The Angels of Initiation

Also known as

The Angels
of

Kaflesi

Beloved,

**The Law of One is the original law of Creation, and is the supreme Law
over all laws in all dimensions.**

THE LAW OF ONE

We are all one.

When one is harmed, all are harmed.

When one is helped, all are helped.

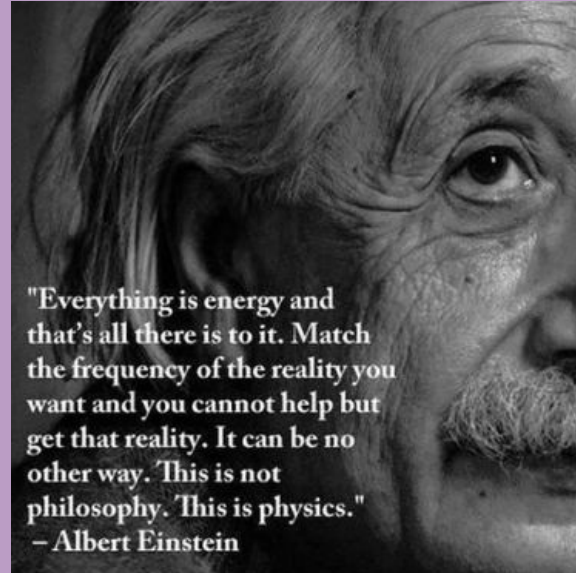

*Therefore, in the name of who I AM,
and I AM one with all there is;*

I ask that ONLY THE HIGHEST GOOD OF ALL CONCERNED happen.

***I give thanks that this is done.
SO BE IT!
And so it is.***

As people reach advanced degrees of Divine Mental Wisdom, we initiate them into the analogies between body, soul, and spirit.

In addition we initiate them into their corresponding relationships to the universe.

We initiate amazing upgrades of divine awareness, according to the original divine blueprints of perfection and omnipotent will.

The following is a brief explanation of the analogy between a person and omnipresent divine being.

**Just as an acorn contains within itself all of the codes of a mature and mighty oak,
a persons nesting bodies,
which include the Omnipresent Akashic body, the desire body, the mental body, the emotional body, and the physical body,
are complete microcosms of the macrocosm and contain within themselves
the codes of the infinite universe on every level.**

"Ye are made in the image and likeness of God."

"Know ye not that ye are gods?"

When an acorn sprouts, the codes of the oak tree are awakened and it grows and grows.

Through initiation, these Divine Codes are awakened in a person and grow and grow.

All creation is electro-magnetic.

A persons indwelling Divine Spirit, as Consciousness, is electric and made up of being-willpower, that is desire- intent and visualization, which manifests into enlightened thought and mind.

As a person grows into a natural enlightened state, a persons Spirit activates within itself Divine Codes, the Codes of Omnipresence, Omnipotence, Omniscience, or the Being-ness, Will and Mind of Divine Consciousness itself.

All of this happens with divine flowing visual images of Heaven on Earth.

I and the Father are ONE!

All that I do, ye shall do and more!

A persons Divine Soul is magnetic, it is the aspect of being that manifests as flowing emotions, vitality, logic, memory and physical sensations.

Remember that flowing emotions magnetize new realities into physical manifestation.

Emotions of cosmic unconditional love and emotions of all the divine virtues taken together attract corresponding realities into form.

In its growing enlightened state the soul activates within itself codes of flowing divine love in addition to feelings of all the divine virtues, and vitality grows, joined with the ecstatic sensations of living in a physical paradise.

"On Earth as it is in Heaven."

Beautiful emotions attract beautiful physical manifestations.

People who visualize beautiful images in meditation, activating the pineal gland, and feel corresponding beautiful emotions, out picture physical realities that emanate these divine electro-magnetic frequencies.

That is why it was written that the sons and daughters of Divine Being are given dominion over Creation.

"On earth as it is in Heaven."

Man is made in the image and likeness of God.

Patterns of electro-magnetic Divine Energy of Spirit and Soul repeat themselves into infinity within incarnations of the sons and daughters of Divine Being.

This repeating of patterns is spoken of in mathematics as recursive fractals.

**Just as an atom looks similar to a solar system, so do the sons and daughters of light and love
look similar in Spirits and Souls to Divine Being when they are enlightened.**

That is WHY it was written that *man is made in the image and likeness of God.*

**The fact that Divine Being is composed of PURE BEING that is ONE
WITH
ALL CREATION, and composed of perfect Will, Mind, Emotion and
Sensation,
lets a person know, through analogy, that people are also pure
being, will, mind, emotion, and sensation.**

**The primary state of Pure being and unification with Divine Being and
all Creation is
referred to as the element of Akasha,
which is accessed in the slowest Delta brainwave state.**

**This state is experienced every night in deep dreamless sleep,
and is also dominant in infancy.
In meditation, by going deep within, this state can also be accessed.**

**Will is referred to as the element of fire, which is accessed in the
more rapid end of Delta brainwave states.**

**Mind is the element of air, the Theta brainwave state, which is deep
inward thought, creating visual images of divine beauty.**

Flowing emotions are the element of water, the Alpha brainwave state.

Sensation is the element of earth, the Beta brainwave state.

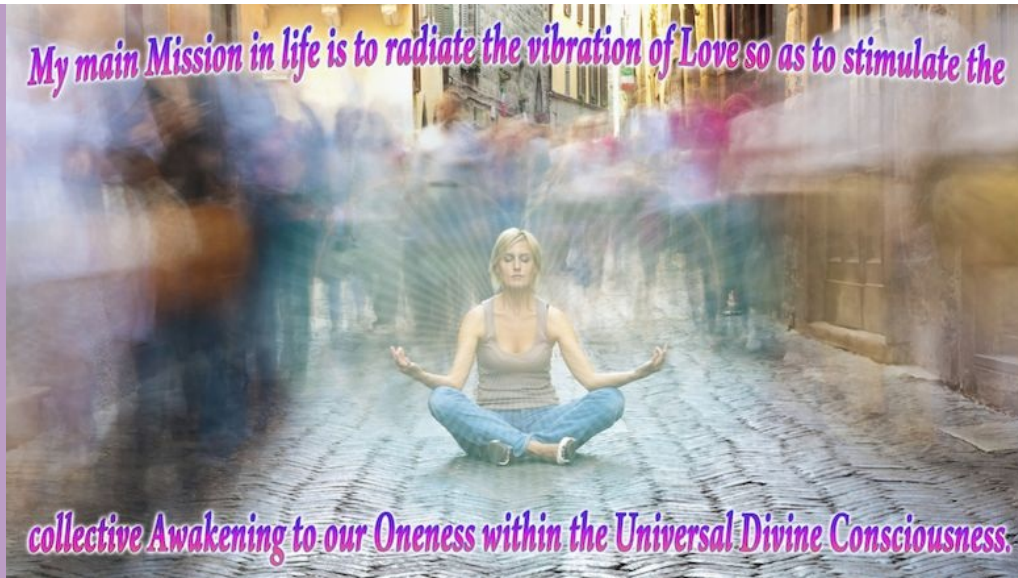

The Beta brainwave state includes the five senses, logic, and memory.

**When a change occurs anywhere along a string of recursive fractals,
a new code is written that goes along the entire string throughout time
and space, creating new realities instantly.**

This is the blueprint of miracles.

That is why it is written, *As above, so below.*

**This is why the instructions for the use of the ancient language begin
by asking you to experience yourself
as Pure Being that is one with Divine Being and all creation.**

**Then you further imagine yourself becoming manifest as a tiny dot
within the solar plexus of your own physical body,
seeing the rest of the body as a vast swirling universe all around you.**

**From there you choose a Divine Quality to enliven in being, will,
thought, emotions and sensations within your body.**

**With the out breath, you send this enlivened divine quality through
the pores of the skin into the outer macrocosm,
according to inner guidance.**

**You may send it to an object, a place, a person, or indeed the whole
creation, both in space and time.**

**With the in breath, keeping the rhythm of the breath natural, feel this
coming back in through these same pores and filling the body or any
part
of it, according to inner guidance.**

**Dissolve the meditation in your body when you are finished to protect
the natural balance of elements in the body.**

**By creating changes with Divine Virtues in your microcosmic body
universe in being, intent, thought, emotion, and sensation,
an automatic chain reaction is created in these same areas of
consciousness along recursive fractal strings
into the outer web of life with the breath and intent.**

What happens to one part of the web of life affects the whole.

**This is why The Law of One is so important to know and intend, for only
the highest good of all concerned
is the natural enlightened expression of Omnipresent, Omniscient,
Omnipotent Divine Being.**

**Once something is done by one, it radiates out and becomes
embedded in all,
and it is just a matter of time before it manifests on all levels of
creation,
and returns from everywhere to affect the sender.**

This is the core of the laws of cause and effect.

"Ye reap what you have sown."

Whatever you do to the least of these you do unto me."

By creating divine causes, the harvest is sweet.

All that I do ye shall do and more.

Divine Being is growing through all parts of itself.

Just as one acorn has the code of a giant tree, many trees together contain the code of a giant forest.

As the children of Light and Love manifest new information within the inner universe, or fractal , of their own physical selves and subtle bodies, the outer web of life also changes and evolves.

The human body has two distinct nervous systems.

The inner worlds correspond to the parasympathetic nervous system.

The outer worlds correspond to the sympathetic nervous system.

These two are often known as matter and antimatter, and they interact back and forth.

They each affect the other.

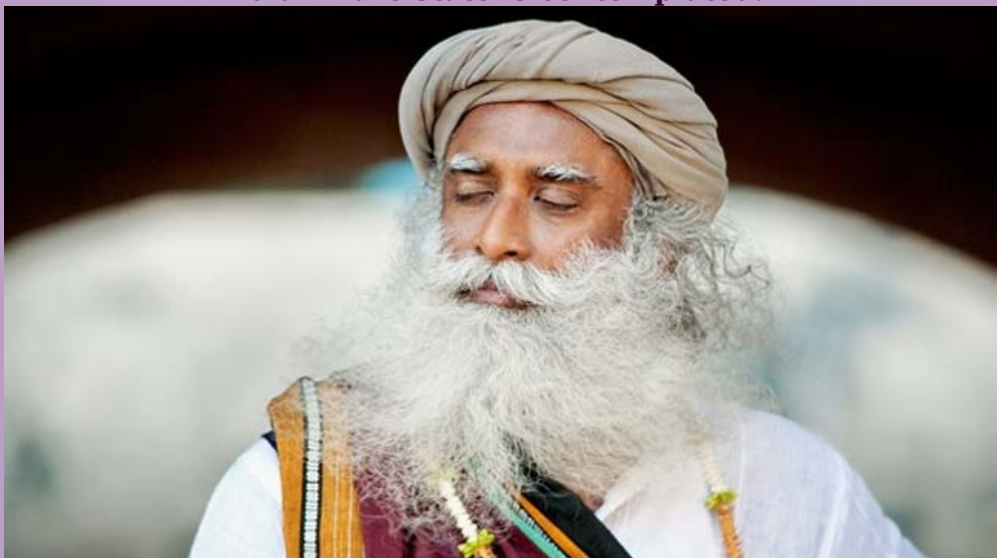

The central nervous system supports them both in an alternating dance.

Changes spread along strings of electromagnetic energy through time and space, through will and emotion, according to mathematical formulae.

**The Law of One,
which is the original law of creation,
is the formulae for perfection in the process of materialization.**

So to repeat, when a person wishes to manifest a Divine Virtue, first he or she becomes one with Divine Being in an Omnipresent way through meditation , and then the Omnipotent will for the highest good of all concerned is combined with this omnipresence and visualization of color of the divine virtue appearing in the desired place or places.

Then a clear concept of the meaning of the Divine Virtue, in the Theta brainwave state is contemplated.

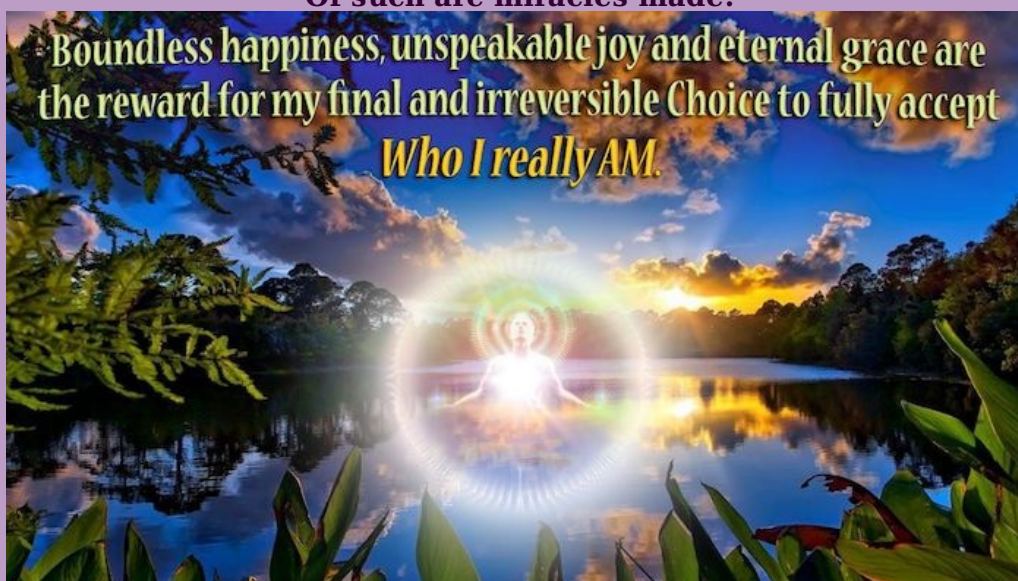

This in turn is combined with all embracing unconditional love and flowing emotions of the virtue, which attract this virtue into form.

The form is composed of the original being-ness, visualization, meaning, emotions and sensations of the Divine Virtue.

**Meditation in this way engages all four brainwave patterns and sends out a complete package of information, or discrete combinations of sine waves,
that embed through strings of fractals causing change.**

Of such are miracles made.

To the individual student of this ancient cosmic language, practical knowledge of the letters, ideally, should include memorizing all levels of the aspects of each Divine Virtue so that, for example, the sensing of coolness, ease, etc. and sound, color, meaning, and emotion associated with each virtue becomes palpably and powerfully and immediately available in imagination, in consciousness upon calling forth the letter.

The vision of the Divine Virtue with its color, meaning, sound, emotions , and sensations manifesting fully within the body and then, with the out breath, within the outer universe can become automatic with practice.

When the fourfold sense impression of each Divine Virtue springs forth as a strong impression in the psyche of the student, mystical results are immanent and natural.

When different letters, with their Divine Virtues, are joined together, then amazing mastery over all levels of creation is attained.

All that I do ye shall do and more.

For example, the letter A, pronounced softly as in Ahhhh, represents the Virtue of Wisdom and Enlightenment which is a virtue of the Air element of deep inner thought and is felt with sensations of ease.

The meditation is done from the point of view of imagining yourself as a tiny dot in your solar plexus, two fingers up from the navel and two fingers in, with the body as an infinite universe all about you.

You vividly sense relaxation and ease as you imagine the color sky blue shining from a tiny sun in the lung area.

At the same time meditate on Divine Wisdom and Enlightenment, on the original purity of all ideas in Divine Mind.

Filling every cell of your lung area, or even the entire body-universe, activates the super and subconscious minds

and awakens this virtue in your body. Enliven this wisdom with
unconditional all encompassing love
and flowing emotions of wisdom and enlightenment, of the original
purity of all ideas.

Inwardly chant the letter A, soft A, to the note of G.

Your practice of concentrating on this meditation creates changes in
the chemical makeup of your physical body.
This is your gift to your own physical universe.

This activity sets up sine waves of information that radiate out in
recursive fractals upon the electromagnetic
[Electric/Will, Magnetic/Emotional] fibers of the web of life with the
out breath, sent out in imagination not only through the nose or mouth,
but also through the pores of the skin over the lung area.

The cascading effects on outgoing strings of energy in the web of life
is your gift to the whole being of God.

This is the meaning of having dominion over all that has been created.

This is how a person becomes a co-creator and brings Heaven to Earth.

When a person receives our initiation, this information becomes much
more clear and obvious.

The practical application of this ancient meditation becomes second
nature with practice and is used with ease
to manifest the highest good of all concerned,
to bring Heaven to Earth for all sentient life.

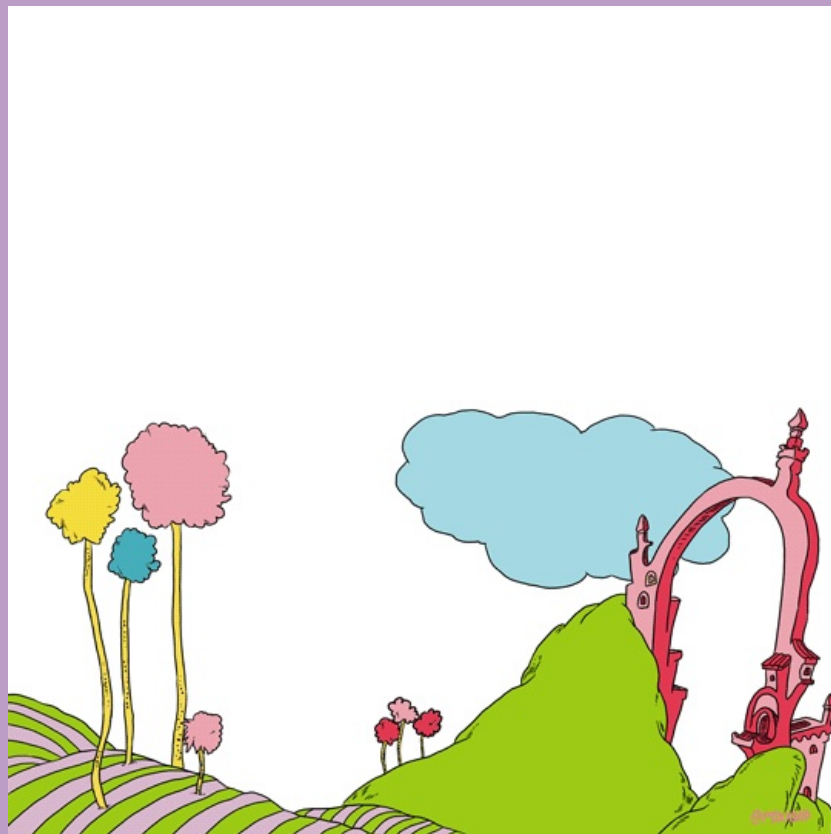

Each person who creates change in this way, adds a new and unique
factor to the change codes of the universe,
for each child of Light and Love has magnificent,
one-of-a-kind gifts to share with all.

That is why it was written,

It is not Gods will that any be lost.

Footnotes

The names and meaning of angel groups come from Quaballah, which is a very ancient set of teachings which together form a common precursor, or root, of three of the world's religions: Judaism, Islam, and Christianity.

Each degree of the zodiac is ruled by a high being of the heavenly host in the zone girdling the earth, and the angels who work with him or her. The being and the angels share the same name.

This name is a key to their powers and influence.

Names, phrases, or sections in the angel messages are quoted or paraphrased from the books of Franz Bardon.

Information of the heavenly hosts of the zone girdling the earth is referenced from THE PRACTICE OF MAGICAL EVOCATION, ISBN 3-921338-02-6, and Information of the divine virtues and the letters are referenced from THE KEY TO THE TRUE QUABALLAH, ISBN 3-921338-12-4]. Publisher is Dieter Rüggeberg, Wuppertal/W. Germany.

These books have very important information for these studies.

The book "Initiation into Hermetics" ISBN 3-921338-01-8, is a preparatory book for the others.

Franz Bardon's last autobiographical book, "Frabato the Magician", gives historical background and was compiled by his German publisher from notes written by Franz Bardon.
