**Therefore, as you can see, by understanding the
physicality of the large fractal,
the macrocosm,
a person better understands the physicality of the self,
the microcosm.**

An infinite grace dwells in me every time I open my heart and my mind to the extraordinary beauty of the Life palpitating and vibrating in me.

Manifest physical planets, stars, and celestial lights are physical incarnations and frequencies of awareness, of Divine Ideas and Qualities.

This is the meaning of the letter C of Caboneton.

These ideas are the 'as above, so below'.

By studying and attuning to these celestial physical embodiments of Divine Qualities and Ideas, a Child of Light becomes wise and enlightened and better understands the original purity of all ideas in Divine Mind.

Enlightenment and wisdom is the meaning of the letter A.

**A is the Alpha in the phrase,
The Alpha and the Omega,
the beginning and the end.**

Both the divine virtues of the Alpha and the Omega are in our name and have two aspects each.

**The first aspect of The Alpha is enlightenment, A, soft A as in
ahhhhh,
the original divine mind,
and the second aspect is umlaut A, ae,
recognizing and releasing for change into other states that are the
highest good,
any imperfections
on any level.**

In this way limiting ideas of imperfection are recognized and gladly released, let go, sent back to Divine Being for changes into other states, that better reflect the perfection of Divine Being.

This is the virtue of umlaut A, ae, the divine virtue of the mysteries of life and death and transformation.

**The first aspect of Omega, umlaut O, oe, is high cognition brought about by seeing through the eyes of love.
By seeing through the eyes of love, the original divine blueprints in whatever is looked upon are seen,**

and in seeing, they now manifest fully in physical reality.

**The Alpha and The Omega, knowing the original blueprints of
creation
and recognizing and leasing all imperfect blueprints
for transmutation into whatever love sees as the highest good of all.**

**As you can see, the second aspect of Omega , O, is justice and
harmony for all.**

**The Alpha and the Omega, manifesting on all levels of density, fire,
air, water, and earth,
as an electro magnetic expanding spiraling vortex,
guides the movement of all creation,
from the infinitely small to the infinitely large.**

**The vast numbers of celestial embodiments exemplify Universal
Life.**

They demonstrate the infinite polarities that make up Creation.

**Universal life and polarity is the meaning of divine virtue of letter B
of our name.**

**Mastering the divine virtue of meditating on Universal Life and
Polarity gives understanding of polarity
and results in control over electro-magnetism,
or will and emotion, which is mastery over life itself.**

**All physical forms have corresponding astral, or emotional forms of
the element of water,
causal, or mental forms of the element of air,
and spiritual forms, or forms of fiery will.**

**All individual self aware forms in the outer worlds are actually part
of one Self, one unified field of indwelling consciousness,
just as all seventy two trillion self aware cells in a human body are
part of one self, one indwelling consciousness.**

When one is harmed, all are harmed.

When one is helped, all are helped.

**The cognition brought about by Love Divine,
based on awareness and experience of unity of individual self with
all other individual selves,
the virtue of umlaut O, eu, of Caboneton,
enables a person to see through the eyes of love,
and both receive powerful initiations from,
as well as create transmutations of,
starry celestial beings.**

**Human beings, made in the image and likeness of Divine Being,
are the only mammals who have whites of the eyes.**

**Light enters the pupil, and light is emitted from the white area
surrounding it.**

"As above, so below."

Just as light is emitted from the whites of the physical eye, so is light, or information codes called light waves, emitted from the astral, causal, and spiritual bodies.

This is the ancient science of Darshan, the gaze of the master. In ancient teachings it is said that receiving one glance, from the gaze of an enlightened son or daughter of Divine Being, guarantees enlightenment in the present lifetime.

Seeing through the eyes of love and awakening indwelling divine perfection causes transmutation into the Alpha, the original divine blueprints, and this becomes The Omega.

That is why the second aspect of The Omega is harmony, which is the true essence of justice, the virtue of O.

Like breathing, divine interaction between micro and macrocosm, between a Child of Light and the Heavens, creates flowing emotions of Supreme Happiness.

Supreme happiness causes cohesion in matter, similar to gravity, and is the virtue of letter N.

E, the virtue of omnipresence, opens up communication with all creation.

Through this virtue a person experiences unity with all of the celestial lights and therefore understands their unique purposes, meanings and messages.

Then high inspiration aligns spirit, will, thought, emotions and sensations to these messages, so that genius is awakened.

High inspiration is the virtue of letter T.

Through cognition brought about by Love Divine, the second O in our name, a person then sees deeper and deeper levels in the perfection and meaning in the stars and spheres.

Celestial bodies are seen as intelligences, they are the material bodies of great beings.

Understanding The Laws of the Divine expressed in nature, understanding Harmony manifesting in celestial bodies, ever awakens, so that both physics and metaphysics are mastered.

The harmonic laws that govern the rhythms and cycles of Celestial Bodies are the same laws that govern the rhythms and cycles of life within incarnated sons or daughters of God.

Mastery of Divine Justice and Harmony ever deepens, and is the second aspect of the Omega, the second virtue of O.

Supreme Happiness, the last letter of Caboneton, is the virtue that governs the drive for self-preservation, and gives complete control over all beings in the emotional worlds.

It also gives mastery over the power of coherence in all material bodies.

Meditating on these virtues provides keys to Divine understanding and mastery of astronomy.

Remember that the body of each person is a microcosm of the macrocosm, a fractal or reflection of the Unified Field of Consciousness and Being.

“Ye are made in the image and likeness of The Divine Being.”

“As above, so below.”

In the womb, the cranium of the developing child is surrounded by a protective envelope of water and emotions, a magnetic field that insulates it from outside influences.

At the proper time in the cycle of incarnation the water breaks, and at the moment of birth when the cranium crowns, the soft tissue of the brain is bombarded by astral and physical waves of information energy from Celestial Bodies of the Universe.

These waves of energy imprint a unique algorithm of information from the stars AT THAT MOMENT on the cells, glands and neuro-circuits of the body and brain, in the same way a film imprints an image when it is first exposed to the light.

This image is the natal astrological chart of each Child of Light.

Remember to round up degrees, for example, if the sun is at 22.25 degrees Cancer, the sun has traversed through the entire 22nd degree, which are the heavenly host of divine emanation, and is already 25 minutes into the 23rd degree, which are the heavenly hosts of space and time.

The interpretation of these astronomical and astrological influences forms a body of knowledge that is the most ancient documented science on Earth.

The three wise men used astronomy and astrology in their journey to find the newly born Messiah.

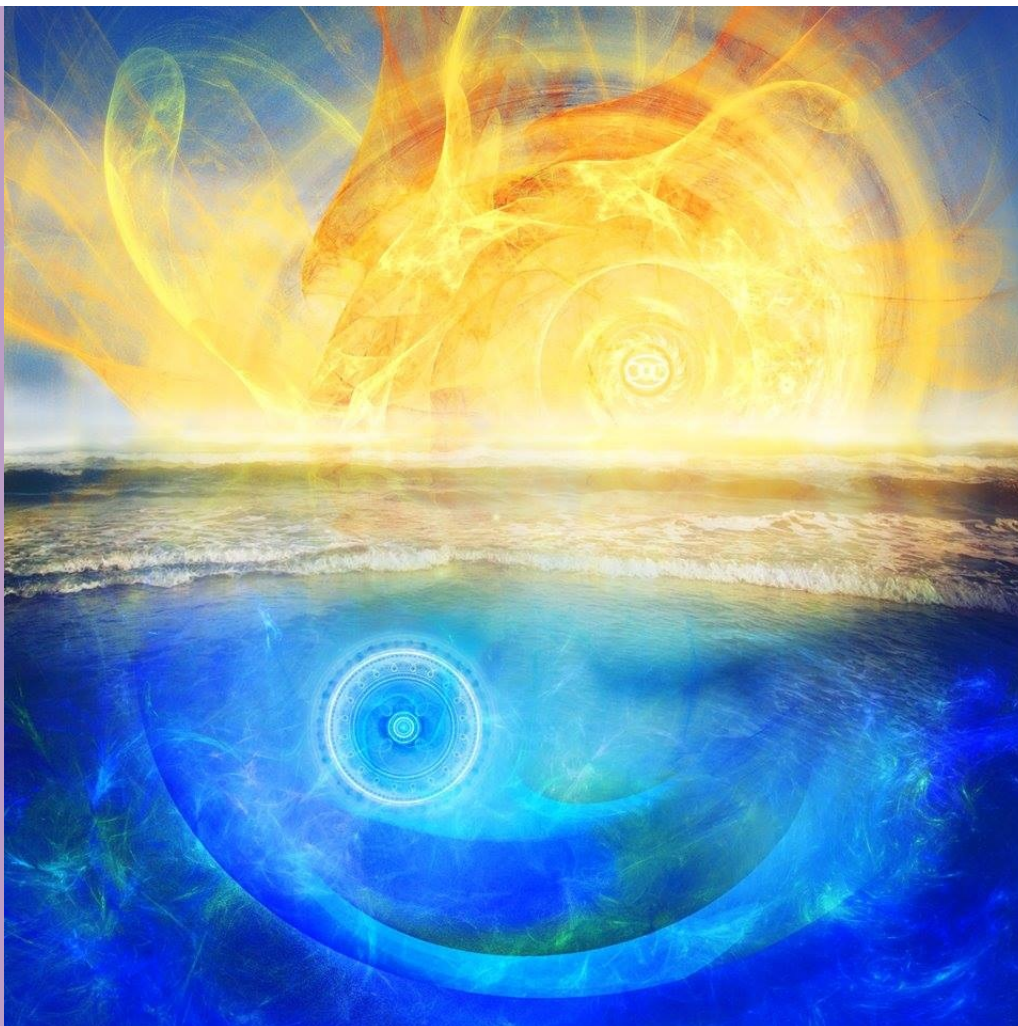

We inspire mankind to learn astronomy, astrology and all affiliated sciences.

We explain to mankind in detail the synthesis of astronomy and astrology.

We help you know the visible part of the universe and the influences and effects of the constellations on the earth, on the fate of individuals, and on the fate of whole nations.

“As above, so below”.

“As within, so without”.

We guide you to teachers and information that is appropriate for your stage of maturity.

**By understanding the correlations between the macro and the microcosm,
the birth chart takes on great importance
in understanding
one's purpose for taking on incarnation.**

**By understanding the rhythms and cycles of manifestation,
it is possible to put this soul purpose into better perspective within
the great context of the One Being.**

**For example here is a brief overview of some relative information
about cycles of time in astronomy,
and the correlation between physical movements of celestial bodies
and the activities of divine qualities:**

An Age on the earth changes approximately every 2160 years.

This phenomenon is known as precession.

**Precession is based on the pointing of the earth's North Pole
relative to the zodiacal belt.**

**The zodiacal belt is related to the earth's astral, or emotional,
vehicle and its positions are fixed.**

**It takes 25,868 years for the equinoxes to precess through one
complete zodiacal revolution.**

This precession is due to the galactic rotation of the sun which

causes
the positions of the stars to appear to move back one degree of
longitude approximately every 72 years.

The exact time is 71.8556 years. $71.8556 \text{ years per degree} \times 360$
degrees = 25,868 years.

This is known as the Great Year.

Each Age is known as a Great Month (71.8556×30 degrees per
year) or 2,155.668 years which one twelfth of the Great Year.

The direction of Earth's North Pole has now ended its era in Pisces
and
is in its placement in the direction of the zodiacal sign of Aquarius.

There are three basic qualities of divine consciousness.

They are love, will, and wisdom.

There are four constellations of love, four of wisdom, and four of
will.

The four of love are Aries, Libra, Scorpio, and Taurus.

The four of will are Leo, Aquarius, Cancer, and Capricorn.

The four of wisdom, which is the conjoining of love and will
together,
are Sagittarius, Gemini, Pisces, and Virgo.

There are three stages of love, wisdom, and will.
They are beginning, middle, and end.

The middle stage is referred to as fixed.

The four living creatures before the throne of God in scripture
represent the four zodiacal constellations,

that are FIXED qualities.

They are:

Taurus the Bull, Divine LOVE in Form. Earth.

Signifies sensations, memory, and logic about ideals, the Beta
brainwave state.
that grounds physical loving experience into physical form, and
therefore represents
the sacred physical earthly manifestation of possessions etc.

Taurus is the magnetic physical results attracted into form by the
less dense level
of flowing feminine, emotional feelings of Divine Love, the next
living creature before the throne,
Scorpio, which is water.

Scorpio, the Scorpion, the Eagle, and the Phoenix, is Divine LOVE in
Emotion.

Signifies the 10 magical powers, which are powers of transmutation.

This is feminine, emotional, flowing changing, life giving magnetic energy.

The emotion of flowing divine love connects will and mind with form.

Love conquers all.

**The next living creature before the throne,
Aquarius, the Water Bearer, Air, Divine WILL expressing through
the inner Mind,
the theta state of deep inner thought,
signifies genius and enlightenment
concerning the original purity of all ideas in Divine Mind.**

**Aquarius joins sovereign individuals, sharing common awareness of
purity of divine thought,
together as friends, out picturing ideals of divine harmony for
everyone.**

Divine Will is masculine, creative, or electric in nature.

**The mind, which is the element of air, is the bridge between
masculine creative energy
and the feminine magnetic emotional energy, that which attracts
physical reality into being.**

**Leo the Lion, Fire, the next living creature before the throne,
is Omnipotent Divine WILL in Spirit
and signifies the beingness and fiery indwelling spirit and will of
the inner the Divine Infant Self.**

**This is the part of the self that produces Delta brainwaves each
night in deep dreamless sleep,
as well as in infancy,
and also deep meditation of pure beingness and oneness
with the omnipresent, omnipotent, and omniscient Divine Being.**

**By going deep within, and connecting to pure being that is one with
all,
and forming visual images in the imagination, combined with
beautiful flowing emotions corresponding to what is visualized,
a person masters the third eye, the pineal gland,
which produces over 20,000 psychoactive chemicals that are a
thousand times
stronger than psychoactive chemicals from other sources.**

"Keep your eye single and the body shall be filled with light."

**When looking at the celestial bodies, both receiving informational
light waves that become light particles
in the pineal gland, and sending informational light waves that are
received by the celestial bodies,
the saying that:**

"God is love, the lover, and the beloved, all at once." becomes plain.

**The Solar System is now entering the vibratory influence of
Aquarius.**

Two of these four fixed signs, Taurus and Scorpio, are expressions of feminine magnetic Divine Love through Pluto, and the other two, Leo and Aquarius, are expressions of the masculine electric Divine Will through Uranus.

The uniting of Love and Will gives birth to Wisdom, which is the expression of Neptune.

The constellation of Sagittarius, deep delta brainwaves of will to wisdom, fire, channels vibrations of Divine Wisdom coming through Neptune, along with the constellations of Gemini, air, Pisces, water, and Virgo, earth.

At sunset on December 21, 2012, according to the gregorian calendar, the setting sun exactly conjuncted Galactic Center, which is known as the Eye of Buddha or Central Sun, at approximately 27 degrees Sagittarius.

The winter solstice is the beginning of the new solar year, and this perfect conjunction of the moment of winter solstice and galactic center happens only once every 25,868 years.

THIS DATE IS THE END OF THE MAYAN SUN CALENDAR.

The end of the Mayan Sun Calendar is said to be THE BEGINNING OF HEAVEN ON EARTH.

The Mayans referred to it a The Age of Flowers.

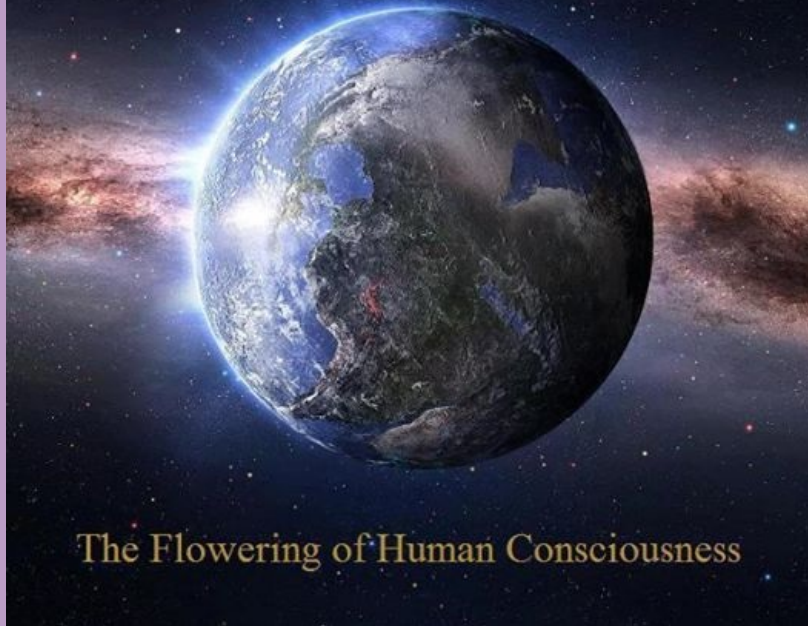

There is a transition period from the end of the calendar for the manifestation of heaven on earth to fully materialize.

According to some scientists, earth's solar system, a part of a small galaxy called The Sagittarius Dwarf, orbited perpendicular to the Milky Way Galaxy until recently, when, due to the stronger gravitational field of the Milky Way Galaxy,

our small galaxy was pulled horizontally into one of the spiraling arms of the Milky Way.

The end of the Mayan Sun Calendar signifies the arrival of the solar system at a very strong point within the Milky Way Galaxy.

New Earth

The Flowering of Human Consciousness

**The Milky Way, along with many many other galaxies and clusters of galaxies,
are all traveling toward a point called The Great Attractor, at 15 Sagittarius,
the place of Divine Education.**

**The combined power of the Solar Sun,
which is a step-down transformer of the Central Sun,
and the Central Sun,
at the exact same degree of 27 degrees Sagittarius,
[heavenly hosts of miraculous powers],
in the Age of Aquarius,
ushers in a new 2000 year cycle that is in mental resonance with
Divine Will for Heaven on Earth.**

**The Galaxies that contain our solar system, and central sun that is
the Eye of Buddha,
orbit around what is called The Super Galactic Center, which is
known as The Eye of God,
at 1 degree and 47 minutes Libra, the heavenly hosts of metal
working.**

**Metals are sacred. They flow like a liquid when heated, and make
strong forms when cooled.**

**Our desires and thoughts also flow, and as they turn into emotions,
they attract solid realities into form on the material plane,
out of the field of infinite potential of the quantum field.**

**This is why our desires and thoughts are so important to keep
focused inwardly
to seek always the kingdom of heaven within.**

**The center of the human brain is called the Cave of Brahman,
and within that is a small gland, the pineal, called the third eye, or
The Eye of God.**

**This gland is the master gland of the entire body.
It has over 20,000 psychoactive chemicals within it,
that are a thousand times stronger than any psychoactive**

chemicals found in the outer worlds.

Whatever you desire and visualize in your inward meditation stimulates this gland.

This is why there has been such a battle over our attention, and our imaginations.

Any points on your astrology chart which aspect either The Central Sun or the Super Galactic Center indicates how your Personal Purpose may be interacting in very specific ways with Galactic and/or Universal Purpose.

Major asteroids, transpluto planets, stars and other significant points are important in this respect.

MIRACLES

Note:

Katamanuna may be a more accurate spelling for the ancient Japanese word in yesterday's message.

It reads as follows:

***Katamanuna* is an ancient word in Japan that translates as the following wisdom:**

**KATA I stand in the visible world,
MANU facing the invisible essence from which it comes,
NA naming the next manifestation to arise in the visible world
for the highest good of all.**

Footnotes

The names and meaning of angel groups come from Quaballah, which is a very ancient set of teachings

which together form a common precursor, or root, of three of the world's religions:

Judaism, Islam, and Christianity.

Each degree of the zodiac is ruled by a high being of the heavenly host in the zone girdling the earth, and the angels who work with him or her.

**The being and the angels share the same name.
This name is a key to their powers and influence.**

Names, phrases, and sections, in the angel messages are quoted or paraphrased from the books of Franz Bardon.

Information of the heavenly hosts of the zone girdling the earth is referenced from THE PRACTICE OF MAGICAL EVOCATION,

ISBN 3-921338-02-6, and Information of the divine virtues and the letters are referenced from THE KEY TO THE TRUE QUABALLAH, ISBN 3-921338-12-4].

Publisher is Dieter Rüggeberg, Wuppertal/W. Germany.

These books have very important information for these studies.

The book "Initiation into Hermetics" ISBN 3-921338-01-8, is a preparatory book for the others. Franz Bardon's last autobiographical book, "Frabato the Magician", gives historical background and was compiled by his German publisher from notes written by Franz Bardon.

**TheLaw of One is the original law of Creation,
and is the supreme Law over all laws in all dimensions.**

THELAW OF ONE

**We are all one.
When one is harmed, all are harmed.
When one is helped, all are helped.
Therefore, in the name of who I AM, and I am one with all there is;
I ask that ONLY THEHIGHEST GOOD OF ALL CONCERNED happen .
I give thanks that this is done.**

SO BE IT!
