7 degrees Pisces

The Angels of Education

Also known as

The Angels of

Atherom

We govern the culmination of learning, science, research, and education.

We bring good luck and success in any field of intellectual endeavor.

We help people get the material they need for their studies,
and if they wish it,
make them literally omniscient in any field of study or science.

The heavenly hosts of Pisces,
the wisdom of the heart,
inspire mankind to live successfully
in all of the departments of life
represented by the twelve constellations.

Each person is already made in the image of Divine Being,
just as an acorn has the code for an entire oak tree
already present within it.

Go within.
Find the unique infant self of pure being and oneness with
all.
Find the dreams and wishes of what this pure self wishes
to experience in life.

Find the magical child self that visualizes these wishes
happening
in vivid and trusting deep inner innocence.

Find the divine adolescent self who flows with
tangible feelings of the wonderful emotions
of these wishes fulfilling themselves.

Find the adult divine self,
that experiences the sensations, the memories, the logic,
the conscience
that awakens through manifesting these wishes.

Awaken within yourself awareness of divine qualities
through meditation,
so that your divine identity is revealed to you in its
entirety.

It is within our power to reveal all secrets.

Beloved, remember that the constellation of Pisces is the last constellation of the astrological cycle.

After this comes the beginning of another cycle, another springtime.

Pisces is the culmination of the lessons and divine virtues of all of the heavenly hosts of the 360 degrees of the zodiac, and therefore represents the final outcome of living a life of Divine Consciousness.

The flowing tangible feelings in the body of emotions of Pisces are the result of the feelings and emotions of omnipotence and divine love together, making a scalar wave.

A scalar wave is a caduceus, a clockwise and counterclockwise spiral together, it is electro-magnetic energy that creates and receives so that it is a conduit for manifestation.

A scalar wave starts when a person joins the will and thoughts and creativity of the head with divine sensations of physical reality, relationships, and emotions in the body together in the loving heart.

"Love conquers all."

This is the 'middle path' of enlightenment that joins together heaven and earth.

The key to excelling in any field of knowledge can be enhanced by having an open heart and meditating with all four brainwaves on the divine virtues of the letters of our name, Atherom.

Any field of inquiry opens up and genius is achieved.

With moderate whole brain practice, the divine virtues take on reality automatically whenever you so desire.

It does so because the mechanical part of the brain learns to take over functions of doing repetitive skills

Examples of this are typing, driving, speaking, and walking etc.

The mechanical mind learns to do this without effort.

With each practice session, identification with the divine virtues deepens until eventually the spirit, mind, emotions, and body are permanently bonded with these Divine Qualities.

I and the Father are One.

**Meditate on understanding the phrase:
"As above, so below." And "As within, so without."**

Then whenever you meditate on any of the divine virtues as within you, you will understand how it is possible to be filling all of space outside of you with the out breath.

**The opposite is also true,
when you imagine all of outer space filled,
then with the in breath your inner body can be filled as well.**

Since the same skills and brainwaves apply equally to all the divine virtues, once the first letter is mastered, all the others are relatively easy.

**At some point, skill increases so that every time a letter is spoken or heard,
or a color is seen or imagined, or a musical note is heard, or a sensation is perceived, the consciousness easily identifies with Divine Consciousness and qualities.**

The endocrine and other systems in the body in this way respond to produce organic chemicals that prevent aging and manifest seeming miracles.

This is a level of Divine power, enlightenment, love, and youthful immortality.

**Master the single letters first, then join more together to invoke specific combinations of divine virtues when certain effects are desired in the material world,
or to become one in consciousness with the heavenly hosts.**

The names of the angels, when used in this way, can manifest their full presence and power.

HOW TO MEDITATE ON THE DIVINE VIRTUES

**Each letter has a color, a meaning, emotions, a sound, a musical note, a sensation,
and a part of the body temple that was created by it.**

Meditating is done on four levels of awareness.

It is done with pure being united with Divine Being and all creation

**and strong will- Delta brainwaves
with visualization, concentration on deep inner thought
and
concepts- Theta brainwaves,
flowing divine emotions- Alpha brainwaves,
and memory, logic, and five sense perception- Beta brainwaves.**

**These four brainwave patterns develop naturally from the moment of
conception on,
and therefore, the deeper ones are energized through
reclaiming and identifying your present self with your younger selves of
the past.**

**Delta becomes dominant in the period from conception through infancy.
Theta is dominant through childhood.
Alpha is dominant in adolescence.**

Beta is dominant from puberty on.

**The idea is to visualize the color of the divine virtue from a deep
Delta state of pure being and unity with Divine Being and all creation.**

**This is the most important step, and corresponds to the eye and
omnipotent will for the highest good of all.**

It corresponds to the infant state.

Ye must be as little children to enter the kingdom of heaven.

**Next contemplate deeply on the meanings of the divine virtue, which
occur in Theta brainwaves of deep inner thought.
This deep inner thought corresponds to the state of being a little child.**

**Next feel the emotions of the divine virtue,
which occurs in the Alpha brainwaves of feelings and flowing.**

This emotional flowing was dominant when you were an adolescent.

Remember how you felt emotions so strongly in this time of your life.

**As you flow with these divine emotions,
when you speak the letter,
tone it to the musical note of the divine virtue
AND FEEL EMOTIONS FLOWING WITH THE SOUND.**

**This can be done inwardly
in the imagination, when meditating, to activate the virtue on the astral
plane
or out loud for purposes of blessing the physical plane.**

Finally, imagine the sensation of the divine virtue.

The sensation is determined by its element.

**Fire is expansion and heat,
air is ease,
water is chill,
and earth is weight.**

**This activates the Beta brainwave of the five senses, memory and logic
of the adult self.**

**When you first begin this procedure,
go into your imagination and see
your infinite pure being that is one with Divine Being
and all creation
become located in time and space as a tiny dot in your own solar**

plexus.

The solar plexus is the region of the akashic element of consciousness-penetrating-all.

Visualize the color of the divine virtue shining from a tiny sun in the region of its element and filling the entire region.

Meditate on the meanings of the divine virtue.

Flow with the emotions of the divine virtue with its musical note.

Then imagine the sensation of the divine virtues element.

Take this meditation and impregnate the organ that corresponds to the virtue, or even the entire body or whatever inner guidance so directs at the time.

With the out breath see this radiance passing through the pores of the skin over the virtues organ and filling something in the outer universe according to inner guidance.

With the in breath see this radiance coming back into the body through these same pores.

Keep the rhythm of the breath natural at all times, and dissolve the light in the body when you are finished, so that the elements of the body do not become over stimulated or out of balance.

Here is a description of the five elements with their meaning, sensation and body regions.

THE FIVE ELEMENTS

The Akasha element is the pre-matter of all creation.

It has the sensation of consciousness-penetrating-all, and is everywhere.

The region corresponding to this element is located in the midriff region.

The Fire element is will and electricity.

It has the sensation of warmth and expansion, and is located in the head region.

Electric power is increased through aligning individual will with Divine Will for the highest good of all concerned.

Will activates Delta brainwaves of Pure Being.

The Air element is mind and thought.

It has the sensation of ease and relaxation and is located in the lung area.

The Water element is magnetism, feeling, emotion, psychic sensitivity, flowing, fluidity and change.

It has the sensation of coolness, which turns to chill.

It is located in the abdomen, seen as a hollow space.

Magnetic power is increased through aligning individual emotions with Divine Emotions.

This is flowing Alpha brainwaves of emotion.

Emotion and magnetism attracts realities into physical expression.

Divine Emotions attract Paradise, and Heaven on Earth.

The Earth element is physical form.

It has the sensation of weight and is located in the leg region.

As long as you persist in your meditations, the heavenly hosts will not fail when you ask for help.

"Ask and ye shall receive."

"Knock and it shall be opened unto you."

Footnotes

The names and meaning of angel groups come from Quaballah, which is a very ancient set of teachings which together form a common precursor, or root, of three of the world's religions: Judaism, Islam, and Christianity.

Each degree of the zodiac is ruled by a high being of the heavenly host in the zone girdling the earth, and the angels who work with him or her.

The being and the angels share the same name. This name is a key to their powers and influence. Names, phrases, and sections, in the angel messages are quoted or paraphrased from the books of Franz Bardon.

Information of the heavenly hosts of the zone girdling the earth is referenced from THE PRACTICE OF MAGICAL EVOCATION, ISBN 3-921338-02-6, and Information of the divine virtues and the letters are referenced from THE KEY TO THE TRUE QUABALLAH, ISBN 3-921338-12-4].

Publisher is Dieter Rüggeberg, Wuppertal/W. Germany.

These books have very important information for these studies.

The book "Initiation into Hermetics" ISBN 3-921338-01-8, is a preparatory book for the others.

Franz Bardon's last autobiographical book, "Frabato the Magician", gives historical background and was compiled by his German publisher from notes written by Franz Bardon.

**The Law of One is the original law of Creation,
and is the supreme Law over all laws in all dimensions.**

THE LAW OF ONE

***We are all one.
When one is harmed, all are harmed.
When one is helped, all are helped.
Therefore, in the name of who I AM, and I am one with all there is;
I ask that ONLY THE HIGHEST GOOD OF ALL CONCERNED happen .
I give thanks that this is done.***

So it is!**
