The Angels of Sacred Oils and Essences

Also known as

The Angels of

Buriuh

Beloved,

We help people gather flowers, herbs, oils, and other
substances
for making incense, sacred oils, essences, and objects,

that contain healing and spiritual properties.

**By using Divine Virtues with meditation,
it is possible to charge these with ever greater powerful
divine qualities.**

**There is a cause-effect relationship
between the inner world of each Child of Light and the
outer worlds.**

**This relationship is spoken of
as the relationship between the micro- and the
macrocosm.**

**This is represented by the well known phrases
As above, so below,
*"As within so without".***

***Depending on faith, omnipotence of will,
visualization, purity of thought,
clarity of flowing emotions,
and imagined sensations in the inner worlds
of meditation,
the space of physical forms in the outer
worlds, through intent,
are charged with desired divine qualities.***

**This principle has been used in spiritual practices since
time began.**

**Now is the time when science is confirming what adepts
have long known,
that one good man can save a city of ten thousand,
and ten can save the world.**

**Over time, a full picture is emerging, through these messages, of
the
exact nature and process of human interaction with divine virtues
as well as with the heavenly hosts.**

**Divine Providence has decreed that everything be revealed,
that this knowledge be made available at this time.**

Now is the time for the full inheritance of the children of Love to be understood and received.

Now the words of the Masters, that *ye shall do all things*, must come true as the prayers *that earth should be as heaven* are answered.

"All that I do, ye shall do and more."

In this time of the Golden Age, the Alpha and the Omega, the Children of Light and the Heavenly Hosts permeate physical matter with Divine Virtues.

Because of the fifth element, known as akasha, it is possible for a child of light to connect with and be one with the unified field of life and consciousness, that contains all individualized beings.

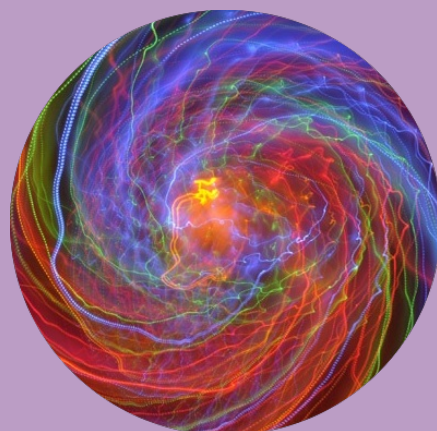

>From this place of oneness, it is possible to create any change for the highest good of all.

Oils and essences can be changed as well, to carry and embody frequencies of almost miraculous powers of divine qualities.

Depending on faith, omnipotence of will, and visualization and purity of thought, clarity of flowing emotions, and imagined sensations, the space of physical forms and essences are filled with desired divine qualities.

When you call in the heavenly hosts to help you with this, we perfectly permeate spaces of physical objects or substances with desired divine virtues whenever fate allows.

For example, sacraments that have been charged with divine qualities used in sacred prayer, ceremonies, and temple services more powerfully attract changes desired on spiritual levels.

Remember that solid matter is not solid at all.

Everything, on all levels, is mostly space.

**Space, even in physical objects,
is to be flooded with energy of divine attributes
by the use of will-visualization, thought, emotions, and sensations.**

**"Thy kingdom come, thy will be done,
on earth as it is in heaven."**

**In this way the frequencies and vibrations of infinitely tiny particles
change.**

Whenever you wish to create changes on the physical level,

**remember
that first comes a state of oneness, of pure being and unity with
Divine Being and all creation.**

**Then comes will or desire, which is the spiritual FIRE electrical
element,
then comes visualization and thought, which is the mental
AIR element, then come flowing emotions of the desired
manifestation,
which are the emotional WATER magnetic element, and finally the
sensations of physical effects that manifest into form, which are the
EARTH element.**

**This is accomplished through Delta, Theta, Alpha, and Beta
brainwave consciousness.**

**The most important component, however,
is the power of divine love that is generated in the heart.**

**To spiritualize any substance, such as oils, incense, and objects,
the ability to comprehend and use meditation,
especially the cosmic language of divine virtues, is important.**

**Meditate on each divine virtue with all its aspects,
including its color and element [fire-warmth, air-ease, water-
coolness, and earth-gravity/weight].**

**As this is embraced in the imagination in the inner worlds of
meditation, an information
packet of fire, air, water, and earth is created that informs space
and matter to manifest in the outer worlds with intent and breath.**

Here is a list of the letters as they relate to the elements.

*[The meanings of the letters are available in other messages, or in the books by Franz Bardon, see
footnotes.]*

**Cut and paste this list into a separate file on The Power of The
Word for future reference:**

Analogous to the fire element is:

In the akasha principle [consciousness penetrating all,

omnipresence]: letter Sch

In the mental kingdom: letter H

In the astral kingdom: letter S

In the physical matter: letter T

Analogous to the air element is;

In the akasha principle: letter A

In the mental kingdom: letter C

In the astral kingdom: letter L

In the physical matter: letter H

Analogous to the water element is:

In the akasha principle: letter M

In the mental kingdom: letter N

In the astral kingdom: letter W

In the physical matter: letter G

Analogous to the earth element is:

In the akasha principle: letter umlaut A, ae

In the mental kingdom: letter I

In the astral kingdom: letter F

In the physical matter: letter R

**Therefore, for example, if one wants to gain absolute mastery over the
fire principle, or principle of omnipotence,
you would use the four letters of the fire element in the following
ways:**

**The divine virtue of Sch, omnipotence as the original will including
quality and quantity,
is experienced and willed in a deep state of pure being,
of consciousness-penetrating all.
This is the state of experiencing omnipresence with Divine Being
and all creation. [akasha]**

**This is the natural Delta brainwave state of pure being and unity
with Divine Being
and all creation of the Divine Infant self,
and also of deep dreamless sleep each night.**

**The divine virtue of H, The Power of the Word,
which is imagined alignment of being, will, thought, emotion, and**

**sensation on a desired divine quality,
is contemplated in the mind - [mental kingdom].**

**This is the deep inner thought Theta brainwave state of the inner
child self.**

"Ye must be as little children to enter the kingdom of heaven."

"The kingdom of heaven is found within."

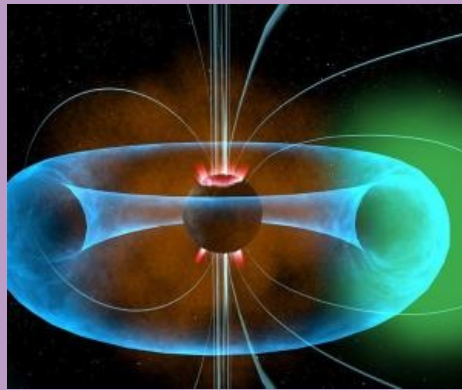

**The divine virtue of S, omnipotence as a quantity affecting all,
is felt with flowing emotions- [astral kingdom].**

**This is the Alpha brainwave state of the deeply emotional inner
adolescent self.**

**The divine virtue of T, high inspiration concerning whatever is
focused on, is sensed, understood,
and remembered in the material world- [in the physical matter].**

**This is the Beta brainwave state of the five senses,
memory, logic, and linear thought of the adult self.**

MIRACLES

B-U-R-I-U-H

**The letter B vibrates to a beautiful light violet color and is the
earth element, so it is felt with a sensation of weight and gravity in
meditation.**

This is the divine virtue of the right eye.

**Because it is an earth element virtue,
it is imagined as a tiny sun shining in the legs and feet.**

Its musical note is A.

**Just as there are two legs and two feet, this letter represents
polarity, the two sides of everything in existence: the positive and
the negative,
the left and the right, the inner and the outer, the up and
the down, the hot and the cold, the masculine and the feminine,
the light and the dark, electricity and magnetism etc.**

**Attunement to this principle of polarity in Universal Consciousness
gives special mastery over will [fire, electricity, masculine creative
energy]
and flowing emotion [water, magnetism, feminine receptive
gestation energy, change].**

It is control of these two, will and emotion,

**that makes it possible to impregnate the space of physical forms
with desired virtues.**

**The use of will and emotion is
key in CHANGING ANY MATERIAL FORM OR LIQUID SO THAT IT IS
CHARGED WITH DIVINE VIRTUES.**

**The letter U in the cosmic language
represents the faculty of comprehending the creative act and its
relationship to karma.**

**It evokes the highest form of intuition and inspiration
and makes possible the understanding of ones own karma, or
someone else's, and its modification.**

**It also makes possible the transfer of consciousness to any state
imaginable
and this results in states of highest trance.**

**In deep trance, the causes of anything is seen, and the causes can
be changed,
and thereby the effects are also changed.**

**The ability to see the effects of this change through time is
attained.**

**This letter is imagined as shining velvet black
and is practiced in the solar plexus and then in the legs and feet.**

This letter enlivens the pancreas.

**The musical note of changing fate is B, and it is the element of
Akasha,
which has the sensation of God-penetrating-all in meditation.**

**The sound of the letter R is the divine virtue
of becoming the master and guardian of freedom and
independence.**

**In this state there is the
feeling of freedom of any pressing burden of the laws,
for by the mastery of all the preceding virtues you have achieved a
state of
maturity by which this feeling of independence has been
transformed
into an absolute state of security and unimpeachability.**

**This comes from the realization of the harmony and perfection of all
divine laws and the
identification and love of them so intensely that they have actually
become merged with oneself.**

**In this case you are the personification and
representation of the divine laws and they will serve you,
and your sense of freedom will derive from them rather than in
spite of them.**

**The R, with its golden color, resides as the spiritual quality of divine
freedom and independence,
of following inner guidance.**

The left side of the nose is formed from this virtue.

The musical note is C, and it has the sensation of weight.

The sound of the letter I is the virtue of Cause and Effect.

The law of cause and effect is the law of evolution of everything.

**This law gives the understanding and mastery of the akasha, or
subtle pre-matter principle.**

The sensation of akasha is God-penetrating-all.

**The understanding of cause and effect also enables the perfection
of memory and conscience.**

**The letter I with its light opalescent color, representing the law of
cause and effect, is the spiritual essence of the left kidney.**

This virtue is of the earth element, so it has the sensation of weight.

The musical note is G.

U is the sound of the creative act, and the karma resulting from it.

**On the material plane, this letter oscillation makes one understand
and apply the secrets of the akasha principle in respect to matter
and impart the faculty of comprehending the mode of action of the
quadripolar magnet to the whole of matter,
of penetrating into all its mysteries and of mastering it.**

**The *quadrapolar magnet* is a term used by mystics of old
that refers the four levels of consciousness that are will, intellect,
feeling, and sensation [form].**

H is evoked, which represents the power of the word.

**H represents this process itself, these practices, of empowering
each letter with cosmic
significance through these visualizations and meditations.**

**Thus, the power of the word IS the cosmic language as we have been
discussing.**

H is to be visualized as a silver violet color with warmth.

**In practice, see this color, this ability of using cosmic language
with a sense of
warmth and expansion in the region of the head**

and in the right arm since it is the enlivening principle of the right arm.

The mastery of the H dynamic enables you also to imbue every other letter with greater creative power.

Mastering this ability deepens your understanding of Divine Providence
not only with the intellect, but also with symbols,
in the form of pictures with the spiritual senses.

The repetition of the exercises with the letter H oscillation results
in the highest form of clairvoyance.

All of the mantra and tantra practices can be comprehended in this
manner
and the full meaning of the words,

It shall be,
is revealed to you in its cosmic sense.

To understand Universal Consciousness, and immortality,
it is very helpful to read the first three volumes of The Life and Teachings of the Masters of The Far East by Baird Spalding
The first three volumes are field notes taken on a scientific expedition to Nepal in the late 1800's.

**The Law of One is the original law of Creation,
and is the supreme Law over all laws in all dimensions.**

THE LAW OF ONE

**We are all one.
When one is harmed, all are harmed.
When one is helped, all are helped .
Therefore, in the name of who I AM, and I am one with all there is;
I ask that only THE HIGHEST GOOD OF ALL concerned happen.
I give thanks that this is done.**
