The Angels of Transmutation of Elements

Also known as

The Angels

of

Tabbata

Beloved,

**Whenever it is necessary for the highest good,
we inspire the children of divine being to understand and use
transmutation of elements,
one into the other.**

***We teach how to make a body resistant against fire and how to make
it almost invulnerable.***

***We teach how to change water into ice, in the quabbalistic way,
which is through the use of conscious divine omnipotent being, will,
visualization, thought, emotions, and sensations.***

**Through effects of consciousness occurring in an observer,
dimensional shifts are made to occur.**

We have inspired scientists of quantum and plasma theories with many truths about this in studying changes in matter.

The elements are ether, fire, air, water, and earth.

Ether corresponds to the deepest level of Delta brainwaves, a state of pure being and unity with Divine Being and all creation, including the quantum field of infinite possibilities.

This opens up communication with the observed on every level, including levels of being, desire, images, emotions and sensations.

In a deep delta brainwave state of pure being, the self is experienced as one with the observed on all these levels.

Fire is will, or will power, it is an intention made in a higher Delta state.

In this state, a desire for change is registered in consciousness in self and then in the observed, because both are joined as one in beingness.

Both self and other are affected by the information contained in this desire because at the level of the deep delta brainwave state they are one.

So the beginning of creating an information code to effect change is the deep delta brainwave state of oneness moving into a higher delta brainwave state of intention.

Because the change is occurring in what is experienced as another part of the person's own self, the desire is always for the highest good of all.

This is the basis of Law of One, the original law of creation. It awakens primordial DNA codes of survival and enlightenment. It overrides all other laws.

The Law of One is the original law of Creation, and is the supreme Law over all laws in all dimensions.

THE LAW OF ONE

We are all one.

When one is harmed, all are harmed.

When one is helped, all are helped.

Therefore, in the name of who I AM,

and I AM one with all there is;

I ask that ONLY THE HIGHEST GOOD OF ALL CONCERNED happen.
I give thanks that this is done.

SO BE IT!

So it is.

The highest good of all is contemplated in the mental state of air.

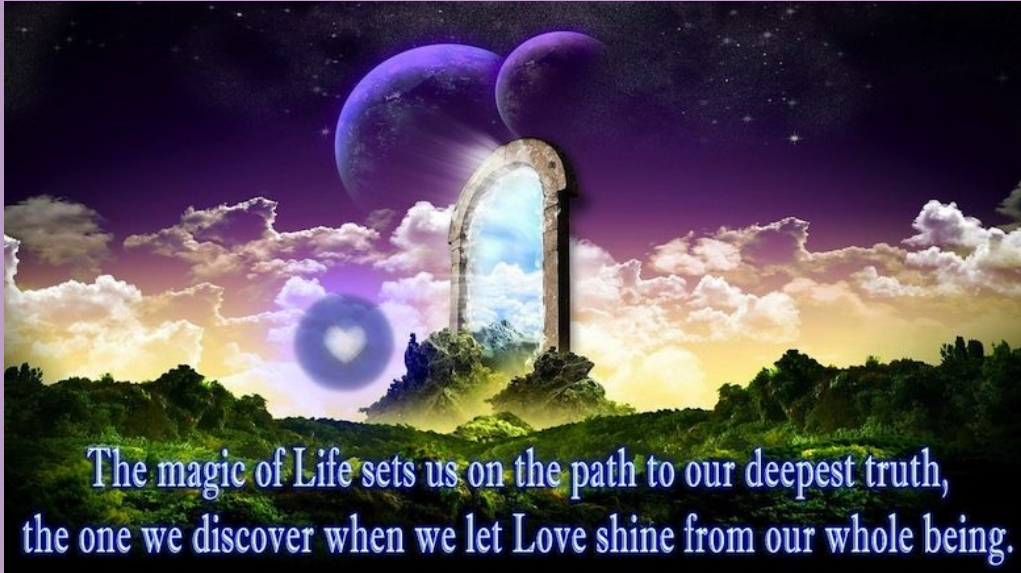

Air is deep inward thought, or Theta brainwaves of deep inner contemplation and meditation.

**A clear visualization of the desired change is contemplated,
and finally decided upon,
and a visualization of the outcome is made in imagination.**

**Visual images made in imagination are the language of mind,
and forms molds or holograms for energy to fill.**

**Remember that the energy field and the brain communicate in visual
images combined with emotion.**

**Wonderful highest good visualization evokes such emotions of joy,
anticipation, love, delight and gratitude,
that a magnificent magnetic field is produced.**

**The magic of Life sets us on the path to our deepest truth,
the one we discover when we let Love shine from our whole being.**

**Tangible flowing feelings in the body are magnetic and, like zip files,
contain compressed information.**

**The emotional, or astral, body now goes online and emits strong
magnetic signals,
or magnetic information and frequency codes.**

Flowing emotions are known as the water element.

**Dense water is liquid, but subtle water is flowing emotions,
or Alpha brainwaves.**

**This magnetic field, through attraction, reorganizes the quantum field
to produce the visualized image that was created Theta, or deep inner
thought.**

**The resulting material manifestation of visualization and emotion is the
earth element.**

Earth awareness is sensation, or Beta brainwaves.

**Like overlapping colors in a rainbow,
these levels or elements blend one into the other.**

We are the heavenly hosts of Tabata.

***We help you align fire, air, water, and earth,
and receive true divine inspiration
concerning whatever your inner guidance directs.***

This is how, through the divine virtue of high inspiration, from the original Delta and Theta state of oneness and clarity of purpose, *which is the first letter of our name ,Tabbata,* a person gains complete control over the elements of being, fire, air, water, and earth within the self.

As a person gains control over these elements within the self, then, through breath, they breath out new information codes even into physical reality.

With the inbreath, they reap what they have sown, they receive back what they have breathed out.

In this way, through intent, visual images, thought, feeling, and breath, a person controls the elements in the inner and outer worlds.

Delta, Theta, Alpha and Beta brainwaves, in this way, function in harmony and coherence.

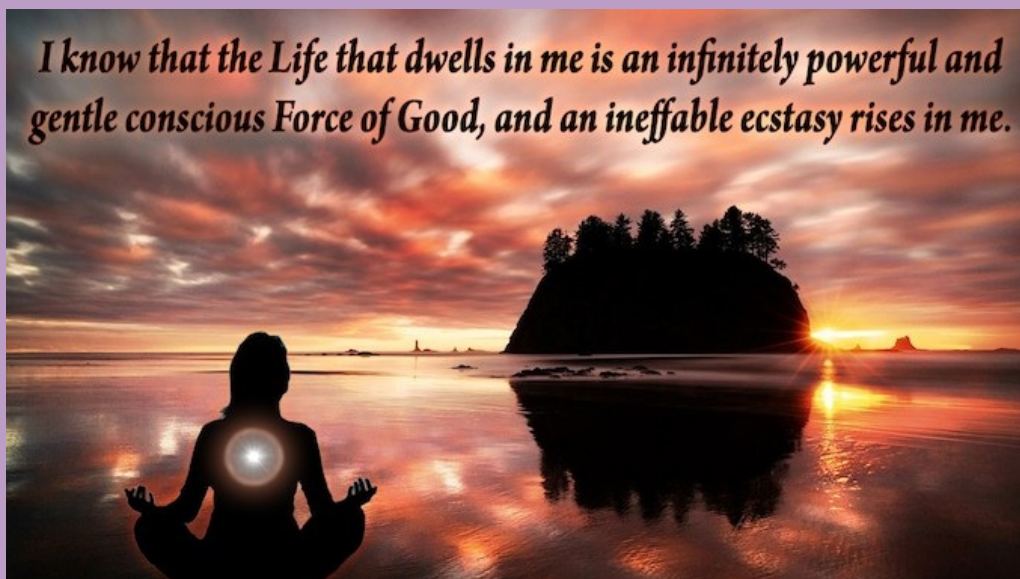

Information waves of intent, visualization, thought, feeling, and sensation, affect the quantum field of infinite potential.

Through intention, visualization, emotion and breath, changes are willed to occur in the inner and outer worlds.

Through the virtue of high inspiration, letter T, deep at-one-ment with Divine Being generates genius concerning whatever is focused upon.

This is why the letter T appears twice in our name Tabbata.

Beautiful desires are generated, visualizations are inspired, thoughts are contemplated, emotions are generated, and accompanying sensations are experienced within in meditation, forming a holographic mold.

With intention, this four fold package of information is impregnated into any space, situation, or substance.

By doing this, changes in physicality are attracted.

The old state of affairs in physicality now changes.

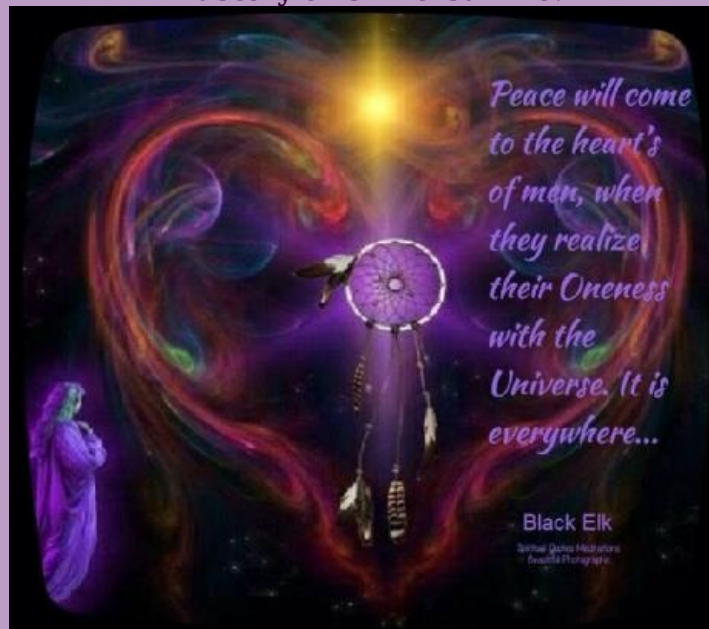

The old manifestation is released, and the new is born and embraced.

**It cannot be repeated too often, that a powerful visualization process,
combined with clear concepts,
flowing currents of appropriate tangible feelings and sensations,
attract new expressions of reality into physical manifestation.**

**By understanding and recognizing the original purity of all ideas in
Divine Mind, which is the second, the fifth, and the seventh virtues of our
name Tabbata,
which is the letter A pronounced as a soft A, as in ahhhh,
a child of light and love recognizes and then releases imperfections
to Divine Being
for transformation into other states that are the highest good,
which is another virtue of letter A,
pronounced umlaut A, ae, as in the word fate.**

**At every step of the process of changing one element into another, these
two virtues are activated.**

**We make sure that the children of light attain understanding and
mastery of Universal life.**

**This divine virtue, represented by the two B's in our name,
reveals the necessity for the existence of polarities in creation.**

**Mastering this virtue gives control over all polarities of every element,
especially over the polarity of fire and water,
which are the virtues of omnipotent will and divine flowing emotions.**

Will and emotions are the essence of the electro-magnetic fluid.

**By mastering the electro-magnetic fluid,
which is mastery over one's desire nature and emotional nature,
control over life and death,
of self or others,
or anything,
is gained.**

This virtue is the letter B of our name.

The power to change fate is gained.

**The wonderful power of individual will aligned with Divine Will,
coupled with inspired visualizations,**

enlightened understandings,
with powerful trance like flowing emotions,
and powerfully imagined sensations,
make possible the miracles demonstrated by yogis, saints and masters
of old.

This four fold energy of the elements is the core of using the magic of
breath to create.

Remember that awareness is encoded on breath and flows out as
wireless
signals to the unconscious and superconsciousness of all others.

Divine Inspiration guides a person to what awareness to meditate on
and
send out by breath.

High inspiration directs the four elements,
both within the microcosm of individual self,
and the macrocosm of the collective Self,
to out picture Perfection.

*"One good man can save a city of ten thousand,
and ten can save the world."*

Tabbata

*The letter T, in the Quabbalistic language, represents high
inspiration which is in accord with the harmony of Divine Providence.*

*This divine virtue gives a child of God inspiration and intuition in
respect to everything arousing their interest and attention.*

*Its color is brown-black, its musical note is F, it is the fire element
of will, and it is the principle from which the right kidney is formed
in the sacred bodies of the children of light,
made in the image and likeness of God.
It has the sensations of heat and expansion.*

*A and umlaut A, aeThe letter A, soft A as in ahhhhh, is the divine virtue of the
highest
wisdom and enlightenment.*

*It is the air element of mind, its color is light blue, its musical
note is G, and the lungs are formed by it.
It has sensations of relaxation and ease.*

This virtue represents the original purity of all ideas in existence.

When a child of light meditates on and becomes one with this virtue, he

or she gains a perfect mind with the gifts of clairvoyance, clairaudience, levitation, eloquence, musical and artistic talent, and control over the spirits of the air.

With the understanding of the original purity of all ideas in Divine Mind, imperfections are recognized and released back into Divine Being for transformation into other states.

This is the virtue of umlaut A, ae, shining with a loamy brown light and the sensation of weight. The anus is formed from this virtue of releasing what is imperfect for transformation into another state. It has sensations of weight.

BThe letter B is the virtue of polarity in all of its forms and expressions.

It is the perception of universal life.

Its color is light violet, it is the earth element, its musical note is A, and it is the principle that forms the right eye. It has sensations of weight, because it is a virtue of the earth element.

BWhen a person meditates on universal life and polarity, perfect control over will and feeling, or the electric and magnetic energy, are attained.

This gives the power to change any fate, and to evoke emotional volts, charge talismans, and create sexual effects.

A high intuition is also gained.

This virtue gives control over all the laws of polarization and the ability to control matter.

AThe virtue of the highest wisdom and enlightenment on the physical plane gives complete control over the air and command of storms.

umlaut A, aeThe virtue of transformation gives control over negative passion and all negative beings.

This virtue gives freedom from clinging to any negative desires, thoughts, emotions, or physical manifestations.

Its color is loamy brown, its musical note is C and it is the earth element with a sensation of weight.

TO **n the mental plane this virtue awakens remarkable inventive faculties and a good memory.**

On the level of emotions, this virtue gives complete control over the elements.

A and umlaut A, aeThe gifts of an enlightened mind, with reasoning, perception, the cognition of the most profound truths, highest knowledge, high intelligence, and the rousing of all intellectual faculties are expressed in the mental world by becoming one with the virtue of highest wisdom and enlightenment.

Recognition of and release of imperfections then results in transformation into whatever has been intended, visualized, thought, felt, and sensed.

Footnotes:

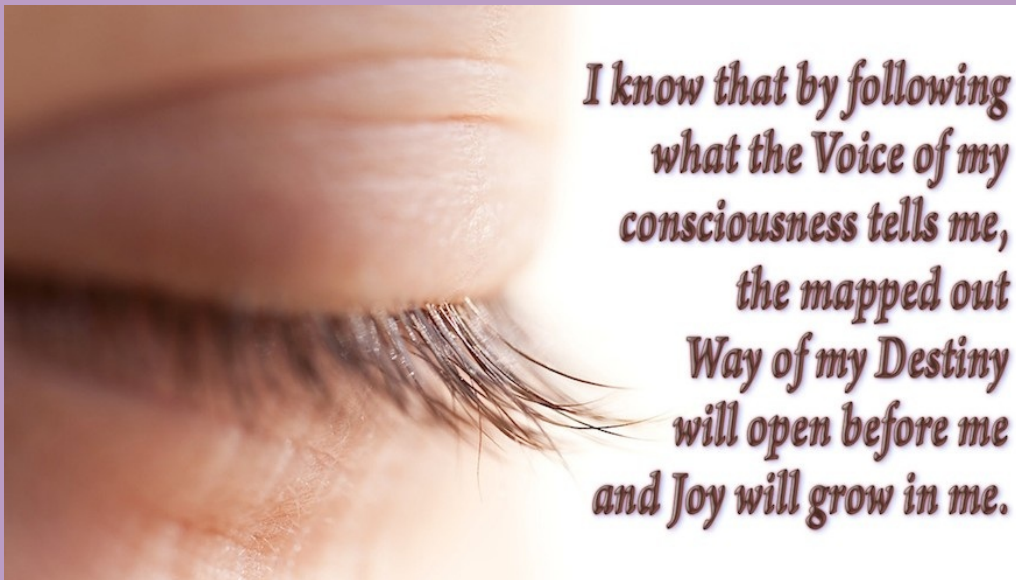

The names and meaning of angel groups come from Quaballah, which is a very ancient set of teachings which together form a common precursor, or root, of three of the world's religions: Judaism, Islam, and Christianity.

Each degree of the zodiac is ruled by a high being of the heavenly host in the zone girdling the earth, and the angels who work with him or her. The being and the angels share the same name. This name is a key to their powers and influence.

Names, phrases, or sections in the angel messages are quoted or paraphrased from the books of Franz Bardon.

Information of the heavenly hosts of the zone girdling the earth is referenced from THE PRACTICE OF MAGICAL EVOCATION, ISBN 3-921338-02-6, and information of the divine virtues and the letters are referenced from THE KEY TO THE TRUE QUABALLAH, ISBN 3-921338-12-4]. Publisher is Dieter Rüggeberg, Wuppertal/W. Germany. These books have very important information for these studies.

The book "Initiation into Hermetics" ISBN 3-921338-01-8, is a preparatory book for the others. Franz Bardon's last autobiographical book, "Frabato the Magician", gives historical background and was compiled by his German publisher from notes written by Franz Bardon.
