**Today the moon is in the 24th day of the 28 day cycle.
The 24th moon day was shared yesterday,**

so today only the sun message is being sent.

4 degrees Virgo

The Angels of Flowers

Also known as

The Angels of

Raschea

Beloved

All flowers on the earth are under our protection.

**The Sun at this degree arouses almighty will to awaken
remembrance
of divine blueprints of perfection and beauty
represented by flowers.**

Flowers are visual manifestations and symbols of divine truths.

Flowers are three dimensional forms that are actual ciphers from The Book of Life.

Flowers are clear and pure testaments of materializations of divine virtues.

*Because flowers are living scriptures of divine consciousness,
we inspire the children of light and love to interpret their messages.*

**Flowers are sexual organs of plants
that resemble various spinning energy centers in the human body,
known as chakras.**

"Ye are made in the image and likeness of God."

**There are seventy two thousand spinning vortexes, or chakras, in
the human body temple.**

**Flowers are similar also to various spinning energy centers in the
earth and in creation.**

**We inspire the understanding of the language of flowers,
and their symbolic divine meanings,
in both their relationships to man,
as well as to universal laws.**

**The color, shape and number of the petals reveal analogies to
universal laws.**

We inspire understanding of their true beauty and purpose.

**We teach you how to understand each flower, plant and chakra,
from the esoteric point of view.**

**We inspire you to grasp the qualities of each flower and use them
for mystical purposes.**

**Colors, shapes and numbers form mandalas that represent
various divine qualities,
in this way flowers out picture an ancient science of symbols and
visual communications.**

This visual science is known as YANTRA YOGA.

The eyes are exposed nerve endings of the optic nerve.

**The optic nerve is connected to the most powerful glands in the
BodyTemple,
the pineal, pituitary, and hypothalamus.**

**The brain speaks in the language of symbols and images,
words have power to the degree that they evoke images in the
imagination.**

**Flowers are symbols that are easily understood in the super and
subconscious minds,
both of which process trillions of bits of information a second.**

The conscious mind processes 4 to 40 bits of information a second.

**By consciously processing the subtle effects of flowers,
the super and sub conscious minds unite with the consciousness to
sense divine omnipotence that creates and sustains all creation,
with clear inner guidance
and omnipresence of divine wisdom and enlightenment.**

**Divine Providence uses the power of sight and smell to bless,
enlighten and purify
the spirit, the mind, the emotions, and the body,
by informing these glands with divine qualities through smell and
the optic nerve.**

**We inspire you to quietly focus in the inner world while looking at
the
mandala formed by a flower,
or with inner sight,
the chakras,
to bring great power and blessings into consciousness.**

Visual images such as these are a most ancient written language.

Doorways of awareness open through colors, numbers and shapes of flowers.

Visual patterns of flowers emit frequencies of divine qualities and virtues.

By meditating on the divine meanings and flowing emotions of colors, numbers, and shapes found within flowers, a Child of Light and Love enters portals of the most exquisite and pure states of being and awareness.

These states of awareness are memories of one's true eternal and immortal unity with Divine Being.

Each color corresponds to a divine virtue, and so does each number.

Here are the divine meanings of numbers.

Number ONE is the first number in the universe and represents the highest form, which is God Himself.

The manifested light, and everything that was made of it, is God in His Oneness.

Whenever the Deity is to be identified, this is done by number one. One means highest cognition, highest unity, highest wisdom.

All evolution starts with this number. It is represented by a dot. The dot in the middle of each flower represents the Oneness of God.

Number TWO
is the number of duality, of polarity, of the positive and the negative principle. In the material world, the two indicates electricity and magnetism, love and hate, light and shadow.

It is always a pole and its anti-pole, of which one could not exist without the other.

It is God and man. It appertains to those religions which regard God as something separate, whereby the dualistic principle is to be found in all forms of existence.

Two is represented by a horizontal line.

The stem of the flower, which connects the blossom to the earth, is represented by the number two.

Number THREE
is symbolized by a triangle.

The three is the number of akasha principal, of fate, of Karma, and is attributed to the sphere of Saturn.

All things on all levels originate from the akasha principle, the fine pre-matter of all existence, and therefore from the number three.

It is the original idea of procreation.

Man and woman and child. Also it represents spirit, soul, and body.

It is the number of intuition, life and death, and cognition in its highest form.

Many flowers have patterns of three or multiples of three.

When you gaze upon such a flower, remember the unity of your spirit [will], soul [feeling] and your body.

**Number FOUR
is the perfect number of mastery of creation.**

It is represented by Jupiter.

It represents the four basic elements of fire, air water and earth.

**It also represents the four directions,
the four fundamental features of God,
which are omnipotence, wisdom, love - immortality, and perfect
consciousness.**

**It is the number of everything that is created in the visible and the
invisible worlds.**

**It is highest wisdom and the number of length, width, height, and
depth.**

**It is represented by a cross with arms of equal length, or by an
equilateral quadrangle.**

Think of the lovely dogwood flower with its four perfect petals.

It blooms early in the spring after the cold of the winter.

**The next time you behold this flower,
ask the Angels of Flowers to initiate you with its esoteric meaning.**

**Number FIVE
is the perfect representation of the microcosm, of man in
all his phases and forms of existence.**

It represents the microcosm in its perfection.

**The working of the four elements, ruled by the akasha
principle, is represented by five and also expresses the power and
the
might which is symbolized by Mars.**

**All active magic belongs to this number and is represented by a
pentagon.**

**Many flowers have five petals
and can connect you with power and might and individual
perfection.**

Flowers are similar to telephone numbers in that you can connect yourself with the actual divine qualities that they represent by attuning to their energy.

Even if you do not know the meanings of the numbers and the colors, by asking for our assistance, we can flood you with the divine qualities in your intuition.

**Number SIX
represents the macrocosm in its perfection.**

It is represented by an equilateral hexagram.

**This is the number of man when he finally reaches that state of enlightenment
in which he is one with God.**

Jesus referred to this number when he said, *I and the Father are One.*

The lower triangle of the hexagram denotes, in the mystical sense, man with his three dimensional aspect of body, soul and spirit.

The upper triangle of the hexagram points to the three-dimensional unification and influence of divine power and virtues in the mental, feeling, and physical worlds.

Number six represents the sun and all spherical miracles.

When you hold a flower with six petals in your hand, ask us to connect you with this energy of the sun and your oneness with the Creator.

Close your eyes and become receptive.

We will establish a column of light that fills you with the vibration of the true esoteric qualities of the flower.

This is our gift to you and it is very powerful.

Great healing and enlightenment is possible through the use of flowers in this way with our help/.

**Number SEVEN
is the number of harmony, fertility, propagation and growing.**

It is also the number of love with all its phases, no matter whether the lowest form of love or the highest cosmic aspect of love.

Mercy, benevolence, virtuousness, and happiness are also aspects of love.

It is the number of beauty, purity, and harmony.

It is the number of Venus, the seven basic notes, the seven states of maturity [chackras], and is represented by a septangle.

There are various symbols for seven.

A great triangle with a square in its middle or vice versa, for instance.

The colors of the rainbow are also the seven vibration.

Flowers with seven petals or multiples of seven carry this vibration of love.

Whenever you give someone a flower, if you ask us to impregnate their spirit, mind, emotions, and body with the true esoteric vibrations of the flower, we bless them with such healing and enlightenment as you could ever wish.

Many miracles are performed with the help of flowers.

**Number EIGHT
is the number of the mind, the intellect, and thus the number of knowledge.**

It is analogous to the planet Mercury.

The octagon is a symbol of the Native American Medicine wheel in all of its forms.

All knowledge, actual or theoretical, is a part of the eight vibration.

**Number NINE
is symbolized by three equilateral triangles interlacing one another.**

It represents the original idea of the astral or feeling world.

It is the number of motion, of rhythm and thus, of life in its most subtle form.

It is the number which prepares every situation in the astral or feeling world for the material world.

It represents the moon.

It is the highest number.

**The number TEN
is the last number. It is the reflection of number one in its roughest form.**

Ten is the number of physical matter, the number of realization.

Ten is called The Kingdom in Hebrew Quabbalah.

The human body is subject to number ten, and so also is the mineral, vegetable, and animal kingdom, and everything that is perceived by the five senses.

Its symbol is a circle with a cross consisting of eight arms in its middle, contrary to number one which is usually symbolized by a dot or a circle as the sign of infinity.

Ten can also be represented by a square with a circle drawn in its middle.

Ten is the starting point on the way to God.

Fragrances from flowers go directly into the cranial cavity through the nose with each in breath, chemically activating higher consciousness.

A flower is a portal.

This is one way to use it:

The next time you see a flower, imagine that it fills the universe and that you are a tiny dot diving into its center.

**As you fly into and through its center,
ask to speak with the heavenly hosts of the flower.**

**You will immediately come upon great beings and taught its
meanings.**

**Ask to receive complete initiation of the divine virtues embodied
within.**

Divine qualities and virtues fill and surround you.

**As you and the flower merge as one, imagine yourself and the flower
growing very large- filling the entire outer universe with blessings.**

**When ready, ask to come back.
Return to normal waking consciousness and size.**

**You may summon the heavenly hosts of the flower and send them to
another whenever you wish to bless someone.**

**Spend deep time in meditation with flowers.
Great, Oh GREAT are the blessings thereof.**

**Today, as you receive this angel message from the heavenly hosts of
flowers, imagine all of the flowers that bless and beautify the world.**

**According to The Law of One,
the Highest Good of All Concerned,
meditate and visualize, feel, and sense the divine virtues and
healing energies
of all flowers powerfully imprinting all of creation
into highest and purest consciousness,
feeling
and attunement
to the Omnipresence of Divine Being.**

R-A-Sch-E-A

R

This is the sound of the divine virtue of independence and freedom. After learning all of the virtues associated with all of the letters of the alphabet in order starting with A, by the time you reach the letter R you have achieved a state of maturity by which your feeling of independence has been transformed into an absolute state of security and unimpeachability. Mentally, you will have an eminent mind and the feeling of freedom of will and action.

Not only this, but also the state of maturity in which you will never violate a law, having yourself become a master of all laws. In spite of your freedom of will, you will find yourself willing to subject yourself freely to Divine Providence, and accept missions to serve Divine Providence with deep humility, immense gratitude and the highest devotion without losing your feeling of absolute freedom of will in any way. Such great ingenuity will proceed from this that you will be able to comprehend any knowledge quickly and without difficulty.

The color of this virtue is gold, the musical note is C, the element is earth so it is felt with a sensation of weight, and the left side of the nose is formed from it.

A

This sound [a soft a like a sighahhhhh] and virtue is an initiation into the highest wisdom and the purity of all ideas in existence. This has as a fundamental feature the enlightened mind. Reasoning, perception, the cognition of the most profound truths, highest knowledge, high intelligence, and the arousing of all intellectual faculties are expressed.

Musical gifts, eloquence, poetic talent, and clairvoyance, clairaudience, the art of levitation, and the control of the air element and its beings are all aroused by this initiation. On the physical plane the command of the beings of the air, control over storms, are all made possible by initiation into the highest wisdom.

The color of wisdom and enlightenment is light blue, the musical note is G, the element is air so it has the sensation of ease, and the lungs are formed from it.

SCH

This is the virtue by which Divine Providence creates the first outpouring of divine creation. It is regarded as the highest virtue. The virtue of Sch connects both original light and original fire, and thus indicates the non-manifestable omnipotence.

The S oscillation is the original fire [all penetrating will]. The K oscillation is the original light [omnipotence].

The Sch therefore represents the original principle superior to the K and S.

It is pointed out in the cosmic language that Divine Providence has created the original principle of the elements by the three letters A, Sch and M, and that all other letters derive from these letters. A is analogous to the original element of the air principle, Sch to the original fire and M to the original water element. The A is analogous to the intellect, to wisdom, to the legality of equilibrium etc.; the Sch to will power, to all-power and omnipotence and the M to love.

Akasha: In the principle of consciousness-penetrating-all, this virtue is the original element of fire, light, and the highest form of enlightenment.

Mental: This virtue brings about the highest enlightenment, the highest spiritualization, which increases to the point of ecstasy.

Astral: In the emotions, this virtue evokes the original state of the manifestation of faith and the ability to transmutation and perfect mastery over the fire element in all kingdoms.

Material: In his or her material body, a person strengthens his or her absolute faith with this virtue. The faculty of influencing everything in the material world by the help of will is gained.

This is the original masculine electric power of DIVINE WILL.

Its color is blazing red. Its musical note is C. It is the element of fire so it is felt with warmth. The brain is formed from this virtue.

E

This letter is the sound of universal consciousness, which represents, as a divine idea and virtue, its omnipresence in everything that has ever been created.

This unites your normal consciousness with the universal consciousness, with the cosmic consciousness, so that you can attain, in the akasha principle, omnipresence yourself. This is known in oriental wisdom as Nirvi-Kalpa-Samadhi. You attain the highest form of intuition in your mental world; you transfer your consciousness so that there exists no sense of time and space. Divinity in His highest form is able to speak through you. The most profound mysteries of materialization and dematerialization become obvious to you as you master this, everything that is material may be transferred back into its refined and most subtle form and any idea can be intensified in such a way that it

becomes physically visible.

The color of this virtue is deep violet, the musical note is D, the element is akasha, which has the sensation of God-penetrating-all, and the spine is formed from it.

A

The virtue of wisdom and enlightenment and the transformation of all imperfection into a higher state is the final outcome of understanding the language of flowers.

Footnotes

The names and meaning of angel groups come from Quaballah, which is a very ancient set of teachings which together form a common precursor, or root, of three of the world's religions: Judaism, Islam, and Christianity. Each degree of the zodiac is ruled by a high being of the heavenly host in the zone girdling the earth, and the angels who work with him or her.

The being and the angels share the same name.

This name is a key to their powers and influence. Names, phrases, and sections, in the angel messages are quoted or paraphrased from the books of Franz Bardon. Information of the heavenly hosts of the zone girdling the earth is referenced from THE PRACTICE OF MAGICAL EVOCATION, ISBN 3-921338-02-6, and Information of the divine virtues and the letters are referenced from THE KEY TO THE TRUE QUABALLAH, ISBN 3-921338-12-4]. Publisher is Dieter Rüggeberg, Wuppertal/W. Germany. These books have very important information for these studies.

The book " Initiation into Hermetics" ISBN 3-921338-01-8, is a preparatory book for the others.

Franz Bardon's last autobiographical book, "Frabato the Magician", gives historical background and was compiled by his German publisher from notes written by Franz Bardon.

THE LAW OF ONE

***We are all one.
When one is harmed, all are harmed.
When one is helped, all are helped.
Therefore, in the name of who I AM, and I am one with all there is;
I ask that only THE HIGHEST GOOD OF ALL concerned happen .
I give thanks that this is done.***

So it is!***
