The Angels of Metal Working

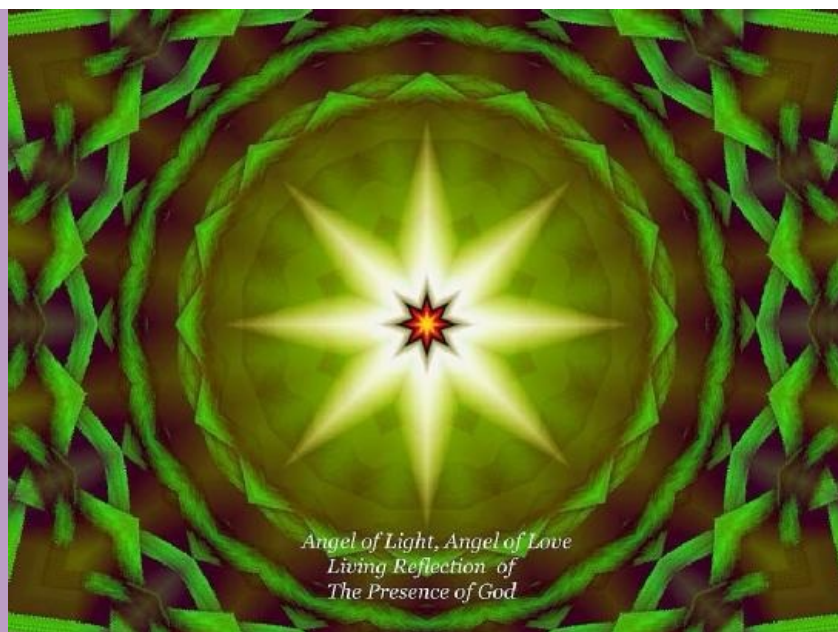

Also known as

**The
Angels of Neschamah**

Beloved,

We inspire each person who works with metals with divine ideas and virtues upon which to meditate, to infuse sacred frequencies into the metals, and thereby fulfill their purposes in ways that are the highest good of all concerned.

With our inspiration, the working up of metals is a most sacred alchemical act, as the electro-magnetic gifts of metal are charged, through the laws of physics, which is the Power of the Word, with divine qualities.

**In this way, inventions and arts flourish.
In this first degree of Sagittarius,
the working up of metals is perfected.**

**All of the 30 initiations of Scorpio awaken flowing
feelings of Divine Love and direct
omnipotent will to create Love on Earth.**

**In this process, love opens mystical cognition
that transmutes creation
into its original divine blueprints of perfection.**

**Included in the original divine blueprints are
ever changing and evolving activities and skills
that allow endless artistic creations to flourish,
in ways that are the highest good of all
concerned on every level of creation.**

**Now, in initiations of Sagittarius,
Wisdom awakens as the offspring of the conjoining of
divine will and divine love,
the initiations of divine fire and divine water.**

**Omnipotent fiery will, for the original divine blueprints
of creation,
expresses through Divine Love
that is appropriate in each and every moment.**

**Wisdom encourages research, traveling and exploring,
in both
the inner planes of the soul, and the outer realms of
creation.**

**The above reflects in the below, and the within reflects
in the outer world.**

**Wisdom inspires both inner meditation as well as the
seeking out of
ever higher knowledge and teachers.**

**This urge to explore and travel and
seek out higher wisdom and teachers encourages
creativity.**

**For this reason, the heavenly hosts of Neschamah have
inspired mankind
from the beginning to work up metals with the help of
fire and water.**

**All hardening of metals, from the most primitive times
to the most modern,
have been under our protection and guidance.**

**Because metals are used
to make possible many things,
such as tools, inventions in communication
and physical exploration of space,
and because all life is sacred,
all metals are charged with inspired frequencies
of divine will and divine love.**

**Metals make the exploration of the infinitely small and
the infinitely
large possible through the use of microscopes,
telescopes, etc.**

**Therefore, people can expand their horizons
to wisely comprehend and attend to physical creation.**

**In The Will to Wisdom, the out picturing of the beauty
and perfection
of the original divine blueprints of creation
is always the goal and the end result.**

**As people become ever more one in Consciousness with
Divine Being,
we are destined to reveal methods for the working up of
metals
that are far in advance of what is known at the present
time.**

**As a person travels further on the Earth and in space,
the wondrous nature of the world and universe is
comprehended
while making acquaintance with other brothers and**

sisters of light.

In this is also the growth of wisdom.

**Understand that reality works in fractals, repeating
patterns
that nest within each other in ever larger sizes.**

**This is why the atom and the solar system are similar in
appearance, only differing in size.**

**The landscape of inner space and outer space are also
similar,
they are mirror images of each other.**

“Man is made in the image and likeness of God.”

“All that I do, ye shall do and more.”

“On Earth as it is in Heaven.”

**In this first degree of Sagittarius, flowing emotions of
Supreme Happiness, the virtue of letter N,
combine with omnipresence of Divine Consciousness,
the virtue of letter E.**

**The ability to experience
original omnipotent divine will
for the highest good of all
and SEE divine will in creation
awakens the awareness of the virtue of Sch.
Sch is the original divine will.**

**This reveals the original purity of all ideas in Divine
Mind
so that mystical faculties such as clairvoyance and
artistic talents emerge.**

**This wisdom is the letter A.
This awakens the willingness to release for change any
imperfections or negativity,
which leads to control over negative beings
and the power to transform material creation into
perfection, umlaut A, ae.**

**Then flowing divine emotions attract harmony and
beauty
to further awaken enlightenment
and transformation.**

**Finally, The Power of the Word is embraced to create
divine realities on every level.**

**The Power of the Word is conscious use
of delta, theta, alpha and beta brainwaves together.**

The first 24 groups of angels overseeing the earth govern the elements.

The next groups govern the 360 degrees of the zodiac.

*This is the 265th group of
angels overseeing the earth.*

2+6+5=13. 1+3=4.

*NUMBER FOUR is the
perfect number of mastery of creation.*

*The work of Carl G. Jung emphasized that mandalas with four or a multiple of
four spokes (petals)
represented complete balance and healing in the four brainwave states.*

It is represented by Jupiter.

*It represents the four basic elements of
fire, air, water and earth.*

*It also represents the four directions, the
four fundamental features of God, which are omnipotence, wisdom, love -
immortality, and perfect consciousness.*

*It is the number of everything
that is created in the visible and the invisible worlds. It is highest
wisdom and the number of length, width, height, and depth.*

*It is represented by a cross with arms of equal length, or by an equilateral
quadrangle.*

N-E-Sch-A-M-A-H

*N... This sound is the sound of supreme
happiness and fulfillment beyond words to describe.*

*This virtue gives control over the consciousness of self and other beings. The
purpose of
becoming one in consciousness with DIVINE WISDOM is to obtain the 7th
heaven of delight and to bless the world with happiness.*

*This virtue gives control over the mental matrix, which is the spiritual bonding
material that connects the emotional body to the mental body, i.e., to the
spirit.*

*The mastery of this virtue reveals to the child of God all
the mysteries relating to the mind and the emotions and bestows the
ability to comprehend, see, sense and control, the mental matrix with
its sphere of action, either in regard of self or others.*

*On a physical plane, this virtue gives mastery over the principle of cohesion
or
coherence, gravity and the attractive power of everything material. The
color is dark red, the musical note is A, it is of the water element of
feeling so it has a cool sensation. The liver is formed from this*

virtue.

E...This letter is the sound of universal consciousness, which represents, as a divine idea and virtue, its omnipresence in everything that has ever been created. This unites your normal consciousness with the universal consciousness, with the cosmic consciousness, so that you can attain, in the akasha principal, omnipresence yourself.

This is known in oriental wisdom as Nirvi-Kalpa-Samadhi. You attain the highest form of intuition in your mental world; you transfer your consciousness so that there exists no sense of time and space. Divinity in His highest form is able to speak through you.

The most profound mysteries of materialization and dematerialization become obvious to you as you master this, everything that is material may be transferred back into its refined and most subtle form and any idea can be intensified in such a way that it becomes physically visible.

The color of this virtue is deep violet, the musical note is D, the element is akasha, which has the sensation of God-penetrating-all, and the spine is formed from it.

Sch...The S oscillation is the original fire [all penetrating will]. The K oscillation is the original light [omnipotence]. The virtue of Sch connects both original light and original fire, and thus indicates the non-manifestable omnipotence.

The Sch therefore represents the original fire or will principle superior to the K and S. This is the virtue by which Divine Providence creates the first outpouring of divine creation. It is regarded as the highest virtue.

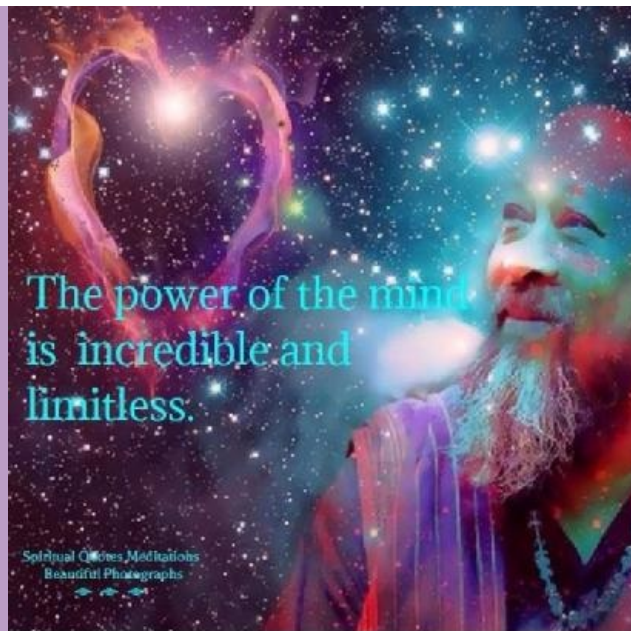

Akasha [consciousness-penetrating-all]: He or she who is able to evoke this letter in the akasha principle will recognize, from the akasha principle, the original element of the fire together with the original light and acquire the highest form of enlightenment.

Symbolically, the Sch appears as a shining sun in the akasha principle, with the original fire, as substance, in its middle and the original light as radiation of the original fire.

This is also the case in normal creation, where the sun, as original fire, stands for the hottest glow and the radiation of the heat of the sun is assessed as light. Mental: In the mental body, this letter oscillation will bring about the highest enlightenment, highest spiritualization, which will be increased to the point of ecstasy.

This ecstasy is a positive form of rapture and only a little different from the one described by me with regard to the oscillation of letter J. The J oscillation has the original principle of love and emotion, the Sch has the principle of the original fire or will.

By the Sch oscillation the intellect is somehow enlightened, no less so is consciousness, so both become more receptive. Astral [feeling]: In the astral body, the Sch oscillation evokes the original state of the manifestation of faith and likewise the ability of transmutation and perfect mastery over the fire or will element in all kingdoms. Since the element of will-power is also identical to this letter oscillation in the astral world, it also comes to bear therein.

Material: In his or her material body, a person will strengthen his or her absolute faith. He or she will learn the mastery of the electrical fluid [willpower] in all three kingdoms, to a larger extent in the material world, and at the same time acquire the faculty of influencing everything in the material world by the help of the electrical fluid, which is flowing willpower, or the fire element, where he or she thinks it to be necessary.

This is the original masculine force. This virtue is pure divine will power. It has a blazing red color, and the musical note of C.

It is the fire element so it has the sensation of warmth. The brain is formed from this virtue.

A...wisdom and enlightenment, mystical faculties, artistic talent, control over the beings of the air, the original purity of all ideas in divine mind.

Umlaut A, ae... The sound of this letter, the long A, in the cosmic language is the virtue of the origin and mystery of life and death regarding their transformation. By meditating on this virtue, a child of God becomes convinced that in reality death does not exist, for the so-called death is only a transformation from one state into another.

Also will come enlightenment on the cause of this transformation. With this comes the ability to master all negative spiritual beings in all spheres and planes with regard to their scope of action. The purpose for which negative beings have been created becomes clear. Since, in the original principle all beings are alike, each having been created by Divine Providence to fulfill a certain task, there is no dissimulation of negative beings, for from the enlightened person's point of view everything is pure. Here the saying: "to the pure one everything is pure" becomes plain.

If there were no negative beings, it would be impossible to distinguish between good and evil; and if there were no passions, there would also be no virtues. This virtue confirms the words contained in the Bible: "through night to light", the deep symbolic meaning of which now becomes clear. In the intellect the ability is gained to see through all thoughts, actions and wishes concerning matter, and of becoming their absolute master. In the emotions, this virtue represents desires, passions, and the inclination to self-satisfaction etc.

A person who masters this virtue in their emotions becomes absolute master and ruler of all desires and passions. Also, a person is able to not cling to imperfect mental, and material virtues and objects. This means complete independence and freedom and fulfills the saying "bind yourself and you will be free". On the material level this virtue is one of the most materialized. No matter whether you evoke it in the mind, the emotions, the akasha, or the material world, the earth is influenced by it to a larger extent.

The ability to infuse matter with divine virtues is heightened. The color of this virtue is loamy brown. The musical note is C. The element is earth so it has the sensation of weight. The anus is formed from this virtue.

M... The sound of the letter M is the sound of the divine virtue of emotion, fluidity, flowing, and change. This virtue is the magnetic power that attracts new realities into form on the material plane. When a Child of Light masters the emotional world, then the physical world is also mastered. Everything in nature is formed through the magnetism of emotions. Emotions are analogous to the element of water. The color of this virtue is the most beautiful blue-green imaginable.

The musical note is D. The element is water so it has the sensation of coolness. The abdomen is formed from this virtue.

A... This is the sound of the divine virtue of highest wisdom and enlightenment. This sound [soft as in a sigh—ahhhhh] and virtue is an initiation into the highest wisdom and the purity of all ideas.

This has as a fundamental feature the enlightened mind. Reasoning, perception, the cognition of the most profound truths, highest knowledge, high intelligence, and the arousing of all intellectual faculties are expressed.

Musical gifts, eloquence, poetic talent, and clairvoyance, clairaudience, the art of levitation, and the control of the air element and its beings are all aroused by meditating on this virtue. On the physical plane the command of the beings of the air, control over storms, are all made possible by initiation into the highest wisdom.

The color of wisdom and enlightenment is light blue, the musical note is G, the element is air so it has the sensation of ease, and the lungs are formed from it.

H... This letter symbolizes The Power of the Word. We inspire each person who works with metals with the divine ideas and virtues upon which to meditate in order to fulfill their purpose in a way that is the highest good of all concerned. Each letter represents a particular divine virtue, and each virtue has a meaning, a sound, a musical note, a color, a sensation, a part of the body that is formed by the virtue.

SPEAKING THIS LANGUAGE IS DONE INWARDLY in meditation. Meditate on the virtues of each letter using all of these aspects of meaning, color, sound, tone, emotion, and sensation. This requires whole brain thinking that uses all four brainwaves at the same time: Delta-pure being, Theta-deep inward thought, Alpha-feeling and emotion, and Beta-the five senses, logic, and memory. According to the law of correspondences, the As above, so below Law, a Child of Light imagines him or herself to be a tiny dot in the solar plexus of their own body temple. He or she imagines that the rest of the body is a vast universe swirling all around.

The divine virtue that is being meditated on is located as a tiny sun shining in the region of its element. If it is a fire element, it will be a tiny sun in the head region. Air is the chest region, water is the abdomen seen as a hollow space, and earth is the leg region. This sun is seen in its color filling its region and with the sensation of its element. The fire element has the sensation of warmth and expansion. The air element has the sensation of ease. The water element is coolness and chill. The earth element is weight.

With each out breath, the radiance of the sun passes through the pores of the skin over the part of the body that is formed from the virtue and fills the outer universe, with each in breath it passes back in to the physical body. The breath is kept natural, its natural rhythm is not disturbed and the light is dissolved in the body at the end of the meditation so that the balance of elements in the body is maintained and no part of the body is overstimulated.

*When a human being uses the ancient language
in this way, you can think of it as sine waves created in consciousness
and sound that strike a sympathetic resonance with sine waves of the
larger universe.*

*The smaller sine wave nests in a larger one and this
virtue manifests both in the person doing the meditation and in the
outer world through intent, concept, feelings, and sensation carried on
breath. *The letter H has a silvery violet color, is the fire element of
will and has the sensation of warmth and fire, has the musical note of
A, and is the virtue by which the right arm of every child of God is
created.*

***On a practical level of physical manifestation,
our help in the
hardening of metals helps mankind travel
upon the Earth, and to the stars
in the outer worlds, to mirror the exploration
of dreamtime stars in the
inner worlds of the psyche.***

Footnotes

The names and meaning of angel groups come from Quaballah,
which is a very ancient set of teachings which together form a common precursor, or root, of three of the world's
religions:
Judaism, Islam, and Christianity.

Each degree of the zodiac is ruled by a high being of the heavenly host in the zone girdling the earth, and the
angels who work with him or her.

The being and the angels share the same name. This name is a key to their powers and influence.

Names, phrases, and sections, in the angel messages are quoted or paraphrased from the books of Franz Bardon.

Information of the heavenly hosts of the zone girdling the earth is referenced from THE PRACTICE OF MAGICAL
EVOCATION, ISBN 3-921338-02-6,
and Information of the divine virtues and the letters are referenced from THE KEY TO THE TRUE QUABALLAH,
ISBN 3-921338-12-4].

Publisher is Dieter Rüggeberg, Wuppertal/W. Germany.

These books have very important information for these studies.

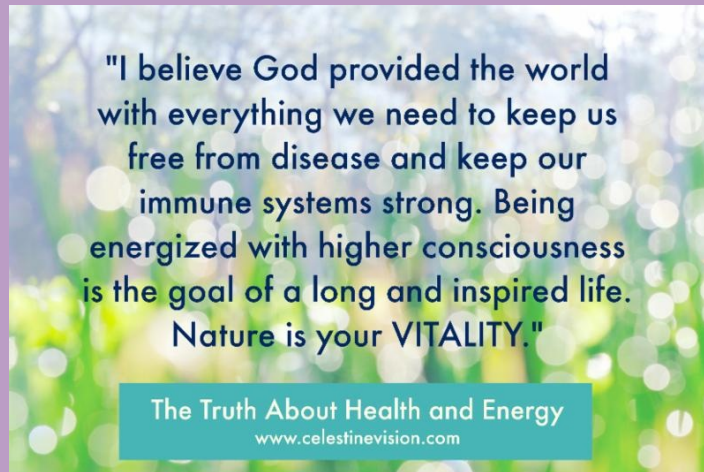

The book "Initiation into Hermetics" ISBN 3-921338-01-8, is a preparatory book for the others.

Franz Bardon's last autobiographical book, "Frabato the Magician",
gives historical background and was compiled by his German publisher from notes written by Franz Bardon.
