The Angels of Metallurgic Chemistry

Also known as

The Angels of

Panari

Beloved,

We are the heavenly host that inspires mankind in the field of metallurgic chemistry.

**We have taught man to gain various metals from ores,
and we have helped him with the recognition of the various metallic elements.**

We have inspired the making of metal amalgams.

**We have various recipes for the working up and amalgamating of
metals, and also the decomposition of metals
into various chemical products, synthetic substances and medicines.**

The things that we can inspire mankind with in this regard are almost limitless.

**Everything in creation is created from electrical intent and thought,
and attracted into form through magnetic fields of emotion and sensation.**

Specific magnetic fields correspond to specific divine flowing emotions.

**All magnetic divine emotions result from electric omnipotent divine intentions,
visual images, and corresponding thoughts.**

Electric will and magnetic emotions determine reality.

**Because metals are excellent carriers of electro-magnetic energy,
many wonderful qualities of Divine Beingness are embodied by metals.**

**As this concept is integrated into conscious awareness of the
children of light,
mysteries of the philosophers stone are easier to understand.**

**Through the Law of One,
we inspire the charging of all metals
with frequencies of the highest good of all.**

Flowing electricity corresponds to flowing DIVINE WILL.

Metals carry electrical currents.

Different metals vibrate to different aspects of Divine Will.

**Remember that Divine Will flows through various qualities,
heavenly hosts, and planetary spheres**

**In the longing for spiritual perfection and unity with the Divine Light,
which is the virtue of letter P of Panari, a person first
seeks understanding of the original purity of all ideas in Divine Mind, A,
and then gladly recognizes and controls negativity and imperfection
through release and transformation
of troublesome states of being, desires, beliefs, emotions, sensations,
possessions.**

**All imperfections that are not in accordance with the original purity of
all ideas in Divine Mind are
released back to Divine Being for changes into other states that are the
highest good of all.**

This is the divine virtue of umlaut A, ae.

**By transforming negative magnetism within metals through the virtue of
umlaut A, ae, natural divine qualities
that are the original essences of metals are free to express.**

**Metals are then further charged with energies of divine qualities
and heavenly hosts of the spheres that correspond to them.**

**For example, heavenly hosts of Venus, which is receptivity to Divine
Love,
easily charge copper, and their presence can be contacted through it.**

**When transformation of negative magnetism is accomplished, the
vibrations of supreme happiness, from which metals were originally
created, are then activated.**

**The magnetism of flowing emotions of supreme happiness creates
cohesion,
a quality of gravity, and is the virtue of letter N.**

In this wonderful state, joys of natural wisdom and enlightenment

**that originated metals are also enlivened,
which is the virtue of letter A.**

**This further releases imperfections for changes into other states
that are the highest good of all, umlaut A,ae.**

**By listening and following inner guidance, the virtue of letter R,
people master the Laws of Cause and Effect, letter I, and create
whatever metallurgic compounds
are needed to manifest Heaven on Earth.**

The Law of Cause and Effect is the last letter I of Panari.

Here are the corresponding spheres and divine qualities of metals.

For the Venus sphere use copper.

This is the 253rd group of angels overseeing the earth.

$$2+5+3= 10.$$

$$1+0=1.$$

Both 1 and 10 are given here.

NUMBER ONE is the first number in the universe and represents the highest form, which is God Himself.

The manifested light and everything that was made of it is God in His Oneness.

Whenever the Deity is to be identified, this is done by number one.

One means highest cognition, highest unity, and highest wisdom.

All evolution starts with this number.

It is represented by a dot.

The middle of flowers represents the Oneness of God.

One is represented by the center of the mandala.

NUMBER TEN is the last number. It is the reflection of number one in its roughest form.

Ten is the number of physical matter, the number of realization.

Ten is called "The Kingdom "in Quabbalah.

The human body is subject to number ten, and so also is the mineral, vegetable, and animal kingdom, and everything that is perceived by the five senses.

Its symbol is a circle with a cross consisting of eight arms in its middle, contrary to number one which is usually symbolized by a dot or a circle as the sign of infinity.

Ten can also be represented by a square with a circle drawn in its middle.

Ten is the starting point on the way to God.

P-A-N-A-R-I

P This sound is the virtue of the longing for perfection and the highest spiritual realization.

By meditating on this virtue, a child of God awakens increased longing for unification with the original light, and with the divine virtues.

The desire for perfection is the cause behind learning how to create effects in the akasha, which is the element of God-penetrating-all, through will, intellect, feeling, and action.

The deeper and the more frequent the seeker is penetrated by this virtue,

the deeper will be the feeling of humility, and it is in this state that is found the greatest and most powerful proximity of divine majesty, of Divine Providence.

In the emotions, this virtue evokes the longing for purification, for transformation, of ones character and the longing for equilibrium in will, intellect, emotion, and form.

It evokes the ability to perceive beauty from the universal standpoint as the outcome of perfect harmony.

This virtue is dark grey, and has the musical note of B. Since it is the earth element, it has the sensation of weight. The right side of the nose was formed from this virtue.

A...wisdom and enlightenment

Umlaut A, ae The sound of this letter, the long A, in the cosmic language is the virtue of the origin and mystery of life and death regarding their transformation.

By meditating on this virtue, a child of God becomes convinced that in reality death does not exist, for the so-called death is only a transformation from one state into another.

Also will come enlightenment on the cause of this transformation.

With this comes the ability to master all negative spiritual beings in all spheres and planes with regard to their scope of action.

The purpose for which negative beings have been created becomes clear.

Since, in the original principle all beings are alike, each having been created by Divine Providence to fulfill a certain task, there is no dissimulation of negative beings, for from the enlightened persons point of view everything is pure.

Here the saying: to the pure one everything is pure becomes plain.

If there were no negative beings, it would be impossible to distinguish between good and evil; and if there were no imperfect passions, there would also be no virtues.

This virtue confirms the words contained in the Bible: through night to light, the deep symbolic meaning of which now becomes clear.

In the intellect the ability is gained to see through all thoughts, actions and wishes concerning matter, and of becoming their absolute master.

In the feelings, this virtue represents desires, passions, and the inclination to self-satisfaction etc.

A person who masters this virtue in their feelings becomes absolute master and ruler of all desires and passions.

Also, a person is able to not cling to mental, emotional, and material virtues and objects.

This means complete independence and freedom and fulfills the saying bind yourself and you will be free.

On the material level this virtue is one of the most materialized.

No matter whether you evoke it in the mind, the feelings, the akasha, or the material world, the earth is influenced by it to a larger extent. The ability to infuse matter with divine virtues is heightened.

The color of this virtue is loamy brown. The musical note is C. The element is earth so it has the sensation of weight. The anus is formed from this virtue.

N This sound is the sound of supreme happiness and fulfillment.

The purpose of the transmutation of metals with their corresponding physical and vibrational benefits is to bless everyone with happiness.

On a physical plane, this virtue gives mastery over the principle of cohesion or coherence, gravity and the attractive power of everything material.

This virtue gives control over the mental matrix, which is the

spiritual bonding material that connects the emotional body to the mental body, i.e., to the spirit.

The mastery of this virtue reveals to the child of God all the mysteries relating to the mind and the emotions and bestows the ability to comprehend, see, sense and control, the mental matrix with its sphere of action, either in regard of self or others.

The color is dark red, the musical note is A, it is of the water element of emotion so it has a cool sensation. The liver is formed from this virtue.

A This is the sound of the divine virtue of highest wisdom and enlightenment.

This sound [soft as in a sighahhhhh] and virtue is an initiation into the highest wisdom and the purity of all ideas.

This has as a fundamental feature the enlightened mind.

Reasoning, perception, the cognition of the most profound truths, highest knowledge, high intelligence, and the arousing of all intellectual faculties are expressed.

Musical gifts, eloquence, poetic talent, and clairvoyance, clairaudience, the art of levitation, and the control of the air element and its beings are all aroused by meditating on this virtue.

On the physical plane the command of the beings of the air, control over storms, are all made possible by initiation into the highest wisdom.

The color of wisdom and enlightenment is light blue, the musical note is G, the element is air so it has the sensation of ease, and the lungs are formed from it.

Umlaut A, a transformation of imperfection, change into another state through release and letting go to Divine Being.

R To obtain true wisdom, the first requirement is the ability to listen to, hear, and follow the inner voice of guidance.

The sound of the letter R is the divine virtue of becoming the master and guardian of freedom and independence.

In this state there is the feeling of freedom of any pressing burden of the laws, for by the mastery of all the preceding virtues you have achieved a state of maturity by which this feeling of independence has been transformed into an absolute state of security and unimpeachability.

This comes from the realization of the harmony and perfection of all divine laws and the identification and love of them so intensely that they have actually become merged with oneself.

In this case you are the personification and representation of the divine laws and they will serve you, and your sense of freedom will derive from them rather than in spite of them.

This is a very high state of consciousness, and it is the state that every human being is destined to become aware of.

The truth is written within your heart and freedom and independence is necessary for each child of God to follow that still small voice within.

By following this inner guidance, the child of God uses their genius and knowledge to further the will of Divine Providence.

The color is golden, the element is earth so it has the sensation of weight, the musical note is C, and the left side of the nose is formed from it.

I The sound of the letter I is the virtue of Cause and Effect.

The law of cause and effect is the law of evolution of everything.

This law gives the understanding and mastery of the akasha, or subtle pre-matter principle.

The sensation of akasha is God-penetrating-all.

The understanding of cause and effect also enables the perfection of memory and conscience.

The meditation on the virtue of Cause and Effect enables mastery of the chief components of the material world, which are shape, measure, number and weight.

It has a light opalescent color and is the spiritual essence of the left kidney. This virtue is of the earth element, so it has the sensation of weight. The musical note is G.

The being and the angels share the same name.

This name is a key to their powers and influence.

Names, phrases, and sections, in the angel messages are quoted or paraphrased from the books of Franz Bardon.
