## **The Angels of Infants**

Also known as

The Angels of

## **Aglasis**

Beloved,

**We are the guardians of all babies and infants, be they human or animal.**

**We inspire the sons and daughters of divine being  
to remember The Law of One,  
the highest good of all concerned,  
to protect those who are innocent and vulnerable,  
to safeguard infants and mothers.**

**We also protect everything that has to do with milk.**

**We have inspired mankind over time to make milk products of all kinds**

from the milk of animals in a way that is the highest good of all.

**In infancy the Delta brainwave pattern of Pure Being and unity with Divine Being and all creation is dominant.**

**We help preserve this state of awareness in all People of Light and  
Flowing Love,  
regardless of physical age,  
so that important chemicals are  
produced through glands that result in youthening  
and other divine physical manifestations.**

***Ye must be as little children to enter the Kingdom of God.***

***"I have not given you the spirit of fear, but of joy, and life everlasting."***  
**In infancy the Delta brainwave is dominant as consciousness is a state  
of pure being  
in which one naturally and instinctively experiences  
divine life, love, omnipresence and Omnipotent will for the highest  
good.**

**In childhood, the brainwaves of DEEP INWARD THOUGHT or Theta are  
dominant.**

**It is in Theta that oneness with all and the will for the highest good of  
all becomes thought,  
it is contemplated, and the original purity of all ideas in Divine Mind  
are accessible.**

**About the time of adolescence, the dominant brainwave pattern  
becomes Alpha,  
which are emotions, feelings, flowing, and the change process.**

**To experience whole brain functioning, enlightenment and wisdom,  
transformation, grace and mercy, the splendor and majesty of Divine  
Being, all-penetrating-power, and the mastery of cause and effect  
*[which are the divine virtues of our name] ,***

these brainwave patterns are  
consciously maintained through meditation,  
even when adult Beta brainwaves of logic, memory,  
and the five senses normally become dominant after puberty.

This is precisely why enlightened masters that are in a heavenly state of  
consciousness  
exhibit faith and innocence and other childlike mannerisms.

We inspire seekers to know that an enlightened Child of Light  
IS a divine infant and child at the same time  
that they are eternally youthful, ancient and wise.

The Alpha and the Omega exists in cellular memory that can be  
remembered  
and be awakened within each person through meditation and prayer.

As a person understands that the four-fold nature of reality;  
being-will, intellect, emotion and sensations, are one continuum of  
energy  
that develops during life, then great emphasis is put on  
maintaining ones self identity as an infant,  
a child, an adolescent and an adult together.

The infant Delta brainwave state of Pure Divine Being generates  
omnipotent divine Will,  
which is the fire element of Cause and electricity.

*From the states of pure being and unity with all, and  
divine will,  
the purity of all original ideas in Divine Mind become  
accessible.*

**This is wisdom and enlightenment, an air element.**

**Wisdom is the divine virtue of the first letter of our name Aglasia.**

**>From wisdom comes the understanding and feelings that all are one,  
and that what affects one goes out like ripples in a pond and affects all.**

**>From this understanding comes the desire to release all imperfections  
on every level of being back to Divine Being for transformations  
into other states which are the highest good of all.**

**This then becomes flowing emotions of grace and mercy, the letter G,  
the next letter of our name.**

**These emotions attract true divine blessings, abundance, and  
peacefulness of the spirit.**

**The letter L is the virtue of the splendor and majesty of Divine Being,  
which is the being, will, thoughts, emotions,  
and sensations of all the divine virtues taken together.**

**This virtue enlivens vitality, true spiritual morality and eternal youth.**

**The next letters, A and umlaut A, ae, are enlightenment and then  
transformation.**

**Transformation is the virtue of the origin and mystery of life and death  
regarding their transformation.**

**By meditating on this virtue, a Child of Light becomes convinced that in  
reality death  
does not exist, for the so-called death is only a transformation from one  
state into another.**

**Through transformation and release,  
a person controls destructive passions and beings.**

**A person releases any clinging to old destructive desires, thoughts,  
feelings, and possessions  
that no longer serve the highest good.**

**The next letter, letter S, is the divine virtue of omnipotent all-  
penetrating-willpower  
for the highest good of all.**

***A Child of Light who produces  
strong Delta brainwave patterns of PURE BEING and unity  
with Divine Being and all Creation  
is one with this divine willpower that penetrates all.***

**It is in the infant state of PURE BEING that omnipotent WILLPOWER  
is generated to manifest heaven and unity with all life.**

**The letter I is the virtue of Cause and Effect.**

**This virtue, an earth element and Beta brainwave function,  
enlivens memory, remembrance, and conscience.**

**With remembrance of being a divine infant,  
a Child of Light of any age causes effects that result in Heaven on  
Earth.**

**We help enliven this virtue, so that a person remembers the infant state  
and continues to experience the deep Delta brainwave state throughout  
life.**

**This virtue is the essence of strong conscience,  
and the understanding of breath and manifestation.**

**The final letter, letter S, is again the mastery of the Delta brainwave  
state of pure being  
and unity with Divine Being and all Creation which awakens omnipotent  
all-penetrating-will  
for the highest good flowing forth from the consciousness of pure  
being.**

***With these virtues, we inspire emotional well-  
being and vitality  
in mothers and infants.***

**The emotional well being of a mother, human or animal, has more to do  
with the quality and vitality of milk, and its effect on the infant  
or any products made from it, than any other factor.**

***If the mother is in bliss, her milk tastes the sweetest, and  
induces  
high states of consciousness and well being and health  
in her infant or anyone who drinks it.***

**Whatever infants, human or animal, experience in their earliest days  
and months  
affects their emotional attitudes towards life and physical health from  
then on.**

**For infant children and animals to be strong and happy, the happiness  
of mothers,  
especially when they are nursing, is important.**

**The entire environment around infants is then endowed with the  
beingness, will,  
visions, and important emotions of divine virtues,  
so that heaven manifests on earth through them.**

***The effects of bliss-infused milk are profound.***

**As a mother and father are in states of divine being,  
eye contact, the sound of voice, and the transfer of love  
through touching blesses all infants.**

**For example, a nursing racehorse whose mother is tame and happy is  
much easier to train later and is healthier than one whose mother is  
under stress of any kind.**

**Understanding the power of consciousness and emotion,  
parents with infants and people with animals  
carefully guard the happiness and sacredness of everyone.**

***This is how to protect the sweetness and nutrition of milk.***

**Meditate on the divine virtues associated with the letters of our name,  
and call on our help to endow Mothers, infants, and milk with the  
qualities of Heaven on Earth.**

**This is the 231st degree of the zodiac.  
Add these numbers together to obtain the divine number of this degree.  
 $2+3+1=6$ .**

**NUMBER SIX represents the macrocosm in its perfection.**

**It is represented by an equilateral hexagram.**

***This is the number of man  
when he finally reaches that state of enlightenment***

***in which he is one with God.***

**Jesus referred to this number when he said, "I and the Father are One."**

**The lower triangle of the hexagram denotes, in the mystical sense, man with his three dimensional aspect of body, soul and spirit.**

**The upper triangle of the hexagram points to the three-dimensional unification and influence of divine power and virtues in the mental, feeling, and physical worlds.**

**Number six represents the sun and all spherical miracles.**

**ADivine Providence endows the incarnation of each child with the original idea of enlightenment.**

***Within each sentient being, an original idea incarnates as a perfect and unique expression of omnipotent, omniscient, omnipresent divine consciousness.***

**Mastering this virtue in meditation gives clairvoyance, clairauidience, eloquence, artistic and musical gifts, and the control over the element of air.**

**This virtue awakens mental acuity, ingenuity, the ability to grasp high abstract and enlightened new information very quickly and easily, and flawless mental functioning.**

**This virtue awakens the ability to clairsentiently attune to the divine virtues that are manifesting through infants or animals.**

**Umlaut A, aethe release of any imperfection in self or other to Divine Being for transformation into another state that is the highest good of all concerned.**

**G** The sound of this letter is the sound of the virtue of Divine Grace and Mercy.

***When a new life enters incarnation,  
the original purpose is to manifest blessings for all.***

**In the physical world this virtue represents all phases of riches and wealth,  
of happiness and satisfaction.**

**By this virtue Divine Providence has created abundance and, like the Creator,  
a child of God may also bring about,  
for him or her self or other people,  
abundance in everything, should that be desired.**

**On an emotional level this virtue awakens emotions of happiness,  
of complete satisfaction.**

**Situations may be created by means of the elements and the will and feelings causing success and wealth in the world  
that is for the highest good of all concerned.**

**In the mind, this virtue gives the experience of peacefulness,  
and the faculty of giving true divine blessing.**

**The color of this virtue is deep emerald green; the musical note is F.  
It is the water element so it has the sensation of coolness.  
The left eye is formed from this virtue.**

**L** The letter L represents the sum total of all the divine virtues.

**These virtues taken together are the splendor and majesty of Divine Consciousness.**

**By mastering the virtue of unity with all of the divine virtues,  
it is possible to create the splendor and majesty of heaven so that it manifests in the intellect, in the emotions, and in the reality of the physical world.**

***The attunement to this virtue by parents attracts  
to the infant  
the splendor of the indwelling Divine  
Consciousness.***

**This virtue also gives morality, mastery of emotions, great courage and  
endurance,  
and the drive for self-preservation in self and others.**

**The color of this virtue is olive green, the musical note is F,  
the sensation is the air element of ease, and the organ formed by it is  
the spleen.**

**A[Soft A, as in ah] Wisdom and enlightenment,  
the original purity of all ideas in divine mind,  
giving mystical faculties and control over the air.**

**umlaut A, ae, long A. The realization of wishes regarding physical matter  
is subjected to this virtue.**

**The sound of this letter, the long A, {ae}, in the cosmic language  
is the virtue of the origin and mystery of life and death  
regarding their transformation.**

**By meditating on this virtue, a child of God becomes convinced  
that in reality death does not exist,  
for the so-called death is only a transformation from one state into  
another.**

**Also will come enlightenment on the cause of this transformation.**

**With this comes the ability to master all negative spiritual beings  
in all spheres and planes with regard to their scope of action.**

**The purpose for which negative beings have been created becomes  
clear.**

**Since, in the original principle all beings are alike,  
each having been created by Divine Providence to fulfill a  
certain task, there is no dissimulation of negative beings,  
for from the enlightened persons point of view everything  
is pure.**

**Here the saying: "to the pure one everything is pure"  
becomes plain.**

**If there were no negative beings,  
it would be impossible to distinguish between good and  
evil; and if there were no passions, there would also be no virtue.**

**This virtue confirms the words contained in the Bible:  
"through night to light",  
the deep symbolic meaning of which now becomes clear.**

**In the intellect the ability is gained to see through all thoughts,  
actions and wishes concerning matter, and of becoming their absolute  
master.**

**In the emotions, this virtue represents desires, passions,  
and the inclination to self-satisfaction etc.**

**A person who masters this virtue in their emotions**

becomes absolute master and ruler  
of all desires and passions.

Also, a person is able to not cling to imperfect mental,  
emotional, and material virtues and objects.

This means complete independence and freedom and fulfills the saying  
"bind yourself and you will be free".

On the material level this virtue is one of the most materialized.

No matter whether you evoke it in the mind, the feelings,  
the akasha, or the material world, the earth is influenced by it to a  
larger extent.

*The ability to infuse matter with divine virtues is heightened.*

*By releasing imperfections on every level with this virtue,  
and following this with umlaut O, eu, seeing through the eyes of love,  
miracles happen.*

*These two, umlaut A and umlaut O, the alpha and the omega,  
are the two most important for transformation and transmutation.*

The color of this virtue is loamy brown.

The musical note is C.

The element is earth so it has the sensation of weight.

The anus is formed from this virtue.

S This is the sound of all-penetrating power, ALL-POWER.

This virtue gives the WILLPOWER to attune to the inherent divine  
perfection and beauty of others.

This all-power is to be understood substantially.

With all-power you get into contact with the subtlest substance of the  
divine spirit, i.e.,  
with the original divine fire, or will, which works as a  
substantial power in everything that has been created by Divine  
Providence.

Oneness with all-power gives mastery over the fire principle of desire  
and will  
and brings about a state of clairvoyance in its purest form.

Complete control over consciousness results from this.

The color of this virtue is purple red, its musical note is G-sharp,  
it is the fire element of will and so it has the sensation of warmth,  
and the gall bladder is the part of the body that is formed by it.

I The sound of the letter I is the Divine Virtue of Cause and Effect,  
which represents the law of evolution of everything.

This law gives the understanding and mastery of the akasha,

or subtle pre-matter principle.

The sensation of akasha is God-penetrating-all.  
The understanding of cause and effect also enables  
the perfection of memory and conscience.

Because all life is connected as a unified field of energy,  
whatever is willed, thought, felt, or done has repercussions throughout  
the  
entire web of life, both inside the microcosm which is the human body  
and the macrocosm,  
which is the outer universe.

As above, so below.

Whenever a person focuses on and becomes one with a divine virtue,  
the entire body and the kingdom of heaven, and indeed all of life,  
responds accordingly.

What is sown is reaped.

The letter I with its light opalescent color, representing the law of cause  
and effect,  
is the spiritual essence of the left kidney.  
This virtue is of the earth element, so it has the sensation of weight.  
The musical note is G.

SO on the physical plane, mastery of the virtue of all-power, which is  
control over all-penetrating will, gives complete control of  
consciousness,  
of self and any other human being or being of any sphere  
or plane of our macrocosm, starting from the kingdom of the elements  
up to the highest angels, original beings, genii, etc.

It stands to reason that by the faculty of transferring consciousness,  
other mystical abilities are also developed at the same time.

It is at the time of birth and nursing that profound mystical abilities  
are present to manifest heavenly consciousness  
into will, intellect, emotion, and physical form.

On Earth as it is in Heaven.

## MIRACLES

### *Note*

*Animal or human infants who do not nurse from the mother, but use  
formula, miss out on necessary elements of growth on all levels of  
consciousness and being.*

*Natural milk contains important antibodies and  
subtle divine substances not found in formula, and carries vibrations of  
divine qualities.*

*The most important substance of all however, is the  
vibration of love.*

*If formula must be used, charge it with vibrations of the divine virtues  
of Aglasis,  
and administer with flowing love.*
