The Angels of the Elements

Also known as

The Angels of

Takarosa

Beloved,

The element from which all other elements come from is called akasha.

Akasha is the originating all penetrating element,
from which emerge the other four elements: fire, air, water, and earth.

Many miracles spoken of in holy scriptures of different cultures and times
are accomplished by experiencing the akasha as self,
with corresponding mastery of the four descending elements.

Fire is controlled by will.
Air is controlled by thought.
Water is controlled by emotion.
Earth is controlled by sensations.

There are many intelligent beings that manifest within these elements.

These beings have forms that consist of one or more of these densities,
and evolve through their incarnations there.

These beings are spoken of as beings of the elements.

They have been called gods or deities, salamanders, sylphs, undines and
gnomes, among other names.

Gods or deities are beings of the akasha, the original element.

Of all mammals, humans are the only ones that have the ability to experience
themselves as one with the original element.

"I and the Father are ONE."

"Seek ye first the kingdom of heaven, and all else shall be added unto you."

"The kingdom of heaven is found within."

"Listen to the still small voice."

Of all mammals, humans are the only ones that have whites of the eyes.

Of all mammals, it is said that humans are the only ones that emit light
through these whites,
in addition to receiving light through the iris that all mammals experience.

This is the basis of darshan, or the gaze of the master.

That is why it was written:

"Know ye not that ye are Gods?"

"Man is made in the image and likeness of God."

"I and the Father are ONE."

"What ye do unto the least of these, you do unto me."

The element of akasha is the awareness of unity with all,
it is the unified field.

**Omnipresence, or akasha, is experienced in deep dreamless sleep each night.
This is when the body heals.**

**This is the delta brainwave of 0 to 4 oscillations per second.
It is also dominant in infancy.**

**By going within, and seeking the kingdom of heaven,
the delta brainwave becomes part of conscious awareness.
This is a basis of samadhi,
oneness with divine being.**

Out of pure being, the akasha, a desire arises.

This desire is the element of fire.

In ancient writings, beings of fire are called salamanders.

Salamanders are beings of fire, or will and intent, and electricity.

Out of desire, a visualized image arises.

The mind then clothes itself in this visualized image and contemplates it.

Ideas are generated about this image.

The mind is the element of air.

**Inner thought, the mind, operates in the Theta brainwave range of 4 to 7
oscillations per second.**

Theta is dominant in childhood.

"Ye must be as little children to enter the kingdom of God."

Sylphs are elemental beings of mind, the air element.

From these ideas, emotions about ideas and desire are generated.

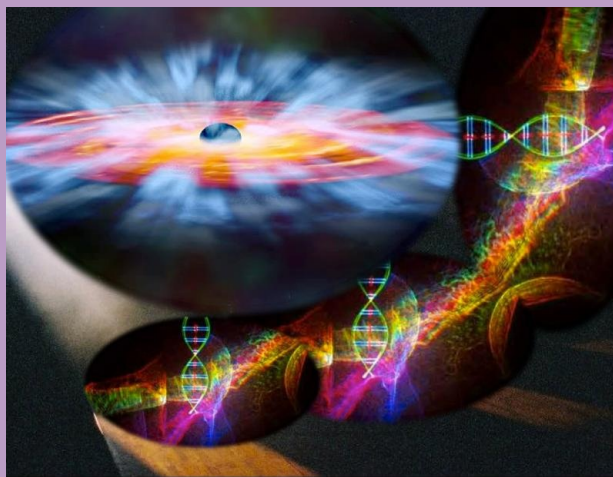

Undines are beings of emotion, the water element of consciousness.

**Emotions are magnetic, they contain compressed information,
and attract corresponding realities into form on the physical plane.
Emotions are elemental beings of the water element.**

**Beings of the physical plane take emotions and out picture them into forms
and situations in time and space
with length, width, depth, and weight.**

Gnomes are beings of the earth, the material element of consciousness.

**Elemental beings have great power,
and co-operate and obey enlightened people
that look at them through the eyes of unity, of flowing Love Divine.**

Remember that the first element is akasha.

Akasha is the element of omnipresence, the unified field of energy, the subtle pre-matter of creation.

It is experienced in the deep Delta brainwave state of the infant self, and of deep dreamless sleep each night.

Learn to access this state in meditation to work with the beings who live in this state.

Here you too will experience yourself as a pure being that is one with Divine Being and all creation, just as they do.

With this element it is possible to heal, bless, and communicate with anyone anywhere anytime.

**Also accessed in the Delta brainwave state, only not as deep as is the state of Akasha,
is the realm of the fire beings,
which are entities whose awareness is of Divine will, intention, faith, enthusiasm, electricity, and visualization and omnipotence.**

Every DESIRE, WILL, VISUALIZATION or INTENTION activates Fire elementals, or fire of fire.

The beings of fire, the salamanders, embody mastery of will, power, faith, and visualization.

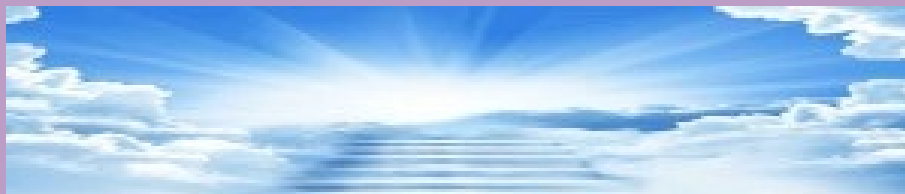

**Visualization and will leads to the next element of air,
which is a state of deep inner thought or contemplation
of what has been previously willed in the fire element.**

Deep inner thought is the Theta brainwave state that is dominant in childhood and occurs at any age in the act of dreaming in sleep, meditation and fantasy and using the imagination.

**The elemental beings who incarnate into bodies of the air element,
and whose awareness is that of imagination, visions, and contemplation,
are known as sylphs.**

Will and deep inner thought, the delta and theta brainwave states, are the realms of the elements of fire and air.

Will and thought are masculine, or electric in nature.

When understanding the elements, it becomes obvious that there is fire of fire, fire of air, fire of water, and fire of earth.

Deep KNOWLEDGE about what is willed, visualized or desired are manifestations of fire in the realm of the mind.

Since mind is the air element, thoughts about will would therefore be warm air.

FLOWING EMOTIONS of faith, courage, enthusiasm, will and desire are manifestations of fire in the element of water.

This is warm water.

Actual physical fire, heat, and electricity are the manifestations of fire in the element of earth.

The element of air manifests as workings of mind, of thought, concepts, beliefs, facts and ideas.

The beings who incarnate with bodies of air, the sylphs, evolve through ever greater mastery of thoughts and concepts.

Thoughts, ideas, and knowledge about ideas themselves are the element of air working through air.

Thoughts and ideas about flowing emotions, magnetism, and the change process are the element of air manifesting in the element of water.

This is cool air.

Thoughts, ideas, and knowledge about the physical world are air manifesting in the element of earth.

This is heavy air.

The beings of the elements of water and earth are beings of emotions and of physical forms.

Emotions and physical forms are both feminine and therefore, are both magnetic in nature.

In mastering the beings of the elements,
a person learns to FLOW WITH EMOTIONS to control the beings of water, the
undines.

The undines work with emotions,
and magnetize universal energy into whatever forms
have been visualized in akasha and fire, and contemplated in air.

Beings of the water, the undines, respond to mastery of emotions.

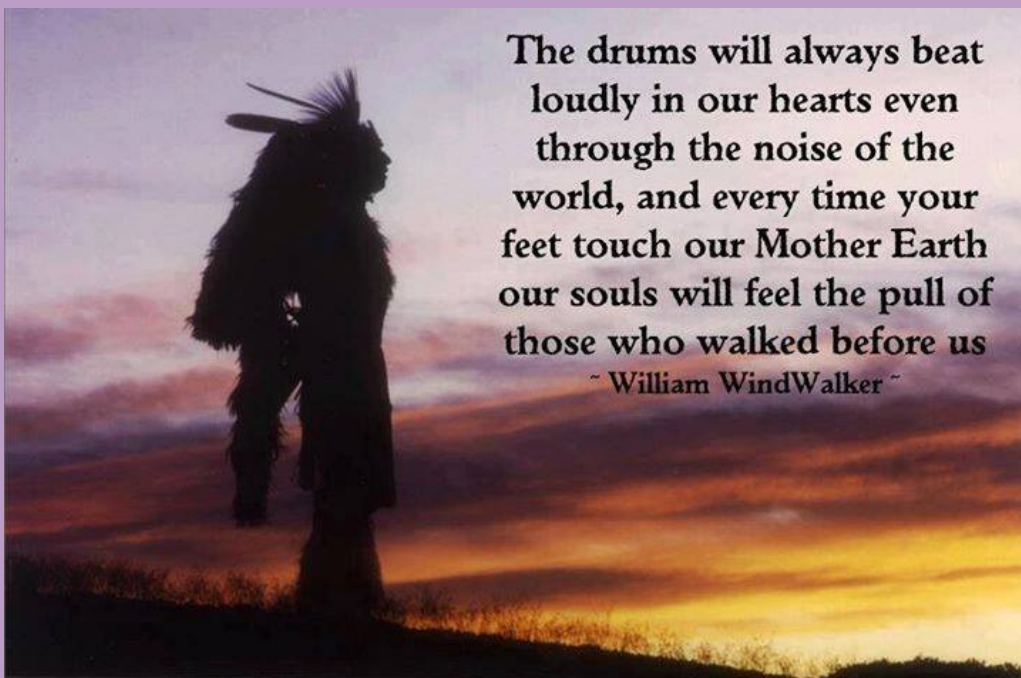

In water, the elements of fire, air, water, and earth exist first as fire emotions,
or emotions about desires and will and power.

Then they also exist as air emotions,
which are emotions about ideas and beliefs and thoughts,
and as water emotions which are emotions about emotions,
and as earth emotions which
are emotions about physical forms.

Flowing emotions themselves are magnetic power.

Traditional native Americans and other original societies have very effective
ways of teaching children
to identify with emotions of fire, air, water, and earth.

They are skilled in the art of manifestation and know that to manifest
anything into the physical plane
requires skills and mastery of feelings and emotions.

The drums will always beat
loudly in our hearts even
through the noise of the
world, and every time your
feet touch our Mother Earth
our souls will feel the pull of
those who walked before us

~ William WindWalker ~

To control fire, emotions of courage, excitement, power, faith and strength are
required.

To control water and the beings of water,

surfing or flowing with emotions,
and keeping them pure is necessary.

Just as stagnate water is poisonous, so too are blocked emotions.
Flowing cleans water, it spins the water molecules so that surface tension is
created,
and impurities are let go.

Emotions are similar.
Instead of acting out destructively painful emotions,
the key is to flow them safely,
in the presence of thankfulness for all the lessons learned from experiencing
them,
and loving the wounded emotional self,
and asking that only the highest good of all concerned happen.

Bringing wounded emotions into healing also heals wounded beliefs and
thoughts caused by them.

This heals physical realities associated with them.

Emotions of fluidity and flowing change are required.

Water demonstrates how one element takes on four different forms or
densities,
such as water appearing as steam, vapor, liquid and ice.

To control beings of material forms,
flowing emotions of solidity, permanence, weight, measure, space, and number
are required.

In working with the elements,
mastery of fire, air, water and earth are all necessary
regardless of which realm you are focusing on.

If you wish to control fire, for example,
first experience yourself as one with all that is, one with Divine Being Itself.

Now focus on being at one with divine blazing faith, intent and desires,
with heat and expansion,
with unstoppable faith and conviction.

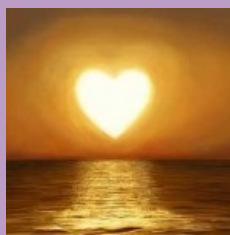

Praise this state of omnipotent will and desire.

In this state, connect with beings of fire and feel your oneness with them.

If you are working with a forest fire for example,
give thanks for any present situation and love the fire with unconditional all-
encompassing love,
for this emotional state of gratitude and love is the
primary transmuting force of healing and change.

"Give thanks for all things, for that is my will concerning you."

"All things work for good for those who believe."

*[Did you know that some pine cone seeds are so tightly bound
that only the blazing heat of a fire will allow them to burst open and sprout?
The Indians controlled brush fires in the forests to allow these seeds to
sprout.*

*The mature trees were not hurt.
The yearly burning of underbrush kept any naturally induced lightening fires*

*from burning out of control
since the fuel for the fires was kept under control in this way.]*

Thank the fire for all the good, known and unknown, that it is making possible.

Flow with emotions of sincere gratitude for the fire.

**Now speak to the beings of the fire The Law of One,
asking them to do what they do only in ways that are the highest good of all concerned.**

**The Law of One is the original law of Creation,
and is the supreme Law over all laws in all dimensions.**

THE LAW OF ONE

We are all one.

When one is harmed, all are harmed.

When one is helped, all are helped.

Therefore, in the name of who I AM,

And I AM one with all there is;

**I ask that only THE HIGHEST GOOD OF ALL CONCERNED
happen.**

I give thanks that this is done.

**SO BE IT!
So it is.**

In this way, miracles happen.

"All that I do, ye shall do and more."

**The intelligent beings of the fire now follow The Law of One
and do only that which is the highest good of all concerned.**

In studying the virtues of the letters of our name,

T-A-K-A-R-O-S-A,

***go within to your own microcosm, seeing yourself as a tiny dot in your solar
plexus with your own body a huge universe all around you.***

The letter T is a fire letter.

The fire region of the body is the head.

***In this region are the tiny suns of the divine virtues of will, or the fire
element.***

The letters Sch, D, T, K and S are fire letters.

The letter C, the spiritualization of matter, is both a fire and air element virtue.

T, the first letter of our name, is the virtue of high inspiration, and is found in the head shining as a brown black sun.

K, which is the virtue of Omnipotence as a quality, is a silvery blue sun.

S, which is the virtue of omnipotence as a quantity that penetrates all, is a purple red sun.

D is the virtue of love to create and is a dark blue sun.

Sch is both the original omnipotence and all penetrating omnipotence together and shines as a blazing red sun.

When meditating on the fire virtues, visualize, feel, and sense these suns shining with heat and tremendous expansion, filling your head.

With the out breath, keeping the rhythm of the breath natural, see the brown black light, will and heat of high inspiration going out through the pores of the skin over the right kidney and filling the outer situation, by clear visualization of what you desire, mold it to the area to be affected by your control of the fire element.

With the in breath see this radiance coming back in through these same pores of the skin and filling your head.

Keep the rhythm of the breath natural.

High inspiration gives control over the elements in the body, and through the breath, it gives control over the elements in the outer world.

With this virtue you will receive divine guidance concerning the situation.

[When you are finished, dissolve the dark brown light in the body to protect the natural balance of elements in the body.]

*You may also do this with the letter K,
omnipotence, passing through the pores of the skin over the left ear,
and S, all penetrating power,
passing through the pores of the skin over the gall bladder.*

*With letter D, the mysteries of creation, the dark blue color passes through
the pores of the skin over the right ear.*

*With Sch, the blazing red light passes through the pores of the skin over the
brain.*

*Through the virtue of wisdom, letter A, clairvoyantly and clairaudiently
connect with the fire elementals,
the beings of fire that
are known as salamanders, release any imperfections through the virtue of
umlaut A,
and love them with omnipotent courage and faith and
unconditional all-encompassing love.*

Omnipotent courage and faith is the virtue of letter K.

Command the fire to do whatever is the highest good of all concerned in the present situation.

Follow inner guidance, letter R.

See the fire through the eyes of Divine Love and enliven its perfect harmonious expression that brings justice and satisfaction to all.

This is the action of the virtues of umlaut O, and O.

Imagine, feel, sense the all penetrating divine will in the fire doing whatever is visualized.

Release any imperfection to Divine Being for transformation, the virtue of umlaut A, ae.

This process can be done in turn with all the elements, not just the fire.

***Meditate with air and the beings of the air which are known as sylphs; or water, and the beings of water known as undines;
and
earth, and the beings of earth known as gnomes,
using appropriate will, visualizations, ideas, feelings, emotions, and sensations for each.***

The manifestation of anything using the elements can be accomplished in this way personally by invoking the spirits of the elements to help you.

Dominion over all that is created has been given to the children of Divine Being.

We inspire understanding and commanding the spirits of the elements.

Divine Love conquers all.

These states of consciousness are a true inheritance of the children of the Divine Creator. Each person is made in the image and likeness of Divine Being.

This applies to spirit, mind, emotions, and body.

The time has come for Heaven to manifest on Earth, so now is the time to master the four elements and establish miracles in this beautiful world.

When you call out to The Angels of the Miracles of the Elements, we guide you through the following eight steps to mastery.

These eight steps are the virtues associated with the eight letters that form our name.

With each of these divine virtues, mastery of them in the fourfold manner of being-will- visualization, ideas, emotion, and sensation, the quadrapolar magnet, is necessary.

T-A-K-A-R-O-S-A

T

The first step is initiation into high inspiration with special reference to all legal matters of this principle.

The letter T in the ancient language represents high inspiration with all the legal matters of this principle.

In the intellect, this virtue awakens remarkable inventive faculties and memory.

In meditating on this virtue, first experience yourself as pure being at one with Divine Being and all creation, then see yourself as a tiny dot in your solar plexus with the rest of the body as an infinite swirling universe all around you.

Meditate with focus on high inspiration from Divine Mind.

Do this with a sensation of warmth and fire filling the body.

See a brown black color shining forth from a tiny sun in the head region.

Hear the musical note of F and feel yourself having mastery over all the elements.

Feel this radiance creating and sustaining the right kidney.

With the out breath, see and feel this radiance passing through the pores of the skin over the right kidney and filling the outer universe.

On the in breath, sense this radiance coming back in through these pores and filling the body.

Keep the rhythm of the breath natural as you perform this mediation to prevent breathing disorders, and dissolve the brown black light in the head when you are finished to protect the natural balance of elements in the body.

By performing this meditation, a connection is made between universal mind and individual mind, so that they become one.

A

The second step is immersion into the highest wisdom.

This sound, the soft ahhhh of a sigh, is the sound of the highest wisdom and enlightenment that can be endowed to a child of Divine Being.

This virtue gives intellectual clairvoyance, clairaudience, eloquence, musical and artistic gifts.

The color is light blue, the sensation is ease, the musical note is G, and the part of the body that is formed by this virtue is the lungs.

When a person unites in meditation with this virtue, mind becomes impregnated with the purity of all ideas in their original form.

On the physical plane, this virtue gives control over the spirits of the air and the gift of levitation.

umlaut A, ae

The realization of wishes regarding physical matter, no matter whether this physical matter is fire, air, water, or earth, is subjected to this virtue.

The sound of this letter, the long A, ae, in the cosmic language is the virtue of the origin and mystery of life and death regarding their transformation.

By meditating on this virtue, a child of God becomes convinced that in reality death does not exist, for the so-called death is only a transformation from one state into another.

Also will come enlightenment on the cause of this transformation.

With this comes the ability to master all negative spiritual beings in all spheres and planes with regard to their scope of action.

The purpose for which negative beings have been created becomes clear.

Since, in the original principle all beings are alike, each having been created by Divine Providence to fulfill a certain task, there is no dissimulation of negative beings, for from the enlightened persons point of view everything is pure.

Here the saying: "to the pure one everything is pure" becomes plain.

If there were no negative beings, it would be impossible to distinguish between good and evil; and if there were no passions, there would also be no virtues.

This virtue confirms the words contained in the Bible: "through night to light", the deep symbolic meaning of which now becomes clear.

In the intellect the ability is gained to see through all thoughts, actions and wishes concerning matter, and of becoming their absolute master.

In the emotions, this virtue represents desires, passions, and the inclination to self-satisfaction etc.

A person who masters this virtue in their emotions becomes absolute master and ruler of all desires and passions.

Also, a person is able to not cling to mental, emotional, and material virtues and objects when they are no longer the highest good of all concerned.

This means complete independence and freedom and fulfills the saying "bind yourself and you will be free".

On the material level this virtue is one of the most materialized.

No matter whether you evoke it in the mind, the feelings, the akasha, or the material world, the earth is influenced by it to a larger extent.

The ability to infuse matter with divine virtues is heightened.

The color of this virtue is loamy brown. The musical note is C.

The element is earth so it has the sensation of weight.

The anus is formed from this virtue.

K

The third initiation is that of omnipotence.

As such, omnipotence manifests itself as the highest power imaginable.

This virtue will reveal itself as the all embracing power by which you will be able to work direct miracles in the micro-as well as the macrocosm.

This virtue is manifested in the akasha principle as the highest and purest light, which is analogous to the fire principle.

This corresponds to the principle of faith on a mental level, courage, and endurance on an emotional level, and mastery of the earth on a physical level.

A

In the fourth step, we again immerse you in the highest wisdom and illumination.

This gives complete control over the element of air and the air spirits.

Then the transformation of imperfection is again enlivened, releasing whatever needs to be changed into another state. umlaut A, ae

R

For the fifth step, we initiate you with the divine virtue of independence and freedom, of following inner guidance.

By this time you have achieved a state of maturity by which your feeling of independence has been transformed into an absolute state of security and unimpeachability.

Mentally, you will have an eminent mind and the emotion of freedom of will and action.

Not only this, but also the state of maturity in which you will never violate a law, having yourself become a master of all laws .

In spite of your freedom of will, you will find yourself willing to subject yourself freely to Divine Providence, and accept missions to serve Divine Providence with deep humility, immense gratitude and the highest devotion without losing your feeling of absolute freedom of will in any way.

Such great ingenuity will proceed from this that you will be able to comprehend any knowledge quickly and without difficulty.

The color of this virtue is golden, the element is earth so it has the sensation of weight.

The musical note is C, and the left side of the nose is formed from it.

Umlaut O, oe and O

In the sixth step, you will experience through our help the ability to see through the eyes of Love Divine, and thereby transmute anything into its perfect divine blueprint.

This brings justice and harmony to all.

Umlaut O, eu

Akasha:

In the principle of consciousness penetrating all, the umlaut O oscillation evokes the most profound cognition which can only be brought about by love divine.

By the help of this a person gets to know all the possibilities of transformation of the spirit, all the systems and ways serving this end, and all knowledge concerning transformation in all other fields.

He/she is informed about everything that, deriving from the act of creation, had to pass through all the mode of transformation to be reunited.

A person must attain all the faculties that are offered by this profound cognition made possible by Love Divine, in the principle of consciousness-penetrating-all, and must make use of all possibilities, in order to get convinced that they cannot be described by words, by must be experienced, lived through.

I have mentioned the letters umlaut A and umlaut O as the last ones in this series of exercises, because by the help of their virtues one is able to comprehend, from the principle of consciousness-penetrating-all, the crown of all wisdom in the micro- and macrocosms, from the act of creation to the present state of evolution, and even to the final development.

Mental:

Evoked in the intellect, the virtue of profound cognition brought about by love divine gives the understanding of the transformation of ideas, virtues, etc. by the quabbalistically pronounced word, is a very great and comprehensive field.

Astral emotional level:

In the feelings, the virtue of profound cognition brought about by love divine develops the faculty of perfect astral projection and the mastery of all occult and magical phenomena that have reference to transformation, so that a person may, for instance, assume any desired vibration in the emotional body without being recognized by other beings and with only Divine Providence seeing through him/her.

Apart from this, a person is able to transform any emotional oscillation into the oscillation he wants and to do the same with any element.

Material:

When mastered in the physical body, the profound cognition brought about by love divine leads to perfect knowledge of quabbalistic [the use of will, thought, emotion, and sensation] alchemy in the material world.

A person is taught the true preparation and charging of the philosophers stone in the physical sense

..He/she can influence, at will, any oscillationatomic, oscillation, electronic oscillation- by quabbalah, and he/she is able to transform it into the oscillation desired by him/her.

Therefore he/she perfectly masters the laws of transmutation and is able to transform any metal into gold, any stone into a precious stone, etc. if desired.

By the help of this virtue a person is furnished with many other faculties of which he/she cannot even dream now and which non-initiates would regard as absolutely impossible.

Umlaut O is dark orange, has the musical note of D-sharp, is the element of akashic-earth which has the sensation of weight penetrating everything.

The ovaries and testicles are formed from this virtue of the profound cognition brought about by Love Divine.

In healing, heal the left ovary first and then the right one.

O

This opens the initiation into the original principle of divine justice.

Mentally you will be able to give expression to the absolute legality of harmony in all four basic qualities of the elements.

You will have a high power of judgment and the ability to comprehend spiritually any legality, any interference by Divine Providence for the sake of justice.

You will never be able to condemn anyone unjustly.

This will bring about the abilities to create any change in the emotional situations that you find yourself in and to have absolute success and happiness on all levels.

This sound is the virtue of divine justice.

This virtue has an ultramarine blue color, the musical note of C, and is the earth element so it has the sensation of weight.

It formed the throat and windpipe.

S

The seventh step is initiation into all-penetrating power, all-power in contradiction to the omnipotence we spoke of before.

This all-power is quantitative in form in comparison to omnipotence which is qualitative in form.

This all-power is to be understood substantially, whereas omnipotence is to be regarded as the highest divine virtue. With all-power you get into contact with the most subtle substance of the divine spirit, i.e., with the original divine fire which works as a substantial power in everything that has been created by Divine Providence.

Omnipotence, on the other hand, is manifested in the original idea as the original virtue of the first divine principle in all the kingdoms and in everything that has been created.

Oneness with all-power gives mastery over the fire principle of desire and will and brings about a state of clairvoyance in its purest form.

Complete control over consciousness results from this.

The color of this virtue is purple red, its musical note is G-sharp, it is the fire element of will and so it has the sensation of warmth, and the gall bladder is the part of the body that is formed by it.

A and umlaut A, ae

And finally, in the eighth step, we again, for the third time, immerse you into the highest wisdom and enlightenment, and transformation of all imperfection.

MIRACLES

Footnotes:

The names and meaning of angel groups come from Quaballah,
which is a very ancient set of teachings which together
form a common precursor, or root, of three of the world's religions:
Judaism, Islam, and Christianity.

Each degree of the zodiac is ruled by a high being of the heavenly host in the
zone girdling the earth,
and the angels who work with him or her.
The being and the angels share the same name.

This name is a key to their powers and influence.

Names, phrases, or sections in the angel messages are quoted or paraphrased
from the books of Franz Bardon.
