## **The Angels of The Sun**

**Also known as**

**The Angels of**

**Trasorim**

**Beloved,**

**We have allowed mankind to make inventions  
during the course of time  
which have brought the use of the power of the sun.**

**We teach you to use the rays of the sun  
by application of colored filters for various medical  
purposes.**

**We are the originators of the color-light treatment.**

**Medicines which are influenced by the colored light of  
the sun,  
in analogy to the universal laws,  
show a better quality and capacity,  
and have a better dynamic effect,  
than medicines produced in the normal way.**

**The sun is life.**

**Light waves become light particles in the third eye.  
Light particles are packets of information.**

**Like the human heart,  
the sun also produces plasma,  
or life.**

***"God's love is like the sun,  
shining equally on the good and bad alike, because love  
conquers all."***

***With divine love, it is inevitable that "thy kingdom  
come,  
thy will be done,  
on earth as it is in heaven."***

**Life manifests whatever emotions it connects with.**

**Emotions of love, happiness, grace, faith, high inspiration, etc.  
manifest  
original divine will for harmony, for the highest good of all.**

**The sun shines the light of the heart of a great being,  
a heart of Divine Being,  
that gives life to all who receive its blessings.**

**Being the heart of a great being,  
the sun is love unconditional,  
conquering all with love.**

**We have inspired mankind with this idea since the origin of time.**

**Ancient and future knowledge and mastery  
of the original ultimate biological self aware computer of all,  
the entire creation with all of its dimensions,  
universes  
and frequencies,  
is awakening within DNA codes of mankind.**

**The children of Divine Being are destined now to awaken.**

**They are destined now to masterfully use the light of the universe  
as it manifests into the physical realm through sunlight.**

**Sunlight is streaming information.**

**It, like emotions, are compressed information,  
and both sunlight and emotions are both being rediscovered as  
qualifiers of manifestation.**

**Both plasma and emotions are sources of knowledge and nutrients  
that are put to use at this time.**

**Emotional health, or happiness, is necessary for creation to have  
cohesion.**

**Through our inspiration, the children of light remember that light waves from the sun turn into light particles during mediation, causing the pineal gland to produce powerful chemicals of enlightenment, joy and immortality.**

**These light particles contain information, which is why sungazing is an ancient practice of spiritual seekers on all planets that orbit suns.**

**Sunlight is electric and emotions are magnetic.**

**Like night turning into day, or the in breath turning into the out breath, the sun enlivens emotions and emotions determine physical manifestation.**

**Physical manifestation enlivens and produces knowledge. Knowledge produces thoughts which led to high inspiration.**

**These thoughts lead to deep inner realizations of enlightenment, through activating divine dna of great power and love.**

**Emotions cause glandular centers of the human body to secrete amazing psychoactive substances into the bloodstream.**

**Emotions of love, of faith, of understanding cause great healing in the body.**

**Remember that the rays of the sun are streaming information.**

**The solar sun is a step-down transformer of energy-information from the higher sun, called the Central Sun or, in some literature, The Eye of Buddha.**

**Streaming information waves enter the eyes which are two ends of the optic nerve.**

**The optic nerve is the only exposed nerve in the human body temple.**

**Sunlight information waves travel along the optic nerve to the pineal and other glands and centers.**

***Remember that the pineal gland is ALSO referred to as the Eye of Buddha in ancient literature.***

**The pineal gland is the Eye of Buddha in the microcosm,  
and the central sun is the Eye of Buddha in the macrocosm.**

***The pineal gland absorbs to these sunlight information  
waves  
and they then  
become a particle  
a discreet particle of information that is unzipped in  
meditation.***

**Relax and be at ease to enter the Theta brainwave state.**

**The theta brainwave of deep inner thought is dominant in  
childhood.**

***"Ye must be as little children to enter the kingdom of heaven."***

**In this state of deep inner thought, the body receives visual images  
in the imagination.**

**These are holograms that program the body.**

**With deep meditation, the body produces glandular chemicals  
that are natural consciousness enhancing agents.**

**There are over 20,000 psychoactive chemicals in the pineal gland  
alone.**

**According to information in the light particles, these chemicals  
inform the Children of Light with Divine Consciousness on cellular  
levels**

**at the same time as emotionally, mentally, and spiritually.**

**These naturally produced psychoactive substances are at least a  
thousand times**

**stronger than psychoactive chemicals produced any other way.**

**Because they are produced in the body naturally, they are exactly  
right for**

**bringing about the highest good of all 72 trillion cells in the body.**

**Looking at the sun at sunrise or sunset is safe on the eye, and over  
time, the eye is capable of looking for longer periods of time at  
brighter light.**

**We guide seekers to ancient and modern information in this  
respect.**

**Information can also be received by looking at reflections of  
sunlight on water  
or any other reflective surfaces.**

**The light of the moon, which reflects sunlight onto the Earth at  
night,  
also carries information of the sun's rays.**

**By isolating different colors of the spectrum through the use of  
filters,  
specific domains of information are concentrated and collected.**

**Each color of the spectrum carries specific information.**

**These are:**

**The first chakra, a brilliant hue of ruby red,  
is supreme happiness and abundance and health in the world of  
form.**

**The second chakra, scintillating shades of fiery orange,  
is the ability to relate in sacredness and intimacy with other  
expressions of God in form.**

**The third chakra, gold and yellow like the shining sun,  
is the perfection of the personal will in attunement with the ALL-  
THAT-IS.**

**The fourth chakra, endless varieties of emerald green,  
is the OCEAN of DIVINE LOVE and the ENDLESS FLOWING JOY of  
the emotional nature.**

**The fifth chakra, infinite sapphire blue,  
is the doorway of unlimited creativity  
and the ability to manifest the qualities of the ONE BEING.**

**The sixth chakra, deepest shades of indigo blue,  
is the infinite space of ALL WISDOM and perception.**

**The seventh chakra, shades of flaming violet and purple,  
is the merging with the almighty connection with the ALL-THAT-IS.**

**Visualize and see the colors swirling around your being  
at the places where the encircling bands of the chakra energy  
reside.**

**The first chakra, beautiful and pure Ruby Red,  
is glowing around your lower body at the base of your spine .**

**The second chakra, blazing shades of Orange,  
shine forth from your body below your navel.**

**The third chakra, Sunlight Yellow,  
shines like a sun from your solar plexus;**

**The fourth chakra, endless shades of Emerald Green,  
flows like an ocean in your heart.**

**The fifth chakra, infinite sapphire Blues,  
emerges in your throat.**

**The sixth chakra, Deep and endless Indigo Blues  
forms an infinite space within your forehead.**

**The seventh chakra, is an up reaching Violet flame,  
at the crown of your head merging with the infinite Being of God.**

**We have given information that is easy to make practical use of.**

**For instance, if your health is weak, putting a piece of red  
cellophane  
on a window where the sun shines through and sitting in it  
revitalizes your physical body.**

**You may increase its potency even more if, at the same time, you  
meditate on infinite abundance and security in the area at the base  
of the spine.**

**Your immune system and vitality will be greatly strengthened over  
time.**

**Or if relating to someone is troublesome,  
putting a piece of orange cellophane on a window where the sun  
shines through and sitting in it  
empowers the psychic energy of Divine Gestation of Relationship.**

**Meditating on the omnipresence of the Divine Consciousness  
in all beings and holy oneness of all life,  
especially as it regards the relationship in question, brings healing.**

**This same process is done with each of the colors.**

**The potential of these domains of information encoded  
in the colors of the rays of the sun is great.**

**Seemingly miraculous results can be obtained by using them for  
various purposes.**

**The human eye is the only eye of any mammal on earth that has the  
whites of the eyes.**

**This is because light goes forth from the eyes of the Children of  
Light as well as into it.**

**It is through the eye that information is sent to others.**

**This is the meaning of darshan, the gaze of the master.**

**When you look directly at the sun's rays,  
you can send information as well as receive it through the optic  
nerve.**

***Any person can pray on behalf of others, and messages sent directly to the sun along the rays of light in looking at the sun carry such power that in ancient days in the Aztec kingdom only the king and the head priests were allowed to look directly at the sun.***

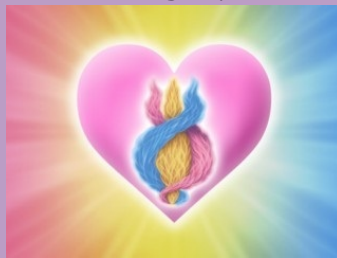

**It is important at this time that the Children of Light send prayers while looking at the sun. In this way, blessings travel along rays of light to the sun and the sun broadcasts this to all.**

**Remember to send blessings and prayers as well as receive when you gaze at the light.**

***NUMBER FOUR is the perfect number of mastery of creation.***

***The work of Carl G. Jung emphasized that mandalas with four or a multiple of four spokes (petals) represented complete balance and healing in the four brainwave states.***

***It is represented by Jupiter.***

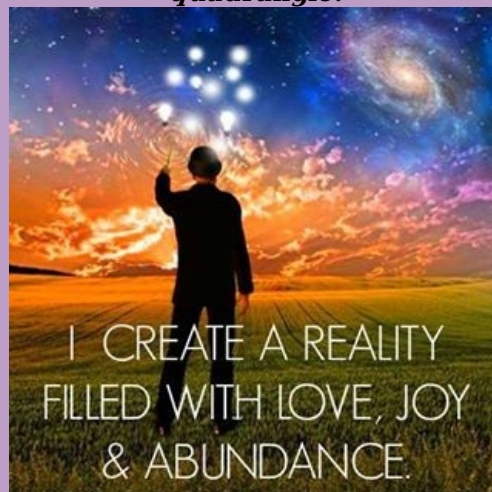

***It represents the four basic elements of fire, air, water and earth.***

***It also represents the four directions, the four fundamental features of God, which are omnipotence, wisdom, love - immortality, and perfect consciousness.***

***It is the number of everything that is created in the visible and the invisible worlds.***

***It is highest wisdom and the number of length, width, height, and depth.***

***It is represented by a cross with arms of equal length, or by an equilateral quadrangle.***

***T-R-A-S-O-R-I-M***

***T The first divine virtue for attunement to the sun is initiation into high***

*inspiration.*

*The letter T in the ancient language represents high inspiration with all the legal matters of this principle.*

*In the intellect, this virtue awakens remarkable inventive faculties and memory.*

*In meditating on this virtue, see yourself as a tiny dot in your solar plexus with the rest of the body as an infinite swirling universe all around you.*

*Meditate with focus on willing high inspiration from your unity with Divine Mind.*

*In deep inward thought contemplate high inspiration.*

*Flow with feelings of mastery over all the elements that high inspiration brings, feel this mastery within yourself and in the outer world, with the elements of fire-will, air-thought, water-feelings, and earth-sensations.*

*Do this with sensations of warmth and fire.*

*See brown black colors shining forth from a tiny sun in the head region.*

*See this virtue and this light forming the right kidney.*

*Intone the letter T to the musical note of F while flowing with feelings of high inspiration.*

*When you breathe out, imagine this virtue radiating through the pores of your skin over the right kidney and filling whatever, whoever, or where ever inner guidance directs in the outer worlds.*

*When you breathe in, see this virtue radiating back in from the universe through the pores of your skin into the right kidney.*

*Keep the rhythms of the breath natural, do not disturb natural rhythms and remember to dissolve the light when finishing the mediation so that the elements of the body remain in balance and the kidney is not over stimulated.*

*The next divine virtue in attunement to the sun is that of becoming the master and guardian of freedom and independence.*

*In this state there is the feeling of freedom of any pressing burden of the laws,  
for by the mastery of all the preceding virtues you have achieved a state of maturity by which this feeling of independence has been transformed  
into an absolute state of security and unimpeachability.*

*This comes from the realization of the harmony and*

*perfection of all divine laws and the identification and love of them so intensely that they have actually become merged with oneself.*

*In this case you are the personification and representation of the divine laws and they will serve you, and your sense of freedom will derive from them rather than in spite of them.*

*This is a very high state of consciousness, but it is the state that every human being is destined to accomplish.*

*It is for this reason that your teachers have told you that the truth is written within your heart.*

*We remind you that on a level that is both above and below your everyday state of consciousness, you are already one with Divine Mind and you have never been separated from it.*

*Within your heart you access these levels and therefore you can access all divine laws and your oneness with them.*

*This is one of the meanings of the sacred heart of Christ, and the statement that  
The Christ is with you always.*

*This virtue is seen as a golden light within the solar plexus.  
The left side of the nose is formed from this virtue.  
The musical note is C, and it has the sensation of weight.*

*Wisdom and enlightenment, light blue, air element with a sensation of relaxation and ease.*

*The sound of this letter, the long A, in the cosmic language is the virtue of the origin and mystery of life and death regarding their transformation.*

*By meditating on this virtue, a child of God becomes convinced that in reality death does not exist, for the so-called death is only a transformation from one state into another.*

*Also will come enlightenment on the cause of this transformation.*

*With this comes the ability to master all negative spiritual beings in all spheres and planes with regard to their scope of action.*

*The purpose for which negative beings have been created becomes clear.*

*Since, in the original principle all beings are alike, each having been created by Divine Providence to fulfill a certain task, there is no dissimulation of negative beings, for from the enlightened persons point of view everything is pure.*

*Here the saying: to the pure one everything is pure becomes plain.*

*If there were no negative beings, it would be impossible to distinguish between good and evil; and if there were no passions, there would also be no virtues.*

*This virtue confirms the words contained in the Bible: through night to light, the deep symbolic meaning of which now becomes clear.*

*In the intellect the ability is gained to see through all thoughts, actions and wishes concerning matter, and of becoming their absolute master.*

***In the feelings, this virtue represents desires, passions,  
and the inclination to self-satisfaction etc.***

***A person who masters this virtue in their emotions  
becomes absolute master and ruler of all desires and passions.***

***Also, a person is able to not cling to mental, emotional, and material virtues  
and objects.***

***This means complete independence and freedom and fulfills the saying  
bind yourself and you will be free.***

***On the material level this virtue is one of the most materialized.***

***No matter whether you evoke it in the mind, the emotions, the akasha, or  
the material world, the earth is influenced by it to a larger extent.  
The ability to infuse matter with divine virtues is heightened.***

***The color of this virtue is loamy brown. The musical note is C. The  
element is earth so it has the sensation of weight. The anus is formed from  
this virtue.***

***S The sound of this letter is initiation into all-penetrating power, all-power.***

***This all-power is quantitative in form in comparison to omnipotence,  
the letter K, which is qualitative in form.***

***With all-power, a child of God gets into contact with the most subtle  
substance  
of the divine spirit, i.e., with the original divine fire, or  
divine will, which works as a substantial power  
in everything that has been created by Divine Providence.***

***Oneness with all-power gives mastery over the fire principle of desire and will  
and brings about a state of clairvoyance in its purest form.***

***It is the will of Divine Providence for love and joy to permeate all of creation.***

***The color of this virtue is purple red, its musical note is G-sharp,  
it is the fire element of will and so it has the sensation of warmth,  
and the gall bladder is the part of the body that is formed by it.***

***Umlaut O, eutransmutation through cognition brought about by love divine.***

***O The sound of letter O is the sound of the initiation into the original  
principle of divine justice.***

***By meditating upon this virtue, mentally you will be able to give  
expression to the absolute legality of harmony in all four basic qualities of the  
elements.***

***You will have a high power of judgement and  
the ability to comprehend spiritually any legality,  
any interference by Divine Providence for the sake of justice.***

***You will never be able to condemn anyone unjustly.***

***This will bring about the abilities to create  
any change in the emotional situations that you find yourself in  
and to have absolute success and happiness on all levels.***

***The ability to control emotions is the ability to control and manifest anything  
on the physical level.***

***This virtue has an ultramarine blue color, the musical note of C, and is the  
earth element  
so it has the sensation of weight. It formed the throat and windpipe.***

***RThis virtue of freedom, independence,  
and following inner guidance is necessary  
in communicating back and forth with the intelligence of the sun.***

***Any person can pray on behalf of others, and messages sent directly to the  
sun  
along the rays of light in looking at the sun carry such  
power that in ancient days in the Aztec kingdom  
only the king and the head priests were allowed to look directly at the sun.***

***When you pray,  
always ask that your prayer be answered in the way that harms none  
and is for the HIGHEST GOOD OF ALL CONCERNED.***

***I The sound of the letter I is the virtue of Cause and Effect.***

***The law of cause and effect is the law of evolution of everything.***

***This law gives the understanding and mastery of the akasha, or subtle pre-  
matter principle.***

***The sensation of akasha is God-penetrating-all.***

***The understanding of cause and effect  
also enables the perfection of memory and conscience.***

***The letter I with its light opalescent color, representing the law of cause and  
effect,***

***is the spiritual essence of the left kidney.***

***This virtue is of the earth element, so it has the sensation of weight. The  
musical note is G.***

***M The sound of this letter in the ancient language is the sound of emotion.***

***Emotion is the magnetic feminine energy that attracts reality into form.***

***The changes brought about in the feelings through interaction with the sun  
attract pure delight and heaven on earth, into the world of form.***

***This divine virtue of emotion is the water element, so it has the sensation of  
coolness.***

***Its color is blue-green, its musical note is D, and abdomens are formed by this  
virtue.***
