## The Angels of Mathematics

Also known as

The Angels of

## Cheikaseph

Beloved,

*All people who work with numbers are under our guidance and protection.*

*Mathematics and sacred geometry are excellent ways to access the greatness and love of Infinite Divine Mind.*

***We inspire highest spiritual ideals  
expressed as mathematical formulas.***

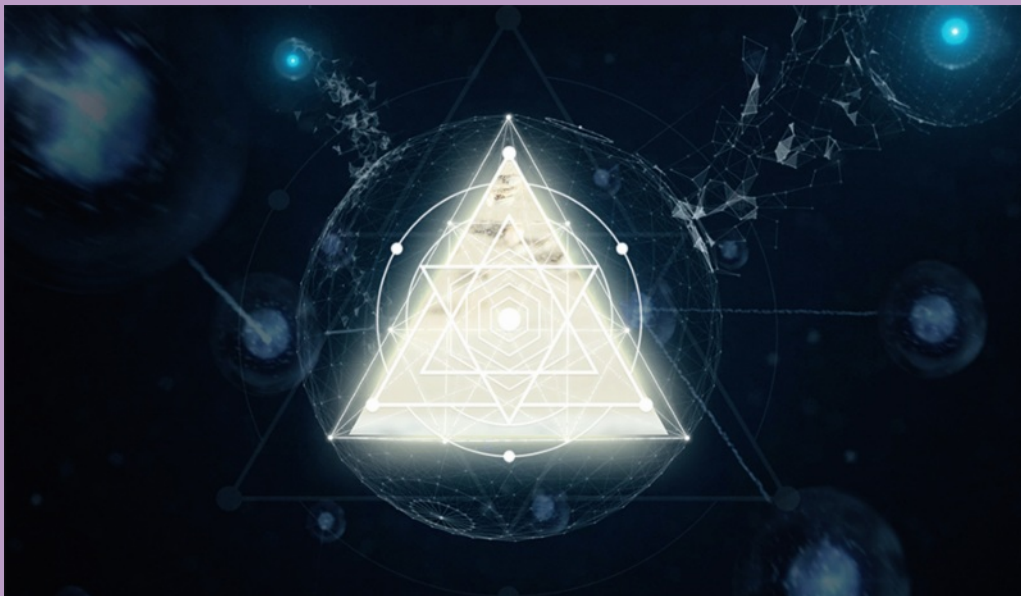

***The understanding of numbers and mathematics reveals perfect  
understanding  
of rhythm and cycles, and therefore of motion.***

**Many of these ideals are expressed through  
mathematical formulas,  
and through visual images,  
such as crop circles,  
and  
shapes of flowers and crystals.**

**These formations exemplify the range of profound  
truths  
about the micro-and macrocosm  
that can be expressed mathematically.**

**Even if a person has felt challenged by mathematics,  
with our help he or she can more easily understand  
seeming complexities of the world of numbers.**

**We are regarded as original initiators into mathematics on earth.**

**When the optic nerve is stimulated by such formations,  
specific responses are triggered  
in the pituitary, pineal, and hypothalamus glands.**

**Our range of competence varies from the easiest adding operations  
to the most difficult mathematical problems expressed by  
astronomical  
figures, including the basic ideas of the mathematical figure,**

**of measurements and weights in relation to matter.**

**From us learn how to express an idea in mathematical terms,  
and also how to master the knowledge of quantities and qualities.**

**We show you how the four operations of adding, subtracting,  
multiplying and dividing  
relate to quabbalistic science,  
to the elements of the micro-and the macrocosm.**

**We are the 225th degree of the zodiac,  
so the number that corresponds to our vibration is the number  
nine.**

**NUMBER NINE is symbolized by three equilateral triangles  
interlacing one another.**

**It represents the original idea of the astral, emotional, or feeling  
world.**

**It is the number of motion, of rhythm and thus, of life in its most  
subtle form.**

**It is the number which prepares every situation  
in the astral or emotional world for the material world.**

**It represents the moon.**

**It is the highest number.**

***The understanding of numbers and mathematics  
gives a perfect understanding of rhythm and cycles, and  
therefore of motion.***

**As always, the understanding and mastery of the divine virtues  
associated with the letters of our name is the key to our part of the  
divine mystery.**

**Ch... This is the sound of flowing emotions of clarity and perfect  
purity.**

**A mathematician becomes one with this divine virtue  
so that his or her emotions are attuned to the original purity of all  
ideas in divine mind.**

**These beautiful emotions stimulate the secretion of certain  
glandular chemicals  
that enable any language to be understood easily.**

**Clear and pure emotions facilitate the understanding of the perfect universe of numbers.**

**Clarity and perfect purity of emotion is light violet, the musical note is D-sharp, it has the sensation of coolness because it is the water element of feeling.**

**The left leg is formed by this virtue.**

**Remember that in meditating on these letters, visualize and sense yourself as a tiny dot located in your own solar plexus.**

**Your body is a universe surrounding you.**

**You meditate on the color, note, sensation, feeling, and meaning of the divine virtue that you wish to manifest.**

**As you manifest the divine virtue within your own body through being, will-visualization, contemplation, emotions, and sensations, you also manifest it in the outer universe through the breath and intent.**

**E... This letter in the ancient language represents the divine virtue of omnipresence.**

**In the emotions, this virtue gives control over the emotions of oneself and others, and the ability to understand the language of all beings, including the language of numbers and mathematics.**

**The letter E has the musical note of D, is of the dark violet color, and is meditated on with the feeling of God-penetrating-all.**

**I...We teach the children of God to evoke the greatest miracles in the physical world as masters of dimensionality.**

**The meditation on the virtue of Cause and Effect enables mastery of the chief components of the material world, which are shape, measure, number and weight.**

**The color of this divine virtue is light opal. The musical note is G. The element is earth, so it has the sensation of weight. The left kidney is formed from it.**

*Every embodied soul has within itself all the necessary resources to evolve towards a greater Light... if Love is its guiding beacon.*

**K... In the akasha, the subtle pre-matter, this virtue of omnipotence is the highest and purest light and is analogous to the original fire, or desire principle.**

**In the mind, it manifests as the state of faith.**

**This is the faith that was spoken of in the Bible that could move mountains and “do all things”.**

**In the soul, which is also called the astral or feeling body, this virtue manifests as endurance, toughness, courage, and the ability to remove any feeling of fear within yourself or within others.**

**In the study of mathematics, this virtue is necessary in order to blaze a way through all the complexities to arrive at the ultimate simplicity.**

**Since it is the fire and air element, it has the sensation of warmth and ease; it has the musical note of B, and the color of silvery blue.**

**A... This letter represents wisdom and enlightenment.**

**This virtue connects the mind with the original purity of all ideas.**

**Meditate intellectually on this virtue, aligning your will and intent with this in Divine Mind.**

**At the same time, imagine this virtue as Light Blue light filling first the chest and then all of inner space within your body with a feeling of ease, and the musical note of G.**

**Soft A, as in ahhhh**

**To quote from a Quaballistic text: ‘...the student advances on to no longer getting the light blue color oscillation of letter A into his chest**

**by breathing it in through his mouth or nose, but through the circumference of his/her chest region, similar to breathing through the pores.**

**Also, the student must try to achieve sufficient dynamics by repeatedly using his imaginative faculty.**

**The student must be capable of drawing any letter oscillation into the respective region of the body and emitting it again, inductively and deductively, in a simple or condensed state.**

**These exercises have to be repeated until such a proficiency is achieved that the student can do all the quabballistic tasks mentioned so far with effortless ease.’**

**Umlaut A, ae...Transformation and the mysteries of life and death.**

**This virtue reveals the power of recognizing and then releasing any imperfection, on any level, in self or other, back to Divine Being for change into another state that is the highest good of all concerned.**

**S... This sound is the sound of all-penetrating-power.**

**This power is used to completely saturate all of creation on every level, including the molecular structure of physical objects, with the energy of divine consciousness.**

**The color of this virtue is purple red, its musical note is G-sharp, it is the fire element of will and so it has the sensation of warmth, and the gall bladder is the part of the body that is formed by it.**

**E... Through the Virtue of Omnipresence, a mathematician unites ordinary consciousness with cosmic consciousness.**

**This virtue confers on the mathematician the mental quality of the universal transference of his/her consciousness.**

**P...This is the divine virtue of the urge for spiritual perfection.**

**This virtue awakens divine nostalgia, the longing for purification and transformation of one's being, and the ability to perceive beauty universally, as the quality of God manifesting in form.**

**This virtue inspires a mathematician to see the perfection of Divine Consciousness manifesting through numbers and mathematics.**

**The color of this virtue is dark gray, the musical note is B. It is the earth element, so it has the sensation of weight. The right side of the nose is formed from it.**

**H... This letter represents the Power of the Word. Each letter represents a divine virtue.**

**Each divine virtue has mathematical correspondences.**

**For instance, the letter A, being the first letter, corresponds to the number one.**

**This virtue of The Power Of The Word is the out picturing of divine virtues into being, will-visualization, thought, emotions, and sensations, utilizing the four brainwave patterns of Delta, Theta, Alpha and Beta.**

**This manifests divine virtues into form and this is the speaking of the ancient language.**

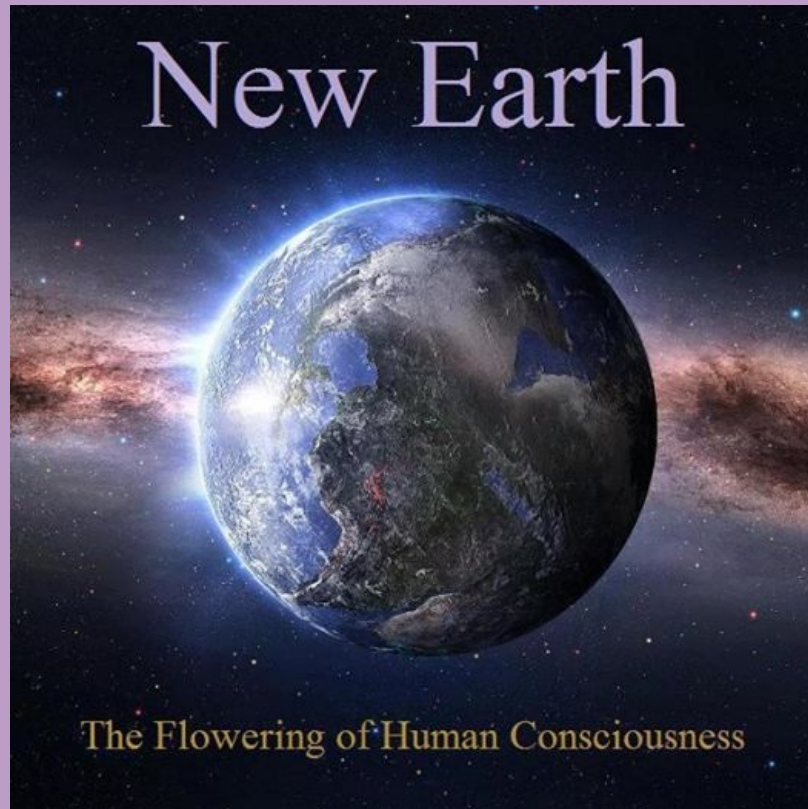

**The ancient language is the use of each letter so that the entire brain is utilized.**

**In speaking the letter A, for instance, the sound of A is toned with the musical note of G**

**and the imagination of the color sky blue, with the SENSATION of ease,**

**WILL to unite with all wisdom and enlightenment of Divine Mind, CONTEMPLATION of wisdom and enlightenment with the mind, flowing EMOTIONS of eloquence, music and poetry, clairaudience, and clairvoyance, and sensations of relaxation and ease.**

**In other words, the Delta brainwave, which is the brainwave pattern of pure being and unity with Divine Being and all creation, is then used with WILL.**

**Then the Theta brainwave of deep inward thought is activated with CONTEMPLATION, the Alpha brainwave of emotion is used with flowing EMOTIONS, and the Beta brainwave of the five senses, memory, and logic is used with SENSATIONS.**

**This is done from the point of view of the "As above, so below."**

**Imagine yourself as a tiny dot located in your own solar plexus with your body as an infinitely huge universe all around you.**

**From this vantage point, imagine toning the letter A in the musical note of G,**

**while the light blue color shines from a tiny sun in the lungs and fills the entire body.**

**At the same time, contemplate on wisdom and enlightenment and the sensation of ease filling the entire body, or whatever inner guidance directs.**

**With the out breath this is visualized as passing through the pores of the skin over the lungs and entering whatever inner guidance directs.**

**With the in breath, it returns through these same pores and enters the body.**

**Dissolve the light in the body when you are finished to protect the natural balance of elements in the body.**

**Learn to keep the rhythm of the breath natural at all times to prevent breathing problems.**

**This becomes easy and automatic with practice, as in learning any language.**

**Because of the law of correspondences, the "As above, so below" law,  
the outer universe becomes filled with the divine virtue of wisdom and enlightenment at the same time that the body does, during this use of the letter A.**

**In doing this, a child of God learns to understand how Divine Providence created everything.**

### **Footnotes**

**The names and meaning of angel groups come from Quaballah, which is a very ancient set of teachings which together form a common precursor,**

**or root, of three of the world's religions:  
Judaism, Islam, and Christianity.**

**Each degree of the zodiac is ruled by a high being of the heavenly host in the zone girdling the earth,**

**and the angels who work with him or her.**

**The being and the angels share the same name.**

**This name is a key to their powers and influence.**

**Names, phrases, and sections in the angel messages are quoted or paraphrased from the books of Franz Bardon.**

**Information of the heavenly hosts of the zone girdling the earth is referenced from THE PRACTICE OF MAGICAL EVOCATION, ISBN 3-921338-02-6,**

**and Information of the divine virtues and the letters are referenced from THE KEY TO THE TRUE QUABALLAH,**

**ISBN 3-921338-12-4]. Publisher is Dieter Rüggeberg, Wuppertal/W. Germany.**

**These books have very important information for these studies. The book "Initiation into Hermetics"**

**ISBN 3-921338-01-8, is a preparatory book for the others.**

**Franz Bardon's last autobiographical book, "Frabato the Magician", gives historical background and was compiled**

by his German publisher from notes written by Franz Bardon.

The Law of One is the original law of Creation,  
and is the supreme Law over all laws in all dimensions.

### THE LAW OF ONE

We are all one.

When one is harmed, all are harmed.

When one is helped, all are helped.

Therefore, in the name of who I AM, and I am one with all there is;  
I ask that ONLY THE HIGHEST GOOD OF ALL CONCERNED happen .  
I give thanks that this is done.

SO BE IT.  
So it is.
