The Angels of Divine Virtues

Also known as

**The Angels
of
*Cigila***

Beloved,

**We are now in the last few degrees of the
last sign of the Zodiac.**

**Pisces, which represents flowing emotions of divine
wisdom,
is the destination and the culmination of all of the
teachings
of love, wisdom, and power of the other eleven
signs.**

**As you can see from the previous messages,
these degrees represent increasingly
complete and total oneness with
omnipresent Divine Consciousness,
enlightenment
and**

Divine Illumination.

***Here, at the 28th degree of Pisces,
the heavenly hosts of Cigila
bestow knowledge of the***

spiritualization of matter in all planes.

Along with the spiritualization of matter in all planes

*comes the understanding and mastery of cause and
effect,
grace and mercy,
and all the divine virtues taken together and the
original purity of all ideas in Divine Mind.*

*By releasing imperfections for changes that are the
highest good on every level,
within the self and in the outer world,
control over negative beings is gained as well.*

*We are special initiators into magical mysticism,
the knowledge and mastery of the cosmic language*

.

*The cosmic language is composed of all the divine
virtues taken together, with each virtue having a
specific color,
sound, tone, sensation, meaning, and part of the body
that is made from it.*

*We make you acquainted with methods which enable
you to develop within yourself on all three planes
--the mental, the emotional, and the physical*

--

*the most perfect divine virtues by the help of the
meditation techniques of the cosmic language.*

*Having developed within yourself these virtues,
you will then find it easy to acquire all those faculties
which are connected to these virtues.*

*By following our methods and guidance, you will
become more and more mature
in fulfilling carefully certain tasks, according to the
will of Divine Providence.*

*We only reveal these methods to those who have
already reached a certain degree of maturity
in miracles and the cosmic language
during previous incarnations*

.

Many of you receiving these messages are qualified in this respect.

***According to the degree of maturity,
a person developed due to these methods is a
god-like creature,
a personified deity,
equipped with all the virtues, powers and
faculties,
(in the image) and equal to Divine Providence.***

***Remember it was taught:
"
All that I do ye shall do and more."***

"I and the Father are ONE."

HOW TO MEDITATE ON THE DIVINE VIRTUES

In studying the divine virtues of the cosmic language,

remember that each letter of the alphabet
corresponds to a unique virtue
and has a color, a meaning, emotions, a sound, a musical
note, a sensation,

and a part of the body temple that was created by it.

"Ye are made in the image and likeness of
God."

Meditating is done on four levels of awareness.

"The first level is done with pure being united with Divine
Being and all creation
and strong will- Delta brainwaves with visualization.

Next comes concentration on deep inner thought and
concepts- Theta brainwaves.

The third level is flowing divine emotions- Alpha
brainwaves.

The fourth level is memory, logic, and five sense perception-
Beta brainwaves.

These four brainwave patterns develop naturally from the
moment of conception on,
and therefore, the deeper ones are energized
through reclaiming and identifying your present self with
your younger selves of the past.

Delta becomes dominant in the period from conception
through infancy.

Theta is dominant through childhood.

Alpha is dominant in adolescence.

Beta is dominant from puberty on.

The idea is to identify with and visualize the color of a
divine virtue

from a deep Delta state of pure being and unity with Divine
Being and all creation.

This is the most important step, and corresponds to the eye
and omnipotent will for the highest good of all.

This corresponds to the infant state.

Ye must be as little children to enter the kingdom of heaven.

Next contemplate deeply on the meanings of the divine
virtue,

which occur in Theta brainwaves of deep inner thought.

This deep inner thought corresponds to the state of being
a little child.

Next feel the emotions of the divine virtue, which occurs in
the Alpha brainwaves of emotions and flowing.

This emotional flowing was dominant when you were an
adolescent.

Remember how you felt emotions so strongly in this time of
your life.

As you flow with divine emotions,
tone it to its musical note AND FEEL THE EMOTIONS
FLOWING WITH THE SOUND.

This can be done inwardly in the imagination, when
meditating, to activate the virtue on the astral plane
or out loud for purposes of blessing the physical plane.

Finally, imagine the sensation of the divine virtue.
The sensation is determined by its element.

This activates the Beta brainwave of the five senses,
memory and logic of the adult self.

When you first begin this procedure,
go into your imagination and see your infinite pure being
that is one with Divine Being and all creation
become located in time and space as a tiny dot in your own
solar plexus,
which is the region of the akashic element of consciousness-
penetrating-all.

Visualize the color of the divine virtue shining
from a tiny sun in the region of its element and filling the
entire region.
Akashic element virtues have the sensation of oneness with
all.
Fire element virtues have sensations of heat and expansion
and are located in the head.
Air element virtues have sensations of relaxation and ease
and are located in the lungs.
Water element virtues have sensations of chill and are
located in the abdomen.
Earth element virtues have sensations of weight and are
located in the legs.

Meditate on the meanings of the divine virtue.
Flow with the emotions of the divine virtue.

Then imagine the sensation of the divine virtues element.

Take this meditation and impregnate the organ that

corresponds to the virtue,

or even the entire body or whatever inner guidance so directs at the time.

With the out breath see this radiance passing through the pores of the skin over the virtues organ and filling something in the outer universe according to inner guidance.

With the in breath see this radiance coming back into the body through these same pores.

Keep the rhythm of the breath natural at all times, and dissolve the light in the body when you are finished so that the elements of the body do not become over stimulated or out of balance.

Here is a description of the five elements with their meaning, sensation and body regions.

THE FIVE ELEMENTS

The Akasha element is the pre-matter of all creation.

It has the sensation of consciousness-penetrating-all, and is everywhere .

The Akasha is experienced in Delta brainwaves of Pure Being.

The region corresponding to this element is located in the midriff region.

The Fire element is will and electricity.

It has the sensation of warmth and expansion, and is located in the head region.

Electric power is increased through aligning individual will

with Divine Will for the highest good of all concerned.

Will activates Delta brainwaves of Pure Being.

The Air element is mind and thought.

It has the sensation of ease and relaxation and is located in the lung area.

The Water element is magnetism, feeling, emotion, psychic sensitivity, flowing, fluidity and change.

It has the sensation of coolness, which turns to chill.

It is located in the abdomen, seen as a hollow space.

Magnetic power is increased through aligning individual emotions with Divine Emotions.

Emotion activates Alpha brainwaves which are magnetic

and attract new realities into form on the material plane.

Emotion and magnetism attract realities into physical expression.

Divine Emotions attract Paradise, and Heaven on Earth.

The Earth element is physical form.

It has the sensation of weight and is located in the leg region.

As long as you persist in your meditations, the heavenly hosts will not fail when you ask for help.

"Ask and ye shall receive."

"Knock and it shall be opened unto you

Cigila

CAkasha: This is the virtue of the mysteries of the Eucharist with all its aspects.

The C oscillation symbolizes the mystery of self-spiritualization.

A person who masters this mystery well, will comprehend and understand the profundity of the Eucharist and will master all the practical methods relating to it.

It has to do with the transformation or incorporation of a divine idea, a higher virtue, into a certain form.

Mental: All practices dealing with the question of influencing ones own intellect or the spirit of somebody else by a divine idea, virtue quality, power, might, etc., are applications of this virtue

.

Astral: In the feeling body and the feeling world, a person learns to know the profound mystery of the Eucharist, that is, the emotional impregnation with one of the divine virtues, qualities, etc.

This virtue not only impregnates the feeling body, but also preserves it and gives control over it.

Material: By mastering the virtue of the Eucharist, a person learns to enliven the whole of matter and to equip it with mental and emotional virtues, powers, etc.

A person learns to impregnate through will, mind, emotion, and sensation any material form at will.

The color of this virtue is vermillion orange.

Its musical note is D. Its element is fire and air so it has the sensation of warmth and ease.

The stomach is formed from this virtue.

I The sound of this letter is the virtue of cause and effect,
which is the karma law.

**On the mental level, this is analogous to memory,
remembrance and conscience**

.

**In the feeling body, this corresponds to the
astral/physical matrix,
which is the connection between feeling and physical
form, with all of its functions**

.

**By meditating on the law of cause and effect,
all laws of analogies between the micro- and the
macrocosm are understood and mastered.**

**Everything that has shape, measure, number and
weight has been created by the help of this letter
oscillation.**

If a child of God can master this meditation,

**he/she will be able to evoke the greatest miracles in
the material world
by using the respective analogies to shape, measure,
number and weight**

.

**As one can see, shape, measure, number and weight
are the chief components of the material world,
and by getting this letter oscillation under control, a
person becomes their absolute master**

.

**It stands to reason that he/she will also be able to
become a perfect metaphysician, too and, furthermore
to comprehend all laws presently still unknown to our
physical world and to apply them in all fields**

.

**The color of this virtue is light opal, the musical note is
G, the element
is earth so it has the sensation of weight, and the left
kidney is created
by this oscillatio**

n.

G In the principle of consciousness-penetrating-all,
this is the virtue of Divine Grace and Mercy with all of
its profundity.

**In the mind this virtue gives divine peace in the
spirit,**

**the experience of peacefulness and the blessing
by Divine Providence.**

**Mastering this virtue gives the absolute faculty of
bestowing true Divine Blessings.**

**In the feelings there is great happiness and
complete satisfaction.**

**Likewise, when mastering this virtue, situations
may be created
by means of the elements and the masculine-
feminine energies
causing happiness, success and wealth in the
material world for oneself or others**

**[Color: deep grass green, musical note: F, element
water-chill,
heals: left eye]**

**I The sound of this letter is the virtue of cause and
effect, which is the karma law.**

**On the mental level, this is analogous to memory,
remembrance and conscience.**

**In the emotional body, this corresponds to the astral
matrix with all of its functions.**

**As you know, the astral matrix is the connecting link
between the emotions and the physical body**

**It is a known fact that the astral matrix, and with it the
whole body, is kept alive by breathing.**

**With the knowledge of cause and effect, you are in the
position to get under your perfect control the breath**

with all of its aspects and ways of application.

**All mystical abilities are subject to the mastery of
breath.**

**The knowledge of cause and effect enables a person
TO WILL, IMAGINE, AND FEEL EMOTIONS OF THE
DESIRED OUTCOME**

**Because all life is connected as a unified field of energy,
whatever is willed, thought, felt, and sensed is pulled out of**

infinite possibility
into the web of life, both inside the microcosm which is the
human body
and the macrocosm, which is the outer universe.

As above, so below.
The color of this virtue is light opal, the musical note is

Footnotes

The names and meaning of angel groups come from Quaballah, which is a very ancient set of teachings which together form a common precursor, or root, of three of the world's religions: Judaism, Islam, and Christianity.

Each degree of the zodiac is ruled by a high being of the heavenly host in the zone girdling the earth,

and the angels who work with him or her.

The being and the angels share the same name.

**This name is a key to their powers and influence.
Names, phrases, and sections,**

in the angel messages are quoted or paraphrased from the books of Franz Bardon.

The Law of One is the original law of Creation,
and is the supreme Law over all laws in all dimensions.

THE LAW OF ONE

We are all one.

When one is harmed, all are harmed.

When one is helped, all are helped.

Therefore, in the name of who I AM,

and I am one with all there is;

I ask that ONLY

THE HIGHEST GOOD OF ALL CONCERNED happen .
I give thanks that this is done.
SO BE IT!

So it is.
